

Human Embryology Inderbir Singh Free Dekord

" The text of each chapter has been extensively revised and updated." Lucid explanation in simple language." Unnecessary details are avoided." Many new illustrations have been added and earlier ones have been improved and colored." Diagrams are easy to reproduce." The book is printed in full color and on better paper. Professor GP Pal (MBBS MS DSc FAMS FNASc FASc Bhatnagar Laureate) is an eminent teacher with more than three and a half decades of teaching experience. Currently, he is Professor and Head, Department of Anatomy at the Modern Dental College and Research Centre, Indore. Earlier, he had been Head, Department of Anatomy at MP Shah Medical College, Jamnagar. He has to his credit numerous publications in journal of international repute. Dr Pal is the co-author of Professor Inderbir Singh's Human Embryology , author of Textbook of Histology , Basics of Medical Genetics , Medical Genetics and Essentials of Medical Genetics for Dental Students .

Human Embryology JP Medical Ltd

Contents: Sting Journalism: Introduction, Forms and Features, Sting Journalism: Ethics, Methods and Hidden Cameras, Sting Operations: Current Perspective, Famous Investigative Journalists and Scandals, Sting Operations in Indian Perspectives.

Part A Includes Questions from May 2017 to 2013 with explanations. Year-wise approach with New Layout and Design. All Recent Questions updated up to May 2017. Extensively Revised and Colored Edition. Answers updated with the most recent editions of standard textbooks (Harrison's 19/e, Bailey & Love's 26/e, CMDT 2017, Robbin's 9/e, Park's 24/e, Ganong's 24/e, Harper's 30/e, Maheshwari's 5/e). Includes more than 500 Diagrams and Illustrations and all diagrams are completely redrawn for more effective understanding and learning. Part B 2012 Questions with Explanations. 2011–2008 Questions and Answers. More papers are added from Previous Year's exams. Extensively Revised and Colored Edition. Answers updated with the most recent editions of standard textbooks (Harrison's 19/e, Bailey & Love's 26/e, CMDT 2015, Robbin's 9/e, Park's 23/e, Ganong's 24/e, Harper's 30/e, Maheshwari's 5/e). Includes more than 100 Diagrams and Illustrations and all diagrams are completely redrawn for more effective understanding and learning.

Fully revised, new edition presenting undergraduates with latest information in human histology. Includes colour atlas of more than 80 slides, histological plates and a new section on light microbiology. Previous edition published in 2014.

This book offers unsurpassed depictions of the human body in clear, brilliant detail, all from a clinician's perspective. With its emphasis on anatomic relationships and clinically relevant views, this work provides a coherent, lasting visual vocabulary for understanding anatomy and how it applies to medicine today.

??

This new edition has been fully revised to provide undergraduate medical students with the latest information on human embryology. Beginning with an introduction to the topic, the following chapters guide students step by step through the complete process of human development. Presented in an easy to read format, the tenth edition includes numerous images and illustrations and a 'Timetable of Events' at the end of each chapter summarises the developmental processes described in that section. The accompanying CD ROM reiterates the key learning points in the book. Key points Fully revised, new edition presenting latest information on human embryology 'Timetable of Events' in each chapter summarises developmental processes Includes CD highlighting key learning points Previous edition published in 2012

Osteology is the study of the structure and function of the skeleton and bony structures. This new edition is a comprehensive guide to human osteology for postgraduate medical students. Beginning with an introduction to the skeletal system, the following chapters cover bones in different anatomical regions – upper and lower limb, sternum and ribs, vertebral column, head and neck, and skull. Chapters are followed by numerous images illustrating muscle attachments. The fourth edition has been fully revised to provide students with the latest information in the field. Highly illustrated with nearly 500 clinical photographs and diagrams, the book also includes questions and answers to help students prepare for examinations. Key points Fully revised, new edition providing latest information in field of osteology Covers bones and muscle attachments in each anatomical region Highly illustrated with clinical photographs and diagrams Previous edition (9788184483000) published in 2008

The new edition of this well-known text brings undergraduates fully up to date with the latest information on human embryology. Beginning with an overview of genetics, the female reproductive system, fertilisation, and early development of the embryo, the following sections each examine the development of a different embryonic system. The genetic and molecular aspects of each system are presented in tabular format and clinical correlations are highlighted in separate boxes to enhance learning. The eleventh edition features new chapters on genetics and molecular biology, the skeletal and muscular system, clinical applications, and embryology ready reckoner. The text is highly illustrated with clinical photographs and tables and each chapter includes case scenarios and review questions for self-assessment. Key points Fully revised, new edition presenting undergraduates with the latest information on human embryology Eleventh edition includes several new chapters Features case scenarios and review questions for self-assessment Previous edition (9789351521181) published in 2014

This new edition is a comprehensive guide to the anatomy of the nervous system, for undergraduate medical students. Beginning with a general introduction to neuroanatomy, the following chapters each cover a different section, from the spinal cord, brainstem and cranial nerves, to the limbic system, autonomous nervous system, and much more. Each chapter features key learning objectives, clinical anatomy, and short notes, as well as multiple choice questions for self-assessment. Anatomical aspects of neurological conditions are illustrated in colour boxes and clinical cases have been added to each topic. The text is highly illustrated with clinical images including high resolution brain specimen photographs. Key points Fully revised, new edition providing undergraduates with a comprehensive guide to neuroanatomy Each chapter includes multiple choice questions for self-assessment Features high resolution brain specimen photographs Previous edition (9789350905296) published in 2014

A guide to help you obtain less of what don't want, and more of what you do, and "cut through the clutter, achieve better results in less time, build momentum toward your goal, dial down the stress, overcome that overwhelmed feeling, stay on track, [and] master what matters to you.

This book is a practical guide to the field of genetics for undergraduate medical students. Beginning with a general overview, the following sections guide students through topics such as chromosomes, DNA structure, inheritance patterns, and metabolism, to cancer genetics, gene therapy and stem cell therapy. The text is enhanced by flow charts and illustrations and most sections feature questions to assist understanding and revision. The book concludes with ten annexures covering exam-related topics such as DNA fingerprinting, twins, immunogenetics, cloning, and more. A free poster summarising key facts of clinical genetics is

provided with the book. Key points Practical guide to genetics for undergraduate medical students Each chapter features questions to assist revision Ten annexures cover exam-related topics Includes free poster summarising key facts of clinical genetics

Vol. 5 includes a separately paged special issue, dated June 1926.
