

Hk Dass Maths In

For B.E. First year Semester I (all branches) strictly according to the syllabus of Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal (M.P.) and all Engineering Colleges affiliated to Ravi Shankar University, Raipur(Chattisgarh) Introduction to Engineering Mathematics - Volume IV has been thoroughly revised according to the New Syllabi (2018 onwards) of Dr. A.P.J. Abdul Kalam Technical University (AKTU, Lucknow). The book contains 13 chapters divided among five modules - Partial Differential Equations, Applications of Partial Differential Equations, Statistical Techniques - I, Statistical Techniques - II and Statistical Techniques - III.

Basic Engineering Mathematics Volume

For B.E./ B.Tech/B.Arch. Students for first semester of all Engineering Colleges of Uttrakhand, Dehradun (Unified Syllabus). As per the syllabus 2006-07 and onwards. The subject matter is presented in a very systematic and logical manner. The book contains fairly large number of solved examples from question papers of examinations recently conducted by different universities Engineering Mathematics (Conventional and Objective Type) completely covers the subject of Engineering Mathematics for engineering students (as per AICTE) as well as engineering entrance exams such as GATE, IES, IAS and Engineering Services Exams. Though a first edition, the book is enriched by 50 years of Academics and professional experience of the Author(s) and the experience of more than 85 published books.

This book is primarily written according to the latest syllabus (July 2013) of Mahamaya Technical University, Noida for the third semester students of B.E./B.Tech/B.Arch. The textbook is for the Group B [ME, AE, MT, TT, TE, TC, FT, CE, CH, etc. Branches] of B.Tech III Semester. The Solved Question Paper of Dec. 2012 is included in the body of the text.

S. Chand's Mathematics books for Classes IX and X are completely based on CCE pattern of CBSE. The book for Term I covers the syllabus from April to September and the book for Term II covers the syllabus from October to March.

For B.E. First Year Semester Ii (All Branches). Strictly According To The Syllabus Of Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal (M.P.)

Introduction to Engineering Mathematics Volume-II has been thoroughly revised according to the New Syllabi (2018 onwards) of Dr. A.P.J. Abdul Kalam Technical University (AKTU, Lucknow). The book contains 15 chapters divided among five modules - Ordinary Differential Equations of Higher Order, Multivariable Calculus-II, Sequence and Series, Complex Variable Differentiation and Complex Variable-Integration. It contains numerous solved examples from question papers of examinations recently held by different universities and engineering colleges so that the students may not find any difficulty while answering these problems in their final examination.

Mathematic

Introduction to Engineering Mathematics Volume-I has been thoroughly revised according to the New Syllabi (2018 onwards) of Dr. A.P.J. Abdul Kalam Technical University (AKTU, Lucknow). The book contains 19 chapters divided among five sections - Differential Calculus- I, Differential Calculus- II, Matrices, Multivariable calculus- I and Vector calculus. It contains good number of solved examples from question papers of examinations recently held by different universities and engineering colleges so that the students may not find any difficulty while answering these problems in their final examination.

Keeping in view the limited time at the disposal of engineering students preparing for university examination, the book contains fairly large number of solved examples taken from various recently examination papers of different universities and Engineering colleges so that they may not find any difficulty while answering these problems in their final examination. Latest question papers upto summer 2006 of A.M.I.E. have been added for the readers to understand the latest trend.

"Mathematical Physics" has been written to provide the readers a clear understanding of the mathematical concepts which are an important part of modern physics. The textbook contains 49 chapters on all major topics in an exhaustive endeavour to cover syllabuses of all major universities. Some of the important topics covered in these chapters are Vectors, Integration, Beta and Gamma functions, Differential Equations, Complex Numbers, Matrix and Determinants, and the Laplace transforms.

