

## How To Publish Articulate Files And Post To D2I

According to the theory of relativity, we are constantly bathed in gravitational radiation. When stars explode or collide, a portion of their mass becomes energy that disturbs the very fabric of the space-time continuum like ripples in a pond. But proving the existence of these waves has been difficult; the cosmic shudders are so weak that only the most sensitive instruments can be expected to observe them directly. Fifteen times during the last thirty years scientists have claimed to have detected gravitational waves, but so far none of those claims have survived the scrutiny of the scientific community. Gravity's Shadow chronicles the forty-year effort to detect gravitational waves, while exploring the meaning of scientific knowledge and the nature of expertise. Gravitational wave detection involves recording the collisions, explosions, and trembling of stars and black holes by evaluating the smallest changes ever measured. Because gravitational waves are so faint, their detection will come not in an exuberant moment of discovery but through a chain of inference; for forty years, scientists have debated whether there is anything to detect and whether it has yet been detected. Sociologist Harry Collins has been tracking the progress of this research since 1972, interviewing key scientists and delineating the social process of the science of gravitational waves. Engagingly written and authoritatively comprehensive, Gravity's Shadow explores the people, institutions, and government organizations involved in the detection of gravitational waves. This sociological history will prove essential not only to sociologists and historians of science but to scientists themselves.

Memories, both in individual and collective form, still have a significant impact on how people relate to political processes in Europe today. While much has been written about top-down attempts by states and political actors to mould people's memories of the past through public commemoration, textbooks or monuments, this volume takes a view from below by focusing on different types of societal actors and the ways in which they interact with the political world in order to influence collective memory. Presented within a comprehensive conceptual framework, the empirical cases focus on three countries of the former Soviet Union: Estonia, Latvia and Lithuania. They show that different or even antagonistic perceptions of the recent past not only appear between different ethnic groups, but also between socio-economic groups, different age groups or generations as well as between women and men. Moreover, they give an impressive account on the multiple ways in which these perceptions empower individuals and groups to seek greater influence in the construction of collective memory. The volume, therefore, not only provides a valuable and fresh perspective on the relationship between social memory and democratic politics, but also contributes to post-Communist regional studies in the enlarged European Union. This book was published as a special issue of the Journal of Baltic Studies. This volume explores how Gibraltar's Britishness was constructed over the course of the twentieth century. Today most Gibraltarians are fiercely proud of their Britishness, sometimes even describing themselves as 'more British than the British' and Gibraltar's Chief Minister in 2018 announced in a radio interview that "We see the world through British eyes." Yet well beyond the mid-twentieth century the inhabitants of the Rock were overwhelmingly Spanish speaking, had a high rate of intermarriage with

Spaniards, and had strong class links and shared interests with their neighbours across the border. At the same time, Gibraltarians had a very clear secondary status with respect to UK British people. By the beginning of the twenty-first century, however, Gibraltarians speak more English than Spanish (with increasing English monolingualism), have full British citizenship and are no longer discriminated against based on their ethnicity; they see themselves as profoundly different culturally to Spanish people across the border. *Bordering on Britishness* explores and interrogates these changes and examines in depth the evolving relationship Gibraltarians have with Britishness. It also reflects on the profound changes Gibraltar is likely to experience because of Brexit when its border with Spain becomes an external EU border and the relative political strengths of Spain and the UK shift accordingly. If Gibraltarian Britishness has evolved in the past it is certain to evolve in the future and this volume raises the question of how this might change if the UK's political and economic strength – especially with respect to Gibraltar – begins to wane.

This book is for intended for all those interested in working with Storyline to develop engaging e-learning projects. With a user-friendly interface, you don't need any prior experience with Storyline to create and publish your first project.

Many books recommend teaching and learning strategies based on current learning research and theory. However, few books offer illustrative examples of how to take these strategies and put them into action in the real world. The *Online Learning Idea Book* is filled with concrete examples of people who make learning more inspiring and engaging every day, in all kinds of settings, all over the world. In this second volume of *The Online Learning Idea Book* you will find brand new and valuable ideas that you can adopt or adapt in your own instructional materials, to make them more dynamic and more worthwhile for learners and learning. These ideas will let you peek over the shoulders of some of the world's most creative instructors, instructional designers and developers, trainers, media developers, and others in order to help spark creative ideas of your own. This hands-on resource will help you build online instructional materials or improve existing materials including online courses, modules, activities, or supplementary materials for classroom-based courses. This book provides great tips, techniques, and tricks in the following areas: The Design and Development Process, Supporting Learning, Synchronous and Interpersonal Activities, Asynchronous and Self-Paced Activities, and NS Better Media. Within these pages you will discover creative ways to give your online and blended instruction a boost by adopting and adapting great ideas from others.

Learn Articulate Storyline 360 fast with this step-by-step, project-based workbook! Articulate Storyline is one of the hottest eLearning development tools in the world. This hands-on, step-by-step workbook will teach you the essential Storyline skills necessary to create effective, interactive, and engaging eLearning courses. This hands-on book, which most people can finish in a few short days, contains tons of activities and supporting screenshots. There are even challenge exercises (Confidence Checks) that will put your new-found skills to the test. You'll learn how to create projects from scratch, how to work with slides, add scenes, add and format text, images, characters, and videos. There are lessons that will teach you how to add interactivity to slides via buttons, triggers, text entry areas, and hotspots. Learn about variables and how they allow you to create personalized eLearning.

Enhance the learner experience by recording, importing, and editing audio. Gauge the effectiveness of your eLearning by adding quizzes. Then you'll publish Storyline projects for the widest possible audience. This book features: All of the Articulate Storyline projects, images, audio files, videos, and other eLearning assets needed to get started (Just download the Storyline free 30-day trial software from the Articulate website and jump in!) Dozens of step-by-step, hands-on activities Confidence Checks to challenge your new skills Hundreds of supporting screenshots

This book provides one-on-one tutoring to help you quickly get up to speed with the basics while also learning how to best apply Storyline features in the context of the work you do. If you're an e-learning developer, writer, designer, subject matter expert, or all or any one of these, this book is for you.
