An investigation into the various ways in which Renaissance writers comment on, present, and defend their own works, and at the same time themselves in Britain, France, Italy, Spain, Poland, and the Dutch Republic.

Questa non è precisamente la classica autobiografia di un maestro, ma la precisa volontà di Mimmo Rotella di annotare su pagina (lui che pure era conosciuto per un'incredibile memoria) pochi anni di una vita che per un po' gli è sembrata scorrere troppo in fretta: dalla metà degli anni Sessanta (quando già è riconosciuto tra i grandi del Nouveau Réalisme) alle ultime pagine scritte a Milano durante la preparazione del festival organizzato in occasione del decimo anniversario del Nouveau Réalisme (novembre 1970).

Eroticism in Early Modern Music contributes to a small but significant literature on music, sexuality, and sex in sixteenth- and seventeenth-century Europe. Its chapters have grown from a long dialogue between a group of scholars, who employ a variety of different approaches to the repertoire: musical and visual analysis; archival and cultural history; gender studies; philology; and performance. By confronting musical, literary, and visual sources with historically situated analyses, the book shows how erotic life and sensibilities were encoded in musical works. *Eroticism in Early Modern Music* will be of value to scholars and students of early modern European history and culture, and more widely to a readership interested in the history of eroticism and sexuality. This Italian reference grammar provides students, teachers and others interested in the Italian language with a comprehensive, accessible and jargon-free guide

to the forms and structure of Italian. Whatever their level of knowledge of the language, learners of Italian will find this book indispensable: it gives clear and detailed explanations of everything from the most elementary facts such as the relation between spelling and pronunciation, or the forms of the article, to more advanced points such as the various nuances of the subjunctive. Formal or archaic discourse is distinguished from informal, everyday usage, and regionalisms are also indicated where appropriate. The authors have taken care to make it an easy and illuminating reference tool: extensive cross-referencing enables readers to quickly find the information they require, and also stimulates them to discover new, related facts.

This book commemorates the 150th birthday of Corrado Segre, one of the founders of the Italian School of Algebraic Geometry and a crucial figure in the history of Algebraic Geometry. It is the outcome of a conference held in Turin, Italy. One of the book's most unique features is the inclusion of a previously unpublished manuscript by Corrado Segre, together with a scientific commentary. Representing a prelude to Segre's seminal 1894 contribution on the theory of algebraic curves, this manuscript and other important archival sources included in the essays shed new light on the eminent role he played at the international level. Including both survey articles and original research papers, the book is divided into three parts: section one focuses on the implications of Segre's work in a historic light, while section two presents new results in his field, namely Algebraic Geometry. The third part features Segre's

unpublished notebook: Sulla Geometria Sugli Enti Algebrici Semplicemente Infiniti (1890-1891). This volume will appeal to scholars in the History of Mathematics, as well as to researchers in the current subfields of Algebraic Geometry.

Critical interest in biography and autobiography has never been higher. However, while life-writing flourishes in the UK, in Italy it is a less prominent genre. The twelve essays collected here are written against this backdrop,

and address issues in biographical and autobiographical writing in Italy from the later nineteenth century to the present, with a particular emphasis on the interplay between individual lives and life-writing and the wider social and political history of Italy. The majority of essays focus on well-known writers (D'Annunzio, Svevo, Bontempelli, Montale, Levi, Calvino, Eco and Fallaci), and their varying anxieties about autobiographical writing in their work. This picture is rounded out by a series of studies of similar themes in lesser known figures: the critic Enrico Nencioni, the Welsh-Italian painter Llewellyn Lloyd and Italian writers and journalists covering the Spanish Civil War. The contributors, all specialists in their fields, are Antonella Braidà, Charles Burdett, Jane Everson, John Gatt Rutter, Robert Gordon, Gwyn Griffith, Peter Hainsworth, Martin McLaughlin, Gianni Oliva, Giuliana Pieri, and Jon Usher. The volume is dedicated to John Woodhouse, on his seventieth birthday, and concludes with a bibliography of his writings.

Human bodies have been represented and defined in various ways across different cultures and historical periods. As an object of interpretation and site of social interaction, the body has throughout history attracted more attention than perhaps any other element of human experience. The essays in this volume explore the manifestations of the body in Italian society from the fourteenth through the seventeenth centuries. Adopting a variety of interdisciplinary approaches, these fresh and thought-provoking essays offer original perspectives on corporeality as understood in the early modern literature,

What was the appeal and the tropes of national-patriotic discourse in nineteenth-century Italy? How did Romanticism intersect with nationalist politics? Why did a young man or woman become a patriot, join a nationalist movement and, if necessary, fight and die for the cause? By addressing these and other questions, the innovative essays of this collection provide fresh and topical perspectives on a central period in modern Italian history. Beside confronting the narrative of 'Risorgimento', its gendered tropes, and the actual experiences of men and women, the authors approach neglected areas of investigation on the Risorgimento - from the relationship between religion and the nation to the connections with the issue of empire and the aspirations of other peoples in the Mediterranean region.

The development of art theory over the course of the Renaissance and Baroque eras is reflected in major stylistic shifts. In order to elucidate the relationship between theory and practice, we must consider the wider connections between art theory, poetic theory, natural philosophy, and related epistemological matrices. Investigating the interdisciplinary reality of framing art-making and interpretation, this treatment rejects the dominant synchronic approach to history and historiography and seeks to present anew a narrative that ties together various formal approaches, focusing on stylistic transformation in particular artist's oeuvres – Michelangelo, Annibale Carracci, Guercino, Guido Reni, Poussin, and others

– and the contemporary environments that facilitated them. Through the dual understanding of the art-theoretical concept of the Idea, an evolution will be revealed that illustrates the embittered battles over style and the overarching intellectual shifts in the period between art production and conceptualization based on Aristotelian and Platonic notions of creativity, beauty and the goal of art as an exercise in encapsulating the “divine” truth of nature.
