The barista drew an imprint of a rose in the foam in the cup of espresso, but no one would notice it. The customer would drink it without ever taking a moment to admire his masterpiece. Nothing ever changed. Each cup he brewed wounded his spirit. But the course of the Lebanese youth's life changes forever when he meets a Spanish nomad named Raphael, who tells him about the Great Guru in Rishikesh, India. "I have to remind you, there is no guarantee that the Great Guru will see us," Raphael warned. "In my brief meditation, I heard the song, and now I seek the choir," Matias said. "I have to try." As we follow Matias' journey from an ambitious youth to a seeker of truth, we learn life lessons along with him and call out our innocence from its hiding place in our hearts.

Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The I-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined from hundreds of sources. James Flammang values each model according to the popular 1-6

grading system invented by Old Cars magazine.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs. Every century is marked by a few men and women whose efforts influence a nation, and even the world. In Korea, Chung Ju-yung is among such people. He shaped the destiny of his country by founding Hyundai Motor Company, and his legacy continues today through the spirit of this global company. In 2004, Hyundai ranked second on the J. D. Power and Associates Initial Quality Survey, and continues to be recognized in this and other top automotive rankings. Today, Hyundai has come to embody the spirit of "modern premium," by emphasizing the values of being simple, creative, and caring in its conception. Hyundai celebrates this legacy of imagination and innovation with images that evoke the strength, elegance, and speed of Hyundai's cars. For lovers of speed and design, Hyundai is the ultimate addition to any collection.

This book offers a mid-career retrospective of the work of Diana Thater, one of the most important and innovative artists working today. For more than two decades, Diana Thater has been creating groundbreaking installations that build upon the basic visual language of film and video by integrating architecture, applied color, and artificial and natural light. Depicting a range of natural phenomena, her work is largely organized around an exploration of the subjectivity of animals. This lavishly illustrated overview shows how Thater has radically re-envisioned both the ways in which film and video are deployed in siterelated installations and the relationship between subject and object. Luminous images of eighteen projects such as China, Abyss of Light, knots + surfaces, and gorillagorillagorilla are accompanied by quotes and fictional writings that have long served as Thater's touchstones. Also included are an interview with the artist and essays on a wide range of topics that Thater addresses in her work--from the history and politics of the Chernobyl disaster to beauty and Baroque architecture. This publication also gives readers exclusive access to a moving image supplement, featuring a film conceived and created by Thater in collaboration with production designer Patti Podesta, as well as an illustrated checklist with short video clips.

Homogeneous charge compression ignition (HCCI)/controlled auto-ignition (CAI) has emerged as one of the most promising engine technologies with the potential to combine fuel efficiency and improved emissions performance, offering reduced nitrous oxides and particulate matter alongside efficiency comparable with modern diesel engines. Despite the considerable advantages, its operational range is rather limited and controlling the combustion (timing of ignition and rate of energy release) is still an area of on-going research. Commercial applications are, however, close to reality. HCCI and CAI engines for the automotive industry presents the state-of-the-art in research and development on an international basis, as a one-stop reference work. The background to the development of HCCI / CAI engine technology is described. Basic principles, the technologies and their potential applications, strengths and weaknesses, as well as likely future trends and sources of further information are reviewed in the areas of gasoline HCCI / CAI engines; diesel HCCI engines; HCCI / CAI engines with

alternative fuels; and advanced modelling and experimental techniques. The book provides an invaluable source of information for scientific researchers, R&D engineers and managers in the automotive engineering industry worldwide. American business folklore is awash with the adventures of successful entrepreneurs. Still, most of these stories are about Americans, neglecting important and courageous entrepreneurs from other countries. Made in Korea recounts the story of how Chung Ju Yung rose from poverty to build one of the world's largest and most successful building empires - Hyundai - through a combination of creative thinking, tenacity, timing, political skills, and a business strategy that few competitors ever understood. Chung entered the shipbuilding business with no experience and went on to create the world's largest shipyard. He began making automobiles when foreign experts unanimously predicted he would fail, and he started a global construction company that has built some of today's greatest architectural wonders. He even convinced the International Olympic Committee to select South Korea over Japan as the site for the highly successful 1988 Olympics. Unlike most CEO's of major firms, Chung has always preferred the company of his workers to that of the global executive elite. Hard work, creativity and a capacity to never give up - this is the essence of Chung's life. In each of his ventures, he exhibited a sheer determination to succeed, regardless of the obstacles, and he worked tirelessly to instil this drive in all of his employees. Even today, in the midst of Korea's worst economic crisis in over four decades, Chung's company is busy implementing plans to emerge as an even stronger contender in the world economy. Illustrated with 32 pages of colour photographs not previously seen in the West, including photos of Chung's recent historic visit to North Korea in 1998, Made in Korea takes stock of Chung's entire life, highlighting both his contributions to society and the lessons his work can teach to aspiring entrepreneurs.
