"The history of Foreign Language Teaching in India arrived at a point of transformation with the liberalization of Indian politics and economics since 1991. Although the Indians had experienced the learning of English as a foreign language due to their colonial past, the need to learn other European/Romance/Germanic languages has intensified with the growing linkage of India with the developed and developing countries in the post-Cold War era. In response to this intensified need for learning foreign languages, many new foreign programs of study/curricula have been introduced in Indian schools (especially those with international curriculum). The central objective of this book is to shed light on the specific challenges of teaching Spanish language through foreign curricula in India. The book performs a qualitative study not only to investigate the problems of teaching Spanish

language but also to design suggestive measures to resolve these pedagogical problems."

The International Baccalaureate (IB) is a respected qualification gaining increasing currency around the world, and which has been adopted by a wide variety of schools, both public and private. In the UK, growing dissatisfaction with the A-level system has led to an intense debate about alternative qualifications, and in many schools IB courses have been introduced alongside conventional A-level courses. This practical introduction to the IB takes a balanced look at the pros and cons and features a wealth of advice from those actually involved in teaching and implementing it in schools. Providing comparative material on how IB courses differ from A-levels and a subject-by-subject account of best practice in teaching the IB, this book offers a rich source of practical advice for teachers, school leaders or managers involved in teaching or implementing the IB programmes.
