First published in 1993. Routledge is an imprint of Taylor & Francis, an informa company.

A comprehensive overview of the Islamic philosophical tradition. *Islamic Philosophy from Its Origin to the Present* offers a comprehensive overview of Islamic philosophy from the ninth century to the present day. As Seyyed Hossein Nasr attests, within this tradition, philosophizing is done in a world in which prophecy is the central reality of life—a reality related not only to the realms of action and ethics but also to the realm of knowledge. Comparisons with Jewish and Christian philosophies highlight the relation between reason and revelation, that is, philosophy and religion. Nasr presents Islamic philosophy in relation to the Islamic tradition as a whole, but always treats this philosophy as philosophy, not simply as intellectual history. In addition to chapters dealing with the general historical development of Islamic philosophy, several chapters are devoted to later and mostly unknown philosophers. The work also pays particular attention to the Persian tradition. Nasr stresses that the Islamic tradition is a living tradition with significance for the contemporary Islamic world and its relationship with the West. In providing this seminal introduction to a tradition little-understood in the West, Nasr also shows readers that Islamic philosophy has much to offer the contemporary world as a whole. Seyyed Hossein Nasr is University Professor of Islamic Studies at The George Washington University. He is the author and editor of many books, including *Islam: Religion, History, and Civilization*.

central theophany of Islam, the Prophet who received the word of God and made it known to mankind and the rites of Islam. The second part examines the divisions of the Islamic community with their distinctive pieties and emphases: Sunnism and Shi'ism and female spirituality. Part III is devoted to Sufism – its nature and origin, its early development, its various spiritual practices and its science of the soul.

This anthology of Seyyed Hossein Nasr's most representative essays, edited by William C. Chittick, distills the essence of this leading scholar's thoughts on the subjects of Islam, Sufism, Tradition, and the Environmental Crisis.

Nasr (Islamic studies, George Washington U.), in a series of ten lectures, argues that, unlike in the West, where scientific thought has been secularized, in the East, knowledge and religious experience have remained unified. Drawing from Buddhist, Hindu, Judaic, Christian, and Islamic traditions, he finds in each the idea of perennial wisdom as a philosophical basis for such unity. Paperback edition (\$10.95) not seen.

The study of Islamic education has hitherto remained a tangential inquiry in the broader focus of Islamic Studies. In the wake of this neglect, a renaissance of sorts has occurred in recent years, reconfiguring the importance of Islam's attitudes to knowledge, learning and education as paramount in the study and appreciation of Islamic civilization.

Philosophies of Islamic Education, stands in tandem to this call and takes a pioneering step in establishing the importance of its study for the educationalist, academic and student alike. Broken into four sections, it deals with theological, pedagogic, institutional and contemporary issues reflecting the diverse and often competing notions and practices of Islamic education. As a unique international collaboration bringing into conversation theologians, historians, philosophers, teachers and sociologists of education Philosophies of Islamic Education intends to provide fresh means for conversing with contemporary debates in ethics, secularization theory, child psychology, multiculturalism, interfaith dialogue and moral education. In doing so, it hopes to offer an important and timely contribution to educational studies as well as give new insight for academia in terms of conceiving learning and education.

Iranian metaphysician and ontologist, Seyyed Hossein Nasr, on Islamic philosophers and the intricate relationship between Persian culture and its philosophical schools. Brought together into a single volume for the first time, these essays span four decades of Nasr's prolific and learned scholarship on the development of Islamic philosophy, as well as the general history of Islam, and expound his belief that philosophy is not merely a rational but a sacred activity. A revised and expanded 2001 edition of Oliver Leaman's classic introductory work.

The *Alchemy of Happiness* was an attempt to show ways in which the lives of a Sufi could be based on what is demanded by Islamic law. This book allowed Al Ghazzali to considerably reduce the tensions between the scholars and mystics. The influence of Al-Ghazzali upon both the Christian and Islamic thinkers of the Middle Ages and beyond is being more and more widely documented.

This book combines scholarly research into certain aspect of Sufi doctrines and history with a penetrating account of the spiritual and metaphysical message and significance of Sufism as a living spiritual tradition. In an original discussion, unlike anything that has appeared before in studies of Sufism, the author places special accent on the pertinence of Sufi teachings to the most acute contemporary problems. The book addresses itself to both the ever-increasing Western public interested in Sufism and to the Western-educated Muslim interested in his own spiritual heritage. Dr. Nasr draws on his intimate knowledge of the Sufi literature in Arabic and Persian as well as his first-hand knowledge of Sufi tradition itself to produce this further volume in his numerous studies on the different facets of Islam.

