

History Philosophy And Theology Of Christian Education

Excerpt from Essays on History, Philosophy, and Theology, Vol. 2 Mr. Carlyle has no wish to be numbered with the Little-Faiths of his generation, Self-distrust is not his besetting infirmity. He believes religiously in his power to do the thing he wills to do. He would not be understood as giving ready harbour-room to fear about anything relating to the guidance of his own ways. Not would he have you suppose that the fears of others on his account are at all a matter in his thoughts. His eyes are open, his path is before him, and no man's foresight can serve him in so good a stead as his own, There is something imposing about a man who takes this attitude, or who even seems to take it - provided always that the absence of ability be not such as to identify such outspoken self-reliance with the ridiculous. Unhappily, in this disjointed world, the self-reliant are not always the self-sustained, and the absence of fear is not always the same thing with the absence of danger. Hence, we must confess, that when we saw it announced that Mr. Carlyle was about to publish a Life of Cromwell, or something to that effect, we could not suppress our misgiving. We could imagine, indeed, the wonder, or the contempt with which all such want of confidence on our part would be regarded. Nevertheless - there it was, a feeling of that sort would obtrude itself. The search for the historical Jesus is a hot topic in both popular and academic circles today and has drawn a lot of attention from national magazines, such as Time, Newsweek, and U.S. News & World Report. Further, the media has given an undue amount of attention to the Jesus Seminar's outlandish statements, a self-selected liberal group representing a tiny percentage of New Testament scholarship. Dr. Gary Habermas will address the questions surrounding the debate over the historical Jesus and show a significant number of historical facts about Jesus in secular and non-New Testament sources that prove that the Jesus of history is the same Jesus of the Christian faith. The author of EVIDENCE FOR THE HISTORICAL JESUS is Dr. Gary Habermas, author of the book, The Historical Jesus and about twenty other volumes. He received his Ph.D. from Michigan State University. Dr. Habermas is chairman of the Department of Philosophy at Liberty University. He has written more than 100 articles, mostly on the life of Jesus, which have appeared in scholarly journals and elsewhere. Herein you will learn why Jesus is one of the most historically verified lives of ancient times.

True disagreements are hard to achieve, and even harder to maintain, for the ghost of final agreement constantly haunts them. The Babylonian Talmud, however, escapes from that ghost of agreement, and provokes unsettling questions: Are there any conditions under which disagreement might constitute a genuine relationship between minds? Are disagreements always only temporary steps toward final agreement? Must

a community of disagreement always imply agreement, as in an agreement to disagree? What is Talmud? rethinks the task of philological, literary, historical, and cultural analysis of the Talmud. It introduces an aspect of this task that has best been approximated by the philosophical, anthropological, and ontological interrogation of human being in relationship to the Other-whether animal, divine, or human. In both engagement and disengagement with post-Heideggerian traditions of thought, Sergey Dogopolski complements philological-historical and cultural approaches to the Talmud with a rigorous anthropological, ontological, and Talmudic inquiry. He redefines the place of the Talmud and its study, both traditional and academic, in the intellectual map of the West, arguing that Talmud is a scholarly art of its own and represents a fundamental intellectual discipline, not a mere application of logical, grammatical, or even rhetorical arts for the purpose of textual hermeneutics. In Talmudic intellectual art, disagreement is a fundamental category. What Is Talmud? rediscovers disagreement as the ultimate condition of finite human existence or co-existence.

Peter Byrne presents a detailed study of the role of the concept of God in Kant's Critical Philosophy. After a preliminary survey of the major interpretative disputes over the understanding of Kant on God, Byrne explores his critique of philosophical proofs of God's existence. Examining Kant's account of religious language, Byrne highlights both the realist and anti-realist elements contained within it. The notion of the highest good is then explored, with its constituent elements - happiness and virtue, in pursuit of an assessment of how far Kant establishes that we must posit God. The precise role God plays in ethics according to Kant is then examined, along with the definition of religion as the recognition of duties as divine commands. Byrne also plots Kant's critical reworking of the concept of grace. The book closes with a survey of the relation between the Critical Philosophy and Christianity on the one hand and deism on the other.

