"An explosive global history that redefines the historical origins of the modern world through the life of Sultan Selim I and his Ottoman Empire. Long neglected in accounts of world history, the Ottoman Empire was a hub of flourishing intellectual fervor, geopolitical power, and enlightened pluralistic rule. At the helm of its ascent was the omnipotent Sultan Selim I (1470-1520), who, with the aid of his extraordinarily gifted mother, Gèulbahar, hugely expanded the empire, propelling it onto the world stage. Aware of centuries of European suppression of Islamic history, Alan Mikhail centers Selim's Ottoman Empire and Islam as the very pivots of global history, redefining such world-changing events as Christopher Columbus's voyages—which originated, in fact, as a Catholic jihad that viewed Native Americans as somehow "Moorish"—the Protestant Reformation, the transatlantic slave trade, and the dramatic Ottoman seizure of the Middle East and North Africa. Drawing on previously unexamined sources and written in gripping detail, Mikhail's groundbreaking account vividly recaptures Selim's life and world. An historical masterwork, *God's Shadow* radically reshapes our understanding of a world we thought we knew"--

A major study and an essential reference work, this book presents a critical evaluation of the sources on the fall of Constantinople to the Ottoman Turks in 1453. In Part I: The Pen, drawing upon manuscript and printed sources, and looking at the contrasting interpretations in secondary works, the authors reassess the written evidence concerning the event. In Part II, The Sword, the investigation results in new conclusions concerning the layout of the Theodosian Walls, the offensive and defensive strategies of the Byzantines and Turks, including land and sea operations, and an analysis of some of the major engagements. Yes, I Would... comprises a series of imaginary letters written to Lady Mary Montagu, whose famous Embassy Letters were written in 1716-1718 during her stay in Turkey as the wife of the

English ambassador. The author uses themes dear to Lady Mary, such as culture, art, religion, women and daily life, to reflect on those same topics as encountered during the author's past 30 years of travel in Turkey.

The authors of *VOYAGES IN WORLD HISTORY* never forget that history is made up of the stories of people. The seventeenth-century Ottoman-Habsburg frontier was the scene of chronic conflict. The defences of both empires were based on a line of fortresses, spanning the border. Mark Stein gives us a fascinating insight into everyday life on the frontier in this turbulent time in Ottoman history, by investigating the social, economic, and military aspects of Ottoman forts and garrisons in a new comparative approach. Drawing on a wide range of Ottoman and Western archival and narrative sources, "Guarding the Frontier" assesses the state of early-modern Ottoman military architecture and siegecraft; and, carefully dissects the Ottomans' ability to besiege, defend, build, and repair fortifications in the seventeenth century, as well as the relationship between the central and provisional administrations. This thorough overview includes an assessment of the empire's ability to marshal the manpower and supply requirements for lengthy sieges; a survey of Ottoman artillery; and the procedures involved in building and maintaining frontier forts. Studying an extensive database compiled from seventeenth-century garrison payroll records, Stein paints a fascinating description of the various types of troops who served on the Ottoman-Habsburg frontier: slave and levied soldiers, cavalry and infantry, Muslims and Christians, charged with defending the Ottoman Empire at this fascinating point in History. "A balance of sophistication and clarity in the writing, authoritative entries, and strong cross-referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world's most notable architecture. The contents feature major architects, firms, and professional issues; buildings, styles, and sites; the

architecture of cities and countries; critics and historians; construction, materials, and planning topics; schools, movements, and stylistic and theoretical terms. Entries include well-selected bibliographies and illustrations."--"Reference that rocks," American Libraries, May 2005.

In Fabrications of the Greek Past, Vaia Touna demonstrates that meanings of past material artifacts found in the present are historical products created by social actors through their always-contemporary acts of identification, such as their interpretations, categorizations, representations, and classifications.

Presents a comprehensive A-to-Z reference to the empire that once encompassed large parts of the modern-day Middle East, North Africa, and southeastern Europe.

This book is the first detailed reconstruction of the events and political culture of the Ottoman civil war of 1402-1413. After Timur defeated the Ottomans at the Battle of Ankara and dismembered their empire, the sons of Bayezid "the Thunderbolt" fought bloody battles for his throne, using literature and other means to justify their claims against each other. An analysis of the literature in question, which is among the earliest in Ottoman history, reveals fascinating attitudes on matters such as dynastic fratricide and power-sharing.

Dear Traveler, Welcome to the WanderStories™ History of Istanbul. The city that we now know as Istanbul has been known by many different names throughout its long history. It was founded in 667 B.C.E. as Byzantium. Then, in 330, the Roman Emperor Constantine I christened it as New Rome. Later, it would come to bear his own name and be known as Constantinople, which was then rendered into Arabic languages as Kostantiniyye, which the Ottomans also adopted. The city was destined to finally be known in our modern age as Istanbul, derived from a Greek phrase meaning, simply, to the city. So much has changed over the time those names spanned that it seems impossible they could possibly refer to only one city. Yet they do, and the city of Istanbul is still a vibrant place that treasures the artifacts of the various peoples who once lived here and knew it by such different names. The face of Istanbul has changed considerably inside the modern nation. Justinian's masterpiece, the Hagia Sophia, was turned into a museum and its wonderful mosaics were revealed to the world once more in 1935. Two bridges now span the Bosphorus, and along with the historic skyline of the old city there are now also skyscrapers. Today, the city's importance in world history is indisputable, and it is difficult to believe that all of this long history concerns just one city. There is only one thing to do now – visit! We, at WanderStories™, are storytellers. We don't tell you

where to eat or sleep, we don't intend to replace a typical travel reference guide. Our mission is to be the best local guide that you would wish to have by your side when visiting the sights.