This collection of essays by one of the best known contemporary Muslim scholars writing in English covers many facets of Islamic life and thought. The author has brought together studies dealing with the practical as well as intellectual aspects of Islam in both their historical and contemporary reality. The contemporary significance of themes such as religion and secularism, the meaning of freedom, and the tradition of Islamic science and philosophy is given particular attention.

The headlines are filled with the politics of Islam, but there is another side to the world's fastest-growing religion. Sufism is the poetry and mysticism of Islam. This mystical movement from the early ninth century rejects worship motivated by the desire for heavenly reward or the fear of punishment, insisting rather on the love of God as the only valid form of adoration. Sufism has made significant contributions to Islamic civilization in music and philosophy, dance and literature. The Sufi poet Rumi is the bestselling poet in America. But in recent centuries Sufism has been a target for some extremist Islamic movements as well as many modernists. The Garden of Truth presents the beliefs and vision of the mystical heart of Islam, along with a history of Sufi saints and schools of thought. In a world threatened by religious wars, depleting natural resources, a crumbling ecosystem, and alienation and

isolation, what has happened to our humanity? Who are we and what are we doing here? The Sufi path offers a journey toward truth, to a knowledge that transcends our mundane concerns, selfish desires, and fears. In Sufism we find a wisdom that brings peace and a relationship with God that nurtures the best in us and in others. Noted scholar Seyyed Hossein Nasr helps you learn the secret wisdom tradition of Islam and enter what the ancient mystics call the "garden of truth." Here, liberate your mind, experience peace, discover your purpose, fall in love with the Divine, and find your true, best self.

Islamic Philosophy has often been treated as mainly of historical interest, belonging to the history of ideas rather than to philosophy. This volume challenges this belief. The Routledge History of Philosophy is made up entirely of essays by a distinguished list of writers. They provide detailed discussions of the most important thinkers and the key concepts in Islamic philosophy, from earliest times to the present day.

This is the only book to deal with classical Islamic cosmology as it was formulated by the Ikhwan al-S'afa al Biruni and Ibn Sina during the tenth and eleventh centuries. These figures influenced all the later centuries of Islamic history and in fact created the cosmological framework within which all later scientific activity in the Islamic world was carried out--the enduring image of the cosmos within which Muslims have lived during the past millennium. Nasr writes from within the Islamic tradition and demonstrates how, based on the teachings of the Quran and the Prophet, the figures treated in

this work integrated elements drawn from various ancient schools of philosophy and the sciences. This book is unique in its treatment of classical Islamic cosmology as seen from within the Islamic world-view and provides a key for understanding of traditional Islamic thought. -- Back cover. This is an anthology of the most significant writing on the doctrinal, intellectual, and spiritual dimensions of Shicism. The works included here foster an interpretive understanding of Shicism in its dogmatic and cognitive aspects. The intent of this book is to balance the attention that has been focused on the political aspect of Shicism. Shicism is often seen, not only as an essentially political phenomenon, but as a creed of violence. Understanding Shicism in its total reality will encourage a more balanced approach to issues which are viewed mostly politically. While not denying the importance of political manifestations, this book offers an understanding of the often neglected religious beliefs and spiritual practices of this world community.

What is Islamic Philosophy? offers a broad introduction to Islamic thought, from its origins to the many challenging issues facing Muslims in the contemporary world. The chapters explore early Islamic philosophy and trace its development through key themes and figures up to the twenty-first century. Topics covered include: ethical issues such as just war, abortion, women's rights, homosexuality and cloning questions in political philosophy regarding what kind of Islamic state could exist and how democratic can (or should) Islam really be the contribution of Islam to 'big questions' such as the existence of God, the concept of the soul, and what constitutes truth. The philosophy of religion and theology are related to the culture in which they have developed. These disciplines provide a source of values and vision to the cultures of which they are part, while at the same time they are delimited and defined by their cultures. This book compares the ideas of two contemporary philosophers, John Hick and Seyyed Hossein Nasr, on the issues of religion, religions, the concept of the ultimate reality, and the notion of sacred knowledge. On a broader level, it compares two world-views: the one

formed by Western Christian culture, which is religious in intention but secular in essence; the other Islamic, formed through the assimilation of traditional wisdom, which is turned against the norms of secular culture and is thus religious both in intention and essence.