The first comprehensive survey of Islamic philosophy from the seventh century to the present, this classic discusses Islamic thought and its effect on the cultural aspects of Muslim life. Fakhry shows how Islamic philosophy has followed from the earliest times a distinctive line of development, which gives it the unity and continuity that are the marks of the great intellectual movements of history.

Philosophical Theology in Islam explores the later history of the Ashʿarī school of theology through in-depth studies on its thought, sources, scholarly networks and contexts.

This volume explores the work and thought of Edith Stein (1891–1942). It discusses in detail, and from new perspectives, the traditional areas of her thinking, including her ideas about women/feminism, theology, and metaphysics. In addition, it introduces readers to new and/or understudied areas of her thought, including her views on history, and her social and political philosophy. The guiding thread that connects all the essays in this book is the emphasis on new approaches and novel applications of her philosophy. The contributions both extend the interdisciplinary implications of Stein's thinking for our contemporary world and apply her insights to questions of theatre, public history and biographical representation, education, politics, autism, theological debates, feminism, sexuality studies and literature. The volume brings together for the first time leading scholars in five language-groups, including English, German, Italian, French and Spanish-speaking authors, thereby reflecting an international and cosmopolitan approach to Stein studies.

Alan Sell explores the lives and ideas of four unjustly neglected Anglican philosophers: W. G. De Burgh (1866-1943); W. R. Matthews (1881-1973); O. C. Quick (1885-1944); H. A. Hodges (1905-1976). This study fills an important gap in the history of twentieth-century philosophical and theological thought. Sell argues that these writers covered a wide range of philosophical topics in an illuminating way, and that a comparison of their respective standpoints and methods is instructive from the point of view of the viability or otherwise of Christian philosophizing. He discusses the challenges these four philosophical Anglicans issued to certain important trends in the philosophy and theology of their day, and argues that some of them are of continuing relevance.

In Sino-Theology and the Philosophy of History Leopold Leeb presents the ideas of an influential Chinese intellectual, Liu Xiaofeng, whose approach to the question of a Christian theology for China is both controversial and inspiring. The first volume of the collected major articles of Richard M. Frank, pioneering student of Islamic theology (kalam), contains fifteen essays. It includes his early

studies, classic but inaccessible for many in their original publication, on the text and terminology of Graeco-Arabic translations and the terminology of early kalam. Other articles deal with Islamic theology and its early development, especially in its relation to philosophy. The collection is prefaced by a autobiographical memoir which traces the intellectual development of the author. A History of Western Philosophy and Theology is the fruit of John Frame's forty-five years of teaching philosophical subjects. No other survey of the history of Western thought offers the same invigorating blend of expository clarity, critical insight, and biblical wisdom. The supplemental study questions, bibliographies, links to audio lectures, quotes from influential thinkers, twenty appendices, and indexed glossary make this an excellent main textbook choice for seminary- and college-level courses and for personal study. Walter Kasper, a German cardinal of the Roman Catholic Church, is president emeritus of the Pontifical Council for Promoting Christian Unity, having served as its president from 2001 to 2010. Kasper explains that the interest of theology has been broken off by idealistic thinking, and advocates a new discussion between theology and idealism, of the fundamental importance of the theology of the twentieth century.

Alan Sell here presents a selection of his wide-ranging, informative, and entertaining reviews. Among philosophical themes discussed are Locke and the Enlightenment, Richard Price, John Stuart Mill, philosophical idealism, and analytical philosophy of education and of religion. Historical studies run from the Middle Ages onwards, and encompass English, Welsh, and Scottish Nonconformity, the Evangelical Revival, the Oxford Movement, theological education, American Reformed thinkers, the crisis of belief and the Social Gospel in Canada, and evangelical and liberal theology. Theological topics include Origen, Calvin, and Dutch Reformed thinkers, American Baptists, Mercersburg Theology, Scottish theology, liberation theology, assurance, the atonement, ecclesiology, ecumenism, art and theology, Christian ethics, worship and spirituality.

