Business organizations the world over are increasingly recognizing the potential of their human resources. Strategic human resource management emerged out of the parent discipline of human resource management with the aim of optimizing organization objectives. It emphasizes the strategic importance of formulating HR objectives, strategies, and policies with a view to developing the skills and abilities for the achievement of competitive advantage. This book provides a comprehensive, contemporary, and critical review of the key issues in strategic human resource management in India. The focus is on the reality of "people management" in large, global companies. Establishing the effectiveness of strategic HRM with respect to organizational performance, the authors examine recent research as also provide case studies of companies operating in the country.

This text is an important addition to the ongoing discourse on strategic management, particularly, strategic human resource management. It is a result of research carried out in the agricultural sector, in general, and on multinational tea firms, in particular. The

author's hands-on and conceptual insights gained through nineteen years of experience across African countries make the text a useful tool for company boards of directors and strategic level managers charged with the formulation and implementation of business and human resource strategies. In addition, it provides justification to HR managers of the need to shift focus from primarily being concerned with routine transactional HR activities to dealing with transformational ones, which are contingent on the circumstances of the organization. Scholars, management consultants and management students will also find the contents of this book to be of great interest and benefit. It is now sufficiently recognised that management has to be concerned with deliverables, rather than abstractions. Therefore, many firms formulate and implement one form of business strategy or the other. However, strategies cannot be conceived, let alone realised, without human resource input. The question that HR continues to grapple with, therefore, is how it can demonstrate the contribution of each employee to the bottom line and business sustainability. How this question is to be answered has not always been explained and is even more crucial for the agricultural firms which are characterized by great instability in terms of weather patterns, commodity prices, currency exchange rates and wage levels. HR planning, in these circumstances, cannot be a simple exercise, but getting it right is more important than for organizations in more predictable environments. This book moves away from the romanticization of the role of HRM in such organizations, and instead provides empirical evidence of the types of business and human resource strategies employed, strategic integration between these strategies and the strategic human resource management processes and practices used. Finally, it considers the concomitant synergies achieved by strategic fit between business and human resource strategies and their role in achieving sustainable competitive advantage.

For undergraduate/graduate courses in Human Resource Management. This best-selling survey of contemporary human resource management offers a balance of practical and applied material as well as underlying Human Resource Management theory. It reflects the latest information, including the impact of global competition and rapid technological advances that have accelerated trends such as shared service centers, outsourcing, and just-in-time training. A wealth of actual company examples demonstrates how concepts are being used in today's leading-edge organizations. From the mid-1980s to the turn of the 1990s the international HR field was considered to be in its infancy. There continues to be both an evolution of territory covered by the field – a series of successively evolving cultural, geographical and institutional challenges faced by the multinational corporation (MNC) – as well as more critical questioning whether this has created an expanded or a fragmented field. This book brings together the latest research on important “issues-driven” concerns that the field of IHRM now has to face, absorb, interpret then reanalyse through international lenses. This volume gives attention to those aspects of MNC behaviour – choices about location, how they organize local subsidiaries, choices made about technology, capital and labour, and choices made about investments and strategies – that are subject to institutional influences. It also gives voice to a number of contemporary issues – reverse knowledge flows, skill supply strategies, employer branding, e-enablement, outsourcing, global networks – that now need to be accommodated within the field. Broadens the IHRM field to cover comparative and institutional perspectives Provides a multi-level analysis of globalization phenomena at the individual, organization, and macro level Focuses on the current problems and issues driving the attention of IHRM Directors