This book looks at one of today's greatest thinkers and his influential writings on religion, science, history, and Persian mysticism. The text includes 33 critical essays by contemporary scholars and Nasr's responses to each of them.

In this work, Muhsin Mahdi—widely regarded as the preeminent scholar of Islamic political thought—distills more than four decades of research to offer an authoritative analysis of the work of Alfarabi, the founder of Islamic political philosophy. Mahdi, who also brought to light writings of Alfarabi that had long been presumed lost or were not even known, presents this great thinker as his contemporaries would have seen him: as a philosopher who sought to lay the foundations for a new understanding of revealed religion and its relation to the tradition of political philosophy. Beginning with a survey of Islamic philosophy and a discussion of its historical background, Mahdi considers the interrelated spheres of philosophy, political thought, theology, and jurisprudence of the time. He then turns to Alfarabi's concept of "the virtuous city," and concludes with an in-depth analysis of the trilogy, *Philosophy of Plato and Aristotle*. This philosophical engagement with the writings of and about Alfarabi will be essential reading for anyone interested in medieval political philosophy.

the world. One of the great scholars in the modern Islamic intellectual tradition, and the acclaimed author of books such as *The Garden of Truth* and *The Heart of Islam*, Nasr brings incomparable insight to this exploration of Muslim issues and realities, delivering a landmark publication promoting cross-cultural awareness and world peace.

As the specter of religious extremism has become a fact of life today, the temptation is great to allow the evil actions and perspectives of a minority to represent an entire tradition. In the case of Islam, there has been much recent confusion in the Western world centered on distorted portrayals of its core values. Born of ignorance, such confusion feeds the very problem at hand. In *The Heart of Islam* one of the great intellectual figures in Islamic history offers a timely presentation of the core spiritual and social values of Islam: peace, compassion, social justice, and respect for the other. Seizing this unique moment in history to reflect on the essence of his tradition, Seyyed Hossein Nasr seeks to "open a spiritual and intellectual space for mutual understanding." Exploring Islamic values in scripture, traditional sources, and history, he also shows their clear counterparts in the Jewish and Christian traditions, revealing the common ground of the Abrahamic faiths. Nasr challenges members of the world's civilizations to stop demonizing others while identifying themselves with pure goodness and to turn instead to a deeper understanding of those shared values that can solve the acute problems facing humanity today. "Muslims must ask themselves what went wrong within their own societies," he writes, "but the West must also pose the same question about itself . . . whether we are Muslims, Jews, Christians, or even secularists, whether we live in the Islamic world or in the West, we are in need of meaning in our lives, of ethical norms to guide our actions, of a vision that would allow us to live at peace with each other and with the rest of God's creation."

Such help, he believes, lies at the heart of every religion and can lead the followers of the Abrahamic religions (Judaism, Christianity, and Islam) as well as other religious and spiritual traditions to a new future of mutual respect and common global purpose. The Heart of Islam is a landmark presentation of enduring value that offers hope to humanity, and a compelling portrait of the beauty and appeal of the faith of 1.2 billion people.

Created by the Prophet Muhammad and his twelve Imams, the Hadith is an ancient and profoundly influential body of religious texts in Shi'ite Muslim literature, second in importance only to the Holy Koran itself. Texts on the practical aspects of life and pure metaphysics are included in this first English translations of excerpts from the Hadith. Especially selected for the Western reader by the renowned Islamic scholar Tabataba'i, the passages from the Hadith shed light on the culture, history, law, and theology of the Shi'ite community and provide direct translations of some of the most famous of Islamic prayers.

With remarkable breadth of vision, Seyyed Hossein Nasr reveals for both Western and Muslim readers how each art form in the Islamic tradition is based upon a science of nature concerned, not with the outer appearance of things, but with their inner reality. Ranging across calligraphy, painting, architecture, literature, music, and the plastic arts, Nasr penetrates to the inner dimension of Islam and shows the role

art plays in the life of individual Muslims and the community as a whole—the role of inspiring the remembrance and contemplation of God. Once the author establishes art as an aid and support to the spiritual life, he traces the creative act to its ultimate source: inner knowledge and barakah, or grace, which make the crystallization of inner realities in form and space and time possible. Through this knowledge and grace, the author asserts, unity manifests upon the plane of multiplicity, making archetypal realities perceivable by the senses. Through this knowledge and grace, art functions as a ladder for the journey of the soul from the visible to the invisible. How Islamic art leads man to the inner chamber of divine revelation forms the substance of much of this important work. An especially close look is given to the Sufi tradition within Islam, for its mystical teachers have often clearly demonstrated in their works the spiritual significance of beauty and served as the source of inspiration for art. By rediscovering the root of art in the Islamic tradition, Seyyed Hossein Nasr opens doors to new dimensions of unity which have seemingly been obscured in recent Western art. In so doing, he extends the significance of this book beyond the Islamic belief system to touch the hearts and creative impulses of readers from all traditions.