Methexiology is not a particular theory, but rather a general philosophical orientation. Therefore, in *Methexiology: Philosophical Theology and Theological Philosophy for the Deification of Humanity*, Nicolas Laos elucidates the significance of methexiology for the study of ontology, epistemology, ethics, philosophical psychology, theory of justice, philosophy of history, and philosophy of religion. Laos argues that, faced with the modern and the postmodern crises of meaning, we need a new myth, a new spiritual formula, for the resacralization of humanity and the cosmos, without restoring defunct totems, without using tales as "cheap" substitutes for the lack of a life-giving myth, and without negating history. In his *Methexiology*, Laos studies the "genealogy" of the modern and the postmodern crises of meaning, and, based on his new interpretation of classical Greek philosophy and Hesychasm, proposes methexiology as a way of overcoming the crises of meaning and as a way of resacralizing humanity and

the cosmos through a new metaphysically grounded humanism.

This volume is the first-ever collection of essays devoted to the Lurianic concept of *tsimtsum*. It contains eighteen studies in philosophy, theology, and intellectual history, which demonstrate the historical development of this notion and its evolving meaning: from the Hebrew Bible and the classical midrashic collections, through Kabbalah, Isaac Luria himself and his disciples, up to modernity (ranging from Spinoza, Böhme, Leibniz, Newton, Schelling, and Hegel to Scholem, Rosenzweig, Heidegger, Benjamin, Adorno, Horkheimer, Levinas, Jonas, Moltmann, and Derrida).

Laugh out loud with this richly illustrated, tongue-in-cheek approach to the history of philosophy and religion.

Exploring Gregory of Nyssa: Philosophical, Theological, and Historical Studies brings together an interdisciplinary team of historians, classicists, philosophers, and theologians to offer a holistic exploration of the thought of Gregory of Nyssa. The volume considers Gregory's role in the main philosophical and religious controversies of his era, such as his ecclesiastical involvement in the Neo-Nicene apologetical movement. It looks at his complex relationships—for example with his brother Basil of Caesarea and with Gregory of Nazianzus. Contributors highlight Gregory's debt to Origen, but also the divergence between the two thinkers, and their relationships to Platonism. They also examine Gregory of Nyssa's wider philosophy and metaphysics; deep questions in philosophy of language such as the nature of predication and singular terms that inform our understanding of Gregory's thought; and the role of metaphysical concepts such as the nature of powers and identity. The study paints a picture of Gregory as a ground-breaking philosopher-theologian. It analyses the nature of the soul, and connection to theological issues such as resurrection; questions that are still of interest in the philosophy of religion today, such as divine impassibility and the nature of the Trinity; and returning to more immediately humane concerns, Gregory also has profound thoughts on topics such as vulnerability and self-direction. The volume will be of primary interest to researchers, lecturers, and postgraduate students in philosophy, classics, history, and theology, and can be recommended as secondary reading for undergraduates, especially those studying classics and theology.

Philosophy begins with wonder, according to Plato and Aristotle. Yet Plato and Aristotle did not expand a great deal on what precisely wonder is. Does this fact alone not raise curiosity in us as to why this passion or concept is important? What is wonder's role in science, philosophy, or theology except to end thinking or theorizing as soon as one begins? The primary purpose of this book is to show how seventeenth- and eighteenth-century developments in natural theology, metaphysics, epistemology, ethics, aesthetics, and the philosophy of science resulted in a complex history of the passion of wonder—a history in which the elements of continuation, criticism, and reformulation are equally present. *Philosophy Begins in Wonder* provides the first historical overview of wonder and changes the way we see early modern Europe. It is intended for readers who are curious—who wonder—about how modern philosophy and science were born. The book is for scholars and educated readers alike. "Some very famous scholars have claimed that in the Enlightenment and Scientific worldview there is no place for wonder. Michael Funk Deckard and Peter Losonczi are to be congratulated for assembling such a fine, focused collection that, among its many virtues, dispels the myth of the disappearance of wonder at the dawn of Modernity. Plato and Aristotle agreed that philosophy begins in wonder, but famously disagreed about where it ends. Plato would not be surprised that even in knowing ages, wonder can be truth's consequence." ERIC SCHLIESSER, Leiden University "This rich and provocative collection of essays could bear fruit in a dozen or more

