

Ics Bridge Procedures Guide

This book is one of the most comprehensive guides to international maritime law from the Russian perspective. It consists of three relatively independent sections: Russian Maritime Law, International Public Maritime Law, and International Private Maritime Law. First section discusses the development of the maritime law as a branch of the Russian law. It examines concepts and sources of the Russian federal laws, secondary legislation and customs, including the influences guiding the future of Russian law of the sea. . The second section examines International Public Maritime Law including the principles, sources, subjects, as well legal status of the vessel, including the vessel's state flag, her name, state registration, the problem of "flags of convenience", vessel's documents, the crew, and the master. This section further details the current international legal regime of maritime spaces, provisions concerning legal protection of marine environments, ensuring navigation safety, international legal regulation of the work of seamen, international inter-governmental marine organizations, and settlement of international public marine disputes. The third section is devoted to International Private Maritime Law and discusses its principles and sources, conflict-of-law rules, structure and types, and the main choice-of-law principles used today in international private maritime law. This section also discusses the following institutions and sub-branches within international private maritime law including: carriage of cargoes and passengers by sea, general average, salvage, collisions of vessels, marine insurance, limitation of liability, inter

This book provides a set of model solutions for the year 2006. It is mainly aimed at students preparing for their certificate of competency in the UK. However, it will be a useful tool when preparing for examinations of this kind anywhere in the world.

Acclaimed as the standard reference work on the law relating to time charters, this new edition provides a comprehensive treatment of the subject, accessible and useful both to shipping lawyers and to shipowners, charterers, P&I Clubs and other insurers. It provides full coverage of both English and U.S. law, now updated with all the important decisions since the previous edition. The English decisions covered in the new edition include: The Kos (the Supreme Court on the effect of withdrawing a ship with cargo on board); The Athena (nature of off-hire; meaning of 'loss of time'/'time thereby lost'); The Kyla (damage to ship and frustration); The Silver Constellation, The Savina Caylyn and The Rowan (oil company approval of chartered ships); The Captain Stefanos, The Saldanha, The Triton Lark and The Paiwan Wisdom (effects of piracy); The Kildare and The Wren (damages for early termination); The T S Singapore (off-hire where ship going 'towards but not to' the port ordered), and The Lehmann Timber, The Bulk Chile and The Western Moscow (owners' liens) The new edition also features many significant new U.S. decisions, including: Stolt-Nielsen v. Animal Feeds Intl. (Supreme Court rules class-action arbitration not permitted unless parties agree in arbitration agreement); ATHOS I (Circuit Court finds that safe berth provision in charterparty is a warranty and not merely a due diligence obligation); The M/V SAMHO DREAM (arbitrators direct petitioner to post \$14.2M security on respondent's counterclaim) and Maroc Fruit Board v. M/V VINSON (CP arbitration clause incorporated in bill of lading not "signed" or "contained in an exchange of letters or telegrams" under NY Convention).

This book provides a set of model solutions for the year 2009. It is mainly aimed at students preparing for their certificate of competency in the UK. However, it will be a useful tool when preparing for examinations of this kind anywhere in the world.

This book discusses the latest advances in the research and development, design, operation, and analysis of transportation systems and their corresponding infrastructures. It presents both theories and case studies on road and rail, aviation, and maritime transportation. Further, it covers a wealth of topics, from accident analysis, intelligent vehicle control, and human-error and safety issues to next-generation transportation systems, model-based design methods, simulation and training techniques, and many more. Special emphasis is placed on smart technologies and automation in transport, as well as the user-centered, ergonomic, and sustainable design of transportation systems. The book, which is based on the AHFE 2020 Virtual Conference on Human Aspects of Transportation, held on July 16–20, 2020, mainly addresses the needs of transportation system designers, industrial designers, human–computer interaction researchers, civil and control engineers, as well as vehicle system engineers. Moreover, it represents a timely source of information for transportation policy-makers and social scientists whose work involves traffic safety, management, and sustainability issues in transport.

This Handbook builds on recent attempts to understand new and evolving patterns of global governance by identifying, describing, and analysing more than 80 of the most significant actors in the regulation and administration of contemporary transnational economic affairs.

The importance of international maritime labour law - both as a component of - ternational maritime law, and in socio-political and economic terms - has been recognised by the IMO International Maritime Law Institute for a number of years. Indeed, the Institute has annually organised a course on maritime labour law with the participation of inter alia the International Maritime Organization, the - ternational Labour Organization, the International Transport Workers' Federation, and the German Shipowners' Association. It was therefore a great pleasure when the authors invited me to introduce their forthcoming monograph on Maritime Work Law Fundamentals: Responsible S- powners Reliable Seafarers. As the title suggests, a fundamental challenge of this branch of international maritime law is to achieve a balance between the interests of the two main stakeholders.