A comprehensive overview of the Islamic philosophical tradition.

Although Islamic philosophy represents one of the leading philosophical traditions in the world, it has only recently begun to receive the attention it deserves in the non-Islamic world. Muslim thinkers have sought to understand the theoretical aspects of their faith by using philosophical concepts. Leaman outlines this history and demonstrates that, although the development of Islamic philosophy is closely linked with Islam itself, its form is not essentially connected to any particular religion, and its leading ideas and arguments are of general philosophical significance. The author illustrates the importance of Islamic thought within philosophy through the use of many modern examples. He describes and contrasts the three main movements in Islamic philosophy ? Peripatetic, Sufi and Illuminationist ? and examines the Persian as well as the Arabic traditions. Wide coverage is given to key aspects of Islamic philosophy, including epistemology, ontology, politics, ethics and philosophy of language, providing readers with a balanced view of the discipline. The second edition has been thoroughly revised and updated throughout, including the addition of two new chapters on recent debates surrounding Islam's need for an enlightenment, and on the future of Islamic philosophy. The new edition of Islamic Philosophy will continue to be essential reading for students and scholars of the subject, as well as anyone wanting to learn more about one of the most significant and influential philosophical traditions in the world today.

This book is an attempt to explain how, in the face of increasing religious authoritarianism in medieval Islamic civilization, some Muslim thinkers continued to pursue essentially humanistic, rational, and scientific discourses in the quest for knowledge, meaning, and values.

Drawing on a wide range of Islamic writings, from love

poetry to history to philosophical theology, Goodman shows that medieval Islam was open to individualism, occasional secularism, skepticism, even liberalism. This pioneer study of Aristotle's theory of deduction in early medieval Islam provides invaluable first-hand information on both the classical and the Islamic dimensions of an important chapter in the history of medieval Islamic philosophy.

The first comprehensive survey of Islamic philosophy from the seventh century to the present, this classic discusses Islamic thought and its effect on the cultural aspects of Muslim life. Fakhry shows how Islamic philosophy has followed from the earliest times a distinctive line of development, which gives it the unity and continuity that are the marks of the great intellectual movements of history.

The end of the eighteenth century was a transformational period for the Muslim communities of the Russian Empire and their relationship with the tsarist state. Though they had been under Russian rule since the sixteenth century, it was at this time that they were incorporated into the imperial bureaucracy, most significantly through the founding of an official hierarchy for the Islamic religious scholars in 1788. The introduction of a state-backed structure for Muslim religious institutions altered Islamic religious authority and, in turn, religious discourse. One of the major figures to emerge from this new context was Abu Nasr Qursawi (1776-1812). A controversial figure who was condemned for heresy in Bukhara in 1808, Qursawi put forward a sweeping reform of the Islamic scholarly tradition.

Focusing on taqlid, the principle of conformity to established doctrine, Qursawi argued that its overuse had weakened scholarship in the areas of Islamic law (fiqh) and theology (kalam) and undermined scholars' ability to serve as religious guides. In *Preserving Islamic Tradition*, Nathan Spannaus presents the first detailed analysis of Qursawi's reformist project, both in its contours and broad historical setting. Spannaus shows how state control of Muslim institutions impacted religious discourse, but also how it altered the entire religious environment into the twentieth century. Addressing issues of modernity, secularity, tradition, and intellectual history, *Preserving Islamic Tradition* demonstrates how the interaction with a European imperial state transformed the Islamic tradition, both directly and indirectly, and elicited new forms of religious thought and discourse.

Philosophy flourished in the Islamic world for many centuries, and continues to be a significant feature of cultural life today. Now available in paperback, *The Biographical Encyclopedia of Islamic Philosophy* covers all the major and many minor philosophers, theologians, and mystics who contributed to its development. With entries on over 300 thinkers and key concepts in Islamic philosophy, this updated landmark work also includes a timeline, glossary and detailed bibliography. It goes beyond philosophy to reference all kinds of theoretical inquiry which were often linked with philosophy, such as the Islamic sciences, grammar, theology, law, and traditions.