books, each of them already here in gist. May it be so." JOHN WILSON, Editor, Books & Culture "(This is) an illuminating collection of essays which traces the religious, scientific, and philosophical history of wonder, and which will be a much-needed and long-awaited aid to all those interested in exploring this important yet understudied topic." SOPHIA VASALOU, European College of Liberal Arts in Berlin

Spanning the breadth of philosophical, historical and theological interests articulated in the work of Paul Helm, including chapters on Calvinism, philosophical theology, philosophy of mind, Christian Doctrine and epistemology, Reason, Faith and History offers an accessible text for students of contemporary philosophy of religion as well as those interested in philosophical theology more broadly. Reason, Faith and History offers a unique collection of essays on key topics in the philosophy of religion. Published in honour of Paul Helm, a major force in contemporary English-speaking philosophy of religion, this book presents newly commissioned chapters by distinguished philosophers and theologians from North America, Israel, the UK and Continental Europe. Contributors include: Robertson, Trueman, Hughes, Swinburne, Torrance, Clark, Robinson, Pink, Gellman, Cross, Byrne, Hossack, and Crisp.

Excerpt from Essays on History, Philosophy, and Theology, Vol. 1 of 2 The following papers are selected from contributions to the British Quarterly Review. They have been carefully revised, but, with the exception of the last in the second volume, they are reprinted in substance as they were first published. It has been suggested to the author, that it might be useful to make several of these articles more accessible than they can be in the pages of a quarterly and miscellaneous journal: he has been willing to believe as much, and this is the history of the publication. In most instances, the topics of the Essays have their place among the questions of the day, and are such as may be expected to retain that prominence and interest for our time. On one subject - the influence of the Continental Philosophy on Christianity, the author has expressed himself largely and freely. Still, he has only broken ground upon it. If his life be spared, he hopes to show more fully than could be done in a work of this nature, the folly of attempting to bring about any sincere harmony between Revealed Religion and the sort of Philosophy which has had its sway in Germany from the age of Kant to the death of Hegel. Translated by Henrik Rosenmeier, A History of Ancient Philosophy charts the origins and development of ancient philosophical thought. For easy reference, the book is divided chronologically into six main parts. The sections are further divided into philosophers and philosophical movements: *Pre-Socratic Philosophy, including mythology, the Pythagoreans and Parmenides *The Great Century of Athens, including the Sophists and Socrates *Plato, including The Republic, The Symposium and The Timaeus *Aristotle, including The Physics, The Metaphysics and The Poetics *Hellenistic Philosophy, including the Sceptics, the Stoics, the Epicureans and Cicero *Late Antiquity, including Neoplatonism, Origen and St Augustine. This comprehensive and meticulously documented book is structured to make ancient philosophical thought and ancient thinkers accessible. It contains: *full references to primary sources *detailed interpretations of key philosophical passages, including surveys of previous philosophical readings *an overview of the development of ancient philosophical thought *discussions of the relationships between philosophers and their ideas *analyses of key philosophical concepts and ideologies including ontology, epistemology, logic, semantics,

moral and political philosophy, theology and aesthetics *explanations of Greek philosophical terminology.

