This guidebook discusses cooperative learning at the middle school level and provides lesson plans that use cooperative learning techniques in various subject areas. Part 1 details three classroom organizational options and the elements of cooperative learning; examines the major types of cooperative learning; reviews the importance of developing the social skills needed in conjunction with cooperative learning; and provides suggestions for initiating cooperative learning in the classroom. Part 2 contains 52 lesson plans in art, mathematics, music, reading/language arts, science, and social studies, each of which was submitted by active middle school teachers. Each lesson plan includes a clear description of the subject to be taught and the expected learning outcome, a description of the lesson procedures, and the materials necessary to conduct the lesson, many of which are reproducible. A high school textbook presenting the fundamentals of geometry.

The theorems and principles of basic geometry are clearly presented in this workbook, along with examples and exercises for practice. All concepts are explained in an easy-to-understand fashion to help students grasp geometry and form a solid foundation for advanced learning in mathematics. Each page introduces a new concept, along with a puzzle or riddle which reveals a fun fact. Thought-provoking exercises encourage students to enjoy working the pages while gaining valuable practice in geometry.