This book is primarily written according to the unified syllabus of Mathematics of first semester of all Engineering Colleges affiliated to Biju Patnaik University of Technology, Rourkela, Orissa. This book also covers the B.Tech./B.E./B.Arch. First year course of other Indian Engineering Colleges. This is divided into 10 chapters on different topics. The subject matter is presented in a very systematic and logical and logical manner. Every endeavour has been made to make the contents simple and lucid as possible. Emphasis has been laid on making the concepts clear. Lot of pains and concentration on the part of the author has gone in solving the examples in the best possible way. In providing the solution of the problems, care has been taken not to omit even a minor step so that the students can follow the subject even without the guidance of the teacher.

"Advanced Engineering Mathematics" is written for the students of all engineering disciplines. Topics such as Partial Differentiation, Differential Equations, Complex Numbers, Statistics, Probability, Fuzzy Sets and Linear Programming which are an important part of all major universities have been well-explained. Filled with examples and in-text exercises, the book successfully helps the student to practice and retain the understanding of otherwise difficult concepts.

As per the new syllabus of 2006-2007 Uttarakhand Technical University. The subject matter is presented in a very systematic and logical manner. The book contains fairly large number of solved examples from question papers of examinations recently conducted by different universities and Engineering Colleges so that students may not find any difficulty while answering these problems in their final examinations. This book is primarily written according to the syllabi for B.E./B.Tech. Students for I sem. of MDU, Rohtak and Kurushetra University . Special Features : Lucid and Simple Language | Objective Types Questions | Large Number of Solved Examples | Tabular Explanation of Specific Topics | Presentation in a very Systematic and logical manner.

Introduction to Engineering Mathematics Volume-III is written for the B.E./B.Tech./B. Arch. students of third/fourth semester of Dr. A.P.J. Abdul Kalam Technical University (AKTU) in according to the new syllabus. The book is divided into twenty-five chapters covering all the important topics of the subject. It contains fairly a large number of solved examples from question papers of examinations recently held by different universities and engineering colleges so that the students may not find any difficulty while answering these problems in their final examination.

Advanced Engineering Mathematics is a good reference on the practical mathematics used in engineering. The book has been designed to provide engineers with quick-access mathematical formulas for their specialities. It contains advanced topics such as Laplace transform and numerical methods. Simple and extensive treatment has been given to the topics involved. The book covers the foundation of Modern Mathematics which is being used by almost all the branches of engineering. More than 400 solved problems on all topics of the contents (employing different techniques in the solution) have been given.

For B.E./B.Tech. / B.Arch. Students for First Semester of all Engineering Colleges of Maha Maya Technical University, Noida and Gautam Buddha Technical University, Lucknow

Advanced Engineering Mathematics S. Chand Publishing

The book is a textbook for students of engineering, physics, mathematics, and computer science. The material is arranged in seven independent parts: ordinary differential equations, linear algebra, vector calculus, Fourier analysis, partial differential equations, complex analysis, numerical methods, optimization, graphs, probability, and statistics.

This book has received very good response from students and teachers within the country and abroad alike. Its previous edition exhausted in a very short time. I place on record my sense of gratitude to the students and teachers for their appreciation of my work, which has offered me an opportunity to bring out this revised Eighteenth Edition. Due to the demand of students a chapter on Linear Programming is added. A large number of new examples and problems selected from the latest question papers of various engineering examinations held recently have been included to enable the students to understand the latest trend.

B.E./B.Tech. Students of Second Semester of MDU, Rohtak and Kurushetra University, Kurushetra.

For Engineering students & also useful for competitive Examination.

Mathematical Physics

Strictly according to the syllabus (2012-2013) of Rajiv Gandhi Pradyogiki Vishvidayala, Bhopal (M.P).

For B.E./ B.Tech students of Third Semester of Maharshi Dayanand University (MDU). Rohtak and Kurushetra University, Kurushetra.

Special Features of the First Edition :: Lucid and Simple Language | Large number of solved Examples | Tabular Explanation of Specific Topics | Presentation in a very Systematic and Logical manner.
