businesses; securities; and intellectual property. -- Why, in the recent campaigns for universal health care, did organized labor maintain its support of employer-mandated insurance? Did labor's weakened condition prevent it from endorsing national health insurance? Marie Gottschalk demonstrates here that the unions' surprising stance was a consequence of the peculiarly private nature of social policy in the United States. Her book combines a much-needed account of labor's important role in determining health care policy with a bold and incisive analysis of the American welfare state. Gottschalk stresses that, in the United States, the social welfare system is anchored in the private sector but backed by government policy. As a result, the private sector is a key political battlefield where business, labor, the state, and employees hotly contest matters such as health care. She maintains that the shadow welfare state of job-based benefits shaped the manner in which labor defined its policy interests and strategies. As evidence, Gottschalk examines the influence of the Taft-Hartley health and welfare funds, the Employee Retirement Income Security Act (E.R.I.S.A.), and experience-rated health insurance, showing how they constrained labor from supporting universal health care. Labor, Gottschalk asserts, missed an important opportunity to develop a broader progressive agenda. She challenges the movement to establish a position on

This is the first book-length empirical study of free zones (FZs) in Gulf Cooperation Council (GCC) countries. The volume systematically illustrates the development processes behind FZs in Gulf Arab states and assesses the impact of these commercial entities on regional integration, global trade and investment trends, and the Gulfs foreign relations. FZ development is an understudied question in the wider literature on the Gulf in this context, the theoretical implications and empirical findings of the work constitute a valuable addition to prevailing political economy debates concerning the region. The work maps how economic strategies unfold in the presence of available material resources on a local level while also demonstrating the ways in which they are shaped by the relationship of Gulf Arab states to regional and global accumulation circuits.
