Vocabulary is the foundation of successful language learning. ESL/EFL learners need to be familiar with a great many words if they want to read, write, listen, or speak with ease. In addition to the sheer number of words and phrases students need to learn, what makes vocabulary acquisition so tricky is that one "pass" is never enough. In order to really "know" a word, learners need to know, among other things, how to spell it, how to pronounce it, what other words it collocates with, what prefixes and suffixes it takes, what grammatical patterns it fits with, and what positive or negative associations it may have. Research shows that students learn the most easily when they are interested and having fun. Games and activities that engage students, whether they are adults or children, will help them create stronger memories and store these memories for longer. This book is divided into three sections: 1. Introducing new vocabulary 2. Reviewing and remembering vocabulary 3. Assessment opportunities and provides 50 ideas (plus one bonus tip!) for helping your students learn and remember vocabulary. Photos and downloadable worksheets are included. The Fifty Ways to Teach series gives you a variety of drills, games, techniques, methods, and ideas to help your students master English. Most of the ideas can be used for both beginning and advanced classes. Many require little to no preparation or special materials. The ideas can be used with any textbook, or without a textbook at all. These short, practical guides aim to make your teaching life easier, and your students' lives more rewarding and successful.

This book is about designing instruction that makes comprehension the priority in reading and in content area study. The comprehension model described responds to calls from literacy experts and professional organizations for inquiry-based instruction that prepares readers to be active meaning makers who are adept at both critical and creative thinking. Comprehension First introduces a before, during, after Comprehension Problem Solving (CPS) process that helps readers ask key questions so they arrive at a substantial comprehension product-"big ideas" based on themes and conclusions drawn from literary works and expository texts. The book further describes how to orchestrate research-based best practices to build lessons and units around big ideas and important questions. In this age of multiple literacies, all of us must learn to be more nimble users of Literacy 2.0 communication tools. Mastering problem solving is at the core of this challenge. Comprehension First embraces this challenge by inviting present and future teachers to examine WHY and HOW these tools can be used more purposefully to achieve the pre-eminent literacy goal of deep comprehension.