Excerpt from *Essays on History, Philosophy, and Theology*, Vol. 2 In nearly all respects, the estimate of the character of Cromwell published twenty years since by Mr. Macaulay is fully as independent, honourable, and just, as. This now published by Mr. Carlyle. But in one respect we give the precedence greatly to Mr. Carlyle's portraiture. He does justice to the religion of Cromwell. His philosophy, Mr. Carlyle does not intend that his readers should think thus humbly of his labours on this point; but he must know that this is the fact of the case, inasmuch as the narrative in the above extract is given in nearly the same words, in the introduction to the *Pell Papers*, 'on the Times of the Protectorate, edited by the author of this article, and that work at least we must suppose Mr. Carlyle to have read, inasmuch as he quotes from it. And has disposed of it after his manner. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. A study of the philosophy and theology of the spiritual life that takes religious sensibility or the practice of religious life, rather simply creedal commitment, as a starting point. "Understanding the Faith " is a collection of essays in philosophical theology by Canadian theologian and philosopher of religion Joseph C. McLelland spanning his remarkable 50-year association with The Presbyterian College, Montreal. The range and depth of these articles on the nature of Christian ministry, the history of the Reformed tradition, and the state of religion in Canada, provide an important record of a half-century of theological reflection. McLelland's insights on church, academy, and society deserve to be read again and again. *Understanding the Faith* is the inaugural volume in a new series of publications called *Presbyterian College Studies in Theology and Ministry*, sponsored by The Presbyterian College, Montreal. The Presbyterian College, founded in 1865, is a seminary of The Presbyterian Church in Canada, a member college of The Montreal School of Theology, and is affiliated with the Faculty of Religious Studies at McGill University. Joseph C. McLelland is J.W. McConnell Professor of Philosophy of Religion Emeritus at McGill University and Robert Professor of History and Philosophy of Religion Emeritus at The Presbyterian College, Montreal. From 1975 to 1985 he also served as Dean of the Faculty of Religious Studies at McGill University.

Today's social and political climate often pits conservative or traditional Christianity against progressive Christianity. But what is progressive Christianity? What is a progressive Christian? What is a progressive church? Christianity in Blue answers these questions by drawing from biblical scholarship, Christian history, theology, popular culture, philosophy, and cultural anthropology. Kaden shows how socially liberal values and progressive attitudes can be the fruits of taking seriously both the Bible and Christian tradition. But rather than treating these sources as static authorities and the final word on every subject, Kaden argues that they are places to start one's exploration of how to be a Christian in the world. Being a progressive Christian is an ethical exhortation to uplift human personality, as Martin Luther King Jr. once said. This exhortation structures how progressive Christians receive, interpret, and apply the Bible

and Christian tradition to daily life. A robust tradition provides an anchor to avoid the illiberal trends in contemporary society, and a commitment to uplifting human personality provides a check against dehumanizing uses of Scripture and tradition. Christianity in Blue will help both progressive and conservative Christians better understand the importance of the Bible, theology, history, and philosophy for building a loving church for everyone.

A History of Western Philosophy and Theology

The series MISCELLANEA MEDIAEVALIA was founded by Paul Wilpert in 1962 and since then has presented research from the Thomas Institute of the University of Cologne. The cornerstone of the series is provided by the proceedings of the biennial Cologne Medieval Studies Conferences, which were established over 50 years ago by Josef Koch, the founding director of the Institute. The interdisciplinary nature of these conferences is reflected in the proceedings. The MISCELLANEA MEDIAEVALIA gather together papers from all disciplines represented in Medieval Studies - medieval history, philosophy, theology, together with art and literature, all contribute to an overall perspective of the Middle Ages.

Enrique Ambrosini Dussel is and has been one of the most prolific Latin American philosophers of the last 100 years. He has written over fifty books, and over three hundred articles ranging over the history of the Latin American philosophy, political philosophy, church history, theology, ethics, and occasional pieces on the state of Latin American countries. Dussel is first and foremost a moral philosopher, a philosopher of liberation. But for him, philosophy must be liberated so that it may contribute to social liberation. In one sense, 'beyond philosophy' means to go beyond contemporary, academicized, professionalized, and 'civilized' philosophy by turning to all that demystifies the autonomy of philosophy and turns our attention to its sources. 'Beyond philosophy,' also means to go beyond philosophy in the Marxian sense of abolishing philosophy by realizing it. This is the definitive English language collection of Dussel's enormous body of work. It will allow the reader to get a good sense of the breath and depth of Dussel's opus, covering four major areas: ethics, economics, history, and liberation theology.
