Tracing the treatment of language in international business as represented in the Journal of International Business Studies, this seminal collection critically explores the conceptualizations of language that have been adopted or ignored by international business scholars over the years and showcases nine articles that have played an important role in establishing and advancing the field. In today's increasingly globalized context of business, significantly richer theories from interdisciplinary perspectives are needed to explain the complexity of the interplay between multiple facets of language and how they affect day-to-day operations. With insights from linguistics, psychology and organizational theory, Language in International Business provides an assessment of scholarly efforts to uncover the profound impact that language has on global business today and proposes some important ways in which this nascent field of language in international business may be further advanced. This important and original book places the case study in international business research in its historical context, critically evaluates current case study practices in the field and proposes a more pluralistic future for case research within international business and international management research. While the case study is the most popular qualitative research strategy in the field, only a narrow selection of possible approaches is currently used. IB and IM researchers typically rely on a case study approach that could be characterized as 'qualitative positivism'. The editors and contributors look beyond this disciplinary convention and encourage greater pluralism in IB and IM case research. Their key argument is that increased awareness of prevailing disciplinary conventions - and their limitations - increases the potential for methodological innovation and versatility in case research. The contributions provide critical, novel and innovative perspectives on the case study in IB and IM research. The book offers inspiration to case authors and an authoritative methodological reference for those publishing and reviewing case research. It will also be highly regarded by postgraduate and doctoral students in IB and IM as well as both qualitative and quantitative researchers in the field.
