Homelessness is not hopeless. It is a serious social problem but a solvable one-if we, as a society, have the determination. This compact interdisciplinary handbook for scholars, professionals, and activists provides accessible background material as well as practical resources and many examples of programs to help the homeless. Anthropologist David Levinson, who began his research on homelessness in 1971 by living with bums in the Bowery in lower Manhattan, also edited the Encyclopedia of Homelessness.

Examines costs associated with the use of homeless and mainstream service delivery systems by families and individuals experiencing homelessness for the first time in six study communities. Assigning costs to public programs is a first step toward developing measures of the value of public interventions compared to the public costs incurred by ignoring or avoiding the problems those interventions are intended to address. The study finds that the experience of homelessness is diverse and the associated costs vary tremendously depending on the pattern of homelessness and family or individual status. It is not, however,

a study of either cost-effectiveness or quality of care, but rather a calculation of costs associated with homelessness. Illustrations.

Schools are facing increasing numbers of homeless students and school social workers and other related professionals are often at the front line of addressing the negative impact homelessness brings to individual students and the school overall. School social workers and other school-based personnel must contend with a myriad of policies and other factors related to homelessness to help students obtain an education. *School-based Practice with Children and Youth Experiencing Homelessness* is one of the first books to focus on this topic in the context of our social work practice. This book guides practitioners through the conceptualization of homelessness, how experiencing homelessness impacts the children we serve, the policies that govern us, and finally a practice perspective. Written with practitioners in mind, *School-based Practice with Children and Youth Experiencing Homelessness* is loaded with case studies and practice examples and is an accessible handbook to addressing homelessness in our schools. Schools and districts are seeing unprecedented numbers of students and families living without residential stability. Although the McKinney-Vento Act has been around for over two decades, many district- and site-level practitioners have a

difficult time interpreting and implementing the Act's mandates within their local contexts. This book provides much-needed guidance to help educational leaders support students who are homeless and highly mobile students who face significant barriers related to access and academic success. The authors employ several different strategies to help translate complex state and federal policies into effective practices. They include policy analysis, examples of successful approaches, tools for training staff, youth experiences, and address the role of school districts in serving marginalized students. *Serving Students Who Are Homeless* can be used as a professional development tool at the local and district level, and as a textbook in higher education settings that prepare entry-level and advanced-credential administrators, counselors, school psychologists, and curriculum leaders. **Book Features:** Guidance for understanding and implementing the law and tools for training staff. Case studies that include the voices of students, families, and practitioners. Questions and activities to facilitate professional development discussions. "I have worked in this realm for more than a decade and, sadly, the numbers of homeless families and children continue to rise. The information and strategies identified within the pages of this book will prove to be an invaluable resource to the work of counselors, school personnel, teachers, administrators, and advocates for homeless students."

Foreword by Nan Roman, President and CEO of the National Alliance to End Homelessness This book explains how to end the U.S. homelessness crisis by bringing together the best scholarship on the subject and sharing solutions that both local communities and national policy-makers can apply now In the Midst of Plenty shifts our understanding of the phenomenon of homelessness away from issues of individual disability and embeds it in larger contexts of poverty, income inequality, housing affordability, and social exclusion. Homelessness experts Shinn and Khadduri provide guidance on how to end homelessness for people who experience it and how to prevent so many people from reaching the point where they have no alternative to sleeping on the street or in emergency shelters. The book is organized around four questions: Who becomes homeless? Why do people become homeless? How do we end homelessness? How do we prevent it? Based on a comprehensive look at relevant research, the authors

show that we know how to end homelessness—if we devote the necessary resources to doing so. *In the Midst of Plenty: Homelessness and What to Do About It* is an excellent resource for professionals and decision-makers in the homeless services system, as well as for anyone who is interested in helping to end homelessness. It also can be used as a text in undergraduate or masters courses in public policy, sociology, psychology, social work, urban studies, or housing policy. “The knowledgeable and thoughtful authors of this book—two brilliant women who know as much as anyone in the country about the nature of homelessness and its solutions—have done a great service by taking us on a journey through the history of homelessness, how our responses have changed, and how we can end it.” Nan Roman, President and CEO National Alliance to End Homelessness. “Shinn and Khadduri’s new book is a thorough yet concise examination of what we know about the nature and causes of homelessness, and the crucial lessons learned. This critically important work provides a roadmap to restoring basic housing and income security as viable policy options, in the face of our daunting inequality divide that otherwise threatens millions with destitution and homelessness.” Dennis Culhane, Dana and Andrew Stone Professor of Social Policy, University of Pennsylvania “Marybeth Shinn and Jill Khadduri have combined their significant expertise to create an essential guide about the history

This title provides a one-stop resource for understanding the crisis of homelessness in the United States. It covers risk factors for homelessness, societal attitudes about the homeless, and public and private resources designed to prevent homelessness and help those in need. There are a number of questions to be answered when addressing the subject of homelessness in the United States. What are the primary causes of homelessness? What are the economic and socioeconomic factors that have an impact on homeless people? What demographic trends can be identified in homeless populations? This second of Momeni's two-volume series on homelessness in the United States addresses the problem of data collection and specific causes and issues that relate to homelessness. Unique in its attempt to bring systematic data and analysis to bear on the subject, the study focuses upon such critical areas as drug abuse among the homeless, the housing situation that gives rise to homelessness, homeless children, food sources, and problems of employment. The contributors also highlight the difficulties inherent in measuring the extent of homelessness accurately and provide a clearer picture of the homeless population in America by examining both the socioeconomic and demographic correlates and the social-psychiatric dimensions of homelessness.

This research project studied the broad subject of homelessness from a distinctive perspective. Homeless individuals have different needs, and different human services organizations offer many homeless service programs to individuals, from temporary shelter to transitional housing, and training and health programs among others. Nonetheless, the most important service needed for homeless individuals should be the one that leads to permanent housing solutions. However, findings from this research study suggested that not all homeless service programs are as effective in alleviating homelessness in the community, as most have been led to believe in the past. Therefore, the required question had to be, how effective are homeless service programs in alleviating homelessness in the City of Springfield MA? Finding an answer to that question was the primary reason for this research. This research study sought to know more about the effectiveness of two distinctive service programs, which although similar in services offered, both operate with completely different funding and visions on how to solve the homelessness problem in the community. Perhaps, this study may someday contribute to further research efforts on the subject, help develop or create more effective programs, or even helps alleviate the growing homeless problem in the community. Nevertheless, as for any other research

project, there are limitations to this study. This research is limited to the study of two different homeless service programs in the City of Springfield, Massachusetts. Moreover, program effectiveness was solely measured on the programs abilities to provide permanent housing options to its clients in direct relation to their resources for the purpose to alleviate the problem in the community. A brief roadmap for this master's thesis research project starts with the introduction to the subject, followed by the review of the existing relevant literature. The community assessment begins with the community description and the research and gathering of data from stakeholders directly and indirectly affected by the problem. Lastly, the action plan, which details a plan of action based on the conclusion of the findings of all the information and data gathered.
