Resilience thinking challenges us to reconsider the meaning of sustainability in a world that must constantly adapt in the face of gradual and at times catastrophic change. This volume further asks environmental education and resource management scholars to consider the relationship of environmental learning and behaviours to attributes of resilient social-ecological systems - attributes such as ecosystem services, innovative governance structures, biological and cultural diversity, and social capital. Similar to current approaches to environmental education and education for sustainable development, resilience scholarship integrates social and ecological perspectives. The authors of Resilience in social-ecological systems: the role of learning and education present a wealth of perspectives, integrating theory with reviews of empirical studies in natural resource management, and in youth, adult, and higher education. The authors explore the role of education and learning in helping social-ecological systems as they respond to change, through adaptation and transformation. This book also serves to integrate a growing literature on resilience and social learning in natural resources management, with research in environmental education and education for sustainable development. This book was originally published as a special issue of Environmental Education Research.

Rates of childhood obesity are alarmingly high and increasing each year. Studies have shown that obese children are more likely to become obese adults and are likely to suffer with numerous health consequences like coronary heart disease, high blood pressure, and Type II diabetes, among others. Studies also indicate that television viewing and exposure to advertising for food products influences children's attitudes toward, food preferences and food purchase requests for foods with low nutritional value. It is important to better understand the role of media in childhood obesity and to learn how media may be used to address this issue in a positive way. This book focuses on communication and media research that can have an impact on reducing childhood obesity. Emphasis is placed on topics related to how the media communicate health-related messages about food, nutrition and diet that influence childhood obesity. Particular emphasis is on the new media, given the fact that media now have more central roles in socializing today's children and youth than ever before. Advertising and marketing messages reach young consumers through a variety of vehicles – broadcast and cable television, radio, magazines, computers through the Internet, music, cell phones – and in many different venues – homes, schools, child-care settings, grocery stores, shopping malls, theaters, sporting events, and even airports. In addition, given the disparity in obesity rates between children of color and the general population, special attention is given to research on media targeting these populations.

Throughout history, personal liberty, free markets, and peaceable, voluntary exchanges have been roundly denounced by tyrants and often greeted with suspicion by the general public. Unfortunately, Americans have increasingly accepted the tyrannical ideas of reduced private property rights and reduced rights to profits, and have become enamored with restrictions on personal liberty and control by government. In this latest collection of essays selected from his syndicated newspaper columns, Walter E. Williams takes on a range of controversial issues surrounding race, education, the environment, the Constitution, health care, foreign policy, and more. Skewering the self-righteous and self-important forces throughout society, he makes the case for what he calls the "the moral superiority of personal liberty and its main ingredient—limited government." With his usual straightforward insights and honesty, Williams reveals the loss of liberty in nearly every important aspect of our lives, the massive decline in our values, and the moral tragedy that has befallen Americans today: our belief that it is acceptable for the government to forcibly use one American to serve the purposes of another.

In this continuing series, the topic of morality embraces a wide range of essays from English, American and overseas scholars who ponder contemporary questions such as eating foie gras, advertising junk food, and master and servant relationships, as well as historical studies concerning fasting in the Reformation, food in Dickens's novels, the ...

Forty years after her mother's work changed the way we eat, Anna Lappé's Diet for a Hot Planet changed the way we think about food production and global warming. Fifty years ago, Frances Moore Lappé's Diet for a Small Planet sparked a revolution in thinking about the social and environmental impact of what we eat. Ten years ago, her daughter, Anna Lappé, controversially picked up the conversation with Diet for a Hot Planet, examining another hidden cost of our food choices: the climate crisis. Lappé predicted that food system-related greenhouse gas emissions would be catastrophic unless we radically shifted the trends of what we ate and how we produced it. She exposed the political interests with a stake in our food system, and foresaw the spin food companies would use to avoid system-wide reform. She visited the pioneering farmers of a future food system where good could outweigh harm, demonstrating the potential of sustainable farming. She also offered six eternal principles for a climate friendly diet. This measured and intelligent call to action is the perfect companion to the fiftieth anniversary edition of Diet for a Small Planet; like her mother before her, Lappé reminds us that food, and our perilously large food system, is still a powerful access point for solutions to the climate crisis.

What if the biggest danger to the church of Jesus Christ is not blatant heresy, the moral failures of church leaders, persecution, the rise of Islam or the loss of our rights? What if the biggest threat is counterfeit gospels within the church, ways of thinking and speaking about the good news that lead to a gradual drift from the truth of Scripture? The gospel is like a three-legged stool. There's the Gospel Story – the grand narrative of Scripture (Creation, Fall, Redemption, Restoration). Within that overarching framework, we make the Gospel Announcement about Jesus Christ (His perfect life, substitutionary death, resurrection, exaltation). The gospel announcement then births the Gospel Community: God's church – the embodiment of the gospel, the manifestation of God's kingdom. A counterfeit gospel is like a colony of termites, eating away at one of the legs of this stool until the whole thing topples over. This book exposes six common counterfeits (Therapeutic, Judgmentless, Moralistic, Quietist, Activist, and Churchless) that would get us off track. The goal of Counterfeit Gospels is to so deepen our love for the unchanging gospel of Jesus Christ that we would easily see through the many counterfeits that leave us impoverished. So come, love the gospel, recognize and overcome the counterfeits, and be empowered for ministry!

"Mara Einstein once again brings a clear head and discerning eye to one of our culture's most energetically promoted yet ambiguously motivated sectors. Whether you want to do real good for the world - or simply ridicule those who have been fooled into thinking they are - this book will show you the light." -Douglas Rushkoff, author of *Life Inc: How Corporatism Conquered the World and How We Can Take it Back* "Mara Einstein pulls back the curtain on some of the most important marketing developments of our day with a nuanced analysis that is both penetrating and fair minded." -Joseph Turow, author of *The Daily You: How the New Advertising Industry is Defining Your Identity and Your World* "Compassion, Inc challenges us as human beings to look at the true effects of our attempts to "purchase for positive social change." Einstein clearly articulates how we are too often creating the very same problems we are trying to solve. In this smart and well-researched look at the oxymoron of sustainable consumption, Einstein shows us that there is indeed another way, and how we can be more effective as consumers, but most importantly as citizens." -Courtney Hull, Hull Family Foundation
