Peters defines media expansively as elements that compose the human world. Drawing from ideas implicit in media philosophy, Peters argues that media are more than carriers of messages: they are the very infrastructures combining nature and culture that allow human life to thrive. Through an encyclopedic array of examples from the oceans to the skies, *The Marvelous Clouds* reveals the long prehistory of so-called new media. Digital media, Peters argues, are an extension of early practices tied to the establishment of civilization such as mastering fire, building calendars, reading the stars, creating language, and establishing religions. New media do not take us into uncharted waters, but rather confront us with the deepest and oldest questions of society and ecology: how to manage the relations people have with themselves, others, and the natural world.

Tom Zaniello's fascinating new guide to films about globalization—its origins, its relationship with colonialism, neocolonialism, the growth of migratory labor, and movements to counter or protest its adverse effects—offers readers and viewers the opportunity to both discover new films and see well-known works in a new way. From *Afro@Digital* to *Zoolander*, Zaniello discusses 201 films, including features such as *The Constant Gardener*, *Dirty Pretty Things*, and *Syriana*; documentaries and other nonfiction films such as *Blue Vinyl*, *Darwin's Nightmare*, and *Wal-Mart: The High Cost of Low Price*; online films; and television productions. Zaniello casts a wide net to provide cinematic representations of globalization from all angles: -films about global labor and labor unions affected by globalization; -films about global capital and multinational corporations; -films about the transnational organizations (WB, IMF, WTO) most closely identified with globalization and global capital; -films about labor history and the daily life of working-class people as they relate to the development of globalization; -films about the environment directly related to changes in labor or capital; and -films about changes in both the

workplace and the corporate office in the era of multinational corporations. Each entry in *The Cinema of Globalization* offers a summary of the main issues in the film and their relationship to globalization, sometimes a reference to the film's place in a director's work or tradition of cinema, and an often-opinionated assessment of the film's strengths and weaknesses. Like the best film guides, this book is an addictive reading experience full of ideas for future viewing. At the same time, it serves as an inviting and accessible introduction to a difficult topic—the central themes and aspects of globalization. The heroine's journey echoes throughout ancient legend. Each young woman combats her dark side and emerges stronger. This quest is also a staple of

American comic books. Wonder Woman with semi-divine powers gives us a new female-centered creation story. Batgirl, Batwoman and Black Widow discover their enemy is the dark mother or shadow twin, with the savagery they've rejected in themselves. Supergirl similarly struggles but keeps harmony with her sister. From Jessica Jones and Catwoman to the new superwomen of cutting-edge webcomics, each heroine must go into the dark, to become not a warrior but a savior. Women like Captain Marvel and Storm sacrifice all to join the ranks of superheroes, while their feminine powers and dazzling costumes reflect the most ancient tales.

The must-have guide to pop culture, history, and world-changing ideas that started in New York City, from the magazine at the center of it all. Since its founding in 1624, New York City has been a place that creates things. What began as a trading post for beaver pelts soon transformed into a hub of technological, social, and cultural innovation—but beyond fostering literal inventions like the elevator (inside Cooper Union in 1853), Q-tips (by Polish immigrant Leo Gerstenzang in 1923), General Tso's chicken (reimagined for American tastes in the 1970s by one of its Hunanese creators), the singles bar (1965 on the Upper East Side), and Scrabble (1931 in Jackson Heights), the city has given birth to or perfected idioms, forms, and ways of thinking that have changed the world, from Abstract Expressionism to Broadway, baseball to hip-hop, news blogs to neoconservatism to the concept of “downtown.” Those creations and more are all collected in *The Encyclopedia of New York*, an A-to-Z compendium of unexpected origin stories, hidden histories, and useful guides to the greatest city in the world, compiled by the editors of *New York Magazine* (a city invention itself, since 1968) and featuring contributions from Rebecca Traister, Jerry Saltz, Frank Rich, Jonathan Chait, Rhonda

Garelick, Kathryn VanArendonk, Christopher Bonanos, and more. Here you will find something fascinating and uniquely New York on every page: a history of the city's skyline, accompanied by a tour guide's list of the best things about every observation deck; the development of positive thinking and punk music; appreciations of seltzer and alternate-side-of-the-street parking; the oddest object to be found at Ripley's Believe It or Not!; musical theater next to muckracking and mugging; and the unbelievable revelation that English muffins were created on...West Twentieth Street. Whether you are a lifelong resident, a curious newcomer, or an armchair traveler, this is the guidebook you'll need, straight from the people who know New York best.

It takes a trans-regional approach unlike most research which has been focused on studying specific initiatives or experiences in a particular country.

What do tent cities, basketball courts, slave ships, and Facebook have in common? They are spaces of American culture where an idea of 'Americanness' emerges through a concrete form of contact on the one hand and through its mediated representation on the other. This collection of essays examines these contact spaces - and their myriad and complex

configurations of culture - along a spatial axis, highlighting the interconnectedness of the local and the global in concrete spaces of American culture, both inside and outside the US, and from the world wide web. One line of inquiry studies metaphors of contact, the other one reads media texts as contact spaces and investigates the role of mediation. (Series: American Studies in Austria - Vol. 12)

When to Talk and When to Fight is a conversation between talkers and fighters. It introduces a new language to enable negotiators and activists to argue and collaborate across different schools of thought and action. Weaving beautiful storytelling and clear analysis, this book maps the habits of change-makers, explaining why some groups choose dialogue and negotiation while others practice confrontation and resistance. Why do some groups seemingly always take an antagonistic approach, challenging authority and in some cases trying to tear down our systems and institutions? Why are other groups reluctant to raise their voices or take a stand, limiting themselves to conciliatory strategies? And why do some of us ask only the first question, while others ask only the second? Threaded among examples of conflict, struggle, and change in organizations, communities, and society is the compelling personal story that led Subar to her community of practice at Dragonfly, advising leaders in social justice organizations on organizational and advocacy strategy. With lucid charts and graphs by Rosi Greenberg, When to Talk and When to Fight is a brilliant new way of talking about how we change the world. In his foreword, Douglas Stone, coauthor of the international best-seller *Difficult Conversations*, makes the case that negotiators need this language. In a separate forward, Esteban Kelly, cofounder of AORTA Anti-Oppression Resource and Training Alliance, explains why radicals and progressives need it. If you are a change-maker, you will soon find

yourself speaking this language. Be one of the first to learn it. Read this book.
