Social theorists focus on the everyday lives and experiences of people living in South Asia in this book composed of papers that clearly convey important facets of the history, diversity, and richness of the region's social-cultural life, as well as speak to theoretical questions and concerns viewed as vital by a range of contemporary scholars. This edition contains many updated versions of those from the original book, as well as new papers from scholars whose work focuses on the kinds of critical contemporary issues that have impacted the region and grabbed the media over recent years: young, middle-class workers in call centers, the impact on local gender systems of the massive out-migration of Sri Lankan housemaids to oil-producing Middle East, the force and flavor of new Hindu nationalisms, contemporary terrain of homosexualities and local "global gay" movements, "brain-

drain in reverse" of professionals to India, and the emergence of new middle-class lifeways amidst far reaching processes of cultural economic liberalization and globalization.

This book focuses on how to identify and nurture the entrepreneurial talents of the new generation. The author believes that in the new India, entrepreneurship is less about creating wealth and more about creating new organisations that generate upscale employment. *Unleashing Your Entrepreneurial Potential* highlights how to learn to compete with the best in the world. It builds on the premise that the excellent exposure that the average young Indian professional is already getting is heavily tilted towards the West. But the strongest competitive challenges are now coming from the East, which is ruthlessly capturing the Indian and the world markets. Hence to fight and win in the new world, youngsters in India have to learn and understand the mindset of the Japanese, the Koreans and the Chinese. This book aims to help them do just this: This book has a unique anecdotal style, and uses lucid language and narration in the first person singular to give the effect of engaging the reader in a chat. This guide on understanding the ways of modern business in India and abroad will be of great interest to: - Young professionals who want to do something on their own. - Children from business families eager to take their family business to a new level of growth. - Young entry level executives in the fast changing corporate world. It would also serve as a good supplementary read for graduate and post-graduate level in management, engineering, tourism and commerce institutions.
