

Immunohematology For Medical Laboratory Technicians

Celebrating a vast readership among clinical laboratory personnel for over two decades, *Medical Laboratory Technology*, in its revised, enlarged and updated edition, brings together all relevant medical laboratory technologies—new and existing ones—in three volumes. Particularly tailored to the needs of laboratories with limited facilities in developing countries, the book:

- Describes all tests in a step-by-step manner with guidelines to avoid errors and hazards
- Details the care and use of laboratory equipment and preparation of reagents
- Highlights the clinical significance of laboratory findings
- Provides diagrams for easy comprehension
- Introduces methods and procedures for producing reliable laboratory findings

Volume I: Introduction, Haematology and Coagulation, Immunohaematology (or Blood Banking)
Volume II: Microbiology, Serology, Clinical Pathology
Volume III: Clinical Biochemistry, Histology and Cytology, Miscellaneous Information

This book serves as an invaluable reference for students as well as practicing professionals in medical diagnostic laboratories.

This thorough, hands-on resource provides detailed instructions for all of the basic procedures used in

File Type PDF Immunohematology For Medical Laboratory Technicians

the blood bank, including manual cell washing, typing, screening, and cross-matching. 150 illus. Completely updated in a new edition this valuable review book prepares a wide range of laboratory professionals for certification examinations by presenting them with the latest technology and terminology, as well as current test taking formats. Its large number of practice questions, variety of practice modes, and explanations for clarification prepare learner for success on examinations. Comprehensive coverage of laboratory medicine includes clinical chemistry, hematology, hemostasis, immunology, immunohematology, microbiology, uranalysis and body fluids, molecular diagnostics, laboratory calculations, general laboratory principles and safety, laboratory management, education, and computers and laboratory informatics. For clinical laboratory directors, pathologists specializing in laboratory medicine, resident and attending physicians, hematologists, chemists, immunohematologists, microbiologists, biosafety officers, nurse practitioners, physician assistants, and infection control practitioners.

Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries.

Master practical phlebotomy skills with Phlebotomy: Worktext and Procedures Manual, 5th Edition!

Known for its storyboard format of procedures and

File Type PDF Immunohematology For Medical Laboratory Technicians

beautiful illustrations, this hands-on worktext describes all aspects of phlebotomy — with focused and current coverage of lab tests, equipment, safety and collection procedures, emergency situations, special populations, and point-of-care testing. Procedures, outlined with step-by-step instructions and full-color photos, cover core competencies; and a detachable bookmark with color tube guide acts as a handy clinical reference. Learning features focus on clinical scenarios, practice tips, and error prevention and are supplemented by videos and certification exam preparation. Right-sized coverage of the full spectrum of phlebotomy practice. Step-by-step illustrated procedures on essential phlebotomy competencies and techniques. Exam preparation questions in each chapter and three mock certification exams help with classroom and board test review. Clinical scenarios and tips focus on application and real-world workplace challenges and solutions. Removable bookmark for handy clinical reference to tube color-coding. OSHA icons in procedures highlight safe and effective practice. Key terms and acronyms listed at the beginning of each chapter, highlighted in text, and defined in a back-of-book glossary. Additional online resources — animations, procedure videos, interactive exercises, and an audio glossary. NEW! Expanded and updated content on new laboratory tests, emergency procedures, job duties, safety, quality assurance,

File Type PDF Immunohematology For Medical Laboratory Technicians

and more. NEW! Animations focusing on anatomy and physiology help ensure comprehension of foundational content.

Immigration Practice guides readers through all aspects of immigration law in one volume, complete with over 3,000 footnote citations to the wide range of statutes, regulations, court and administrative cases, policy memos, operations instructions, agency interpretive letters, and internet sites that a lawyer needs for complete understanding of a particular problem. No other source merges the practical with commentary and analysis so helpfully. The book explains in understandable language and meaningful and dependable detail the substantive issues and the practical procedures a lawyer needs to handle a specific immigration matter, complete with checklists of forms, supporting evidence, and other strategies needed for application/petition packages. The book has unparalleled coherence, integration and consistency. * Liberally cross references to other sections in the book where related topics are discussed (because so many topics are interrelated). * Line-by-line instructions on how to complete the most commonly used forms to avoid embarrassing mistakes. * Lists the contents of packages to file with government agencies: forms and fees, detailed support letters, and other supporting evidence. * Explanations of potentially applicable visa options organized according to the attributes of the foreign national (and the employer), rather than classifications in alphabetical order, so that practitioners can make sense of options in light of the client in the office. * Comparisons and charts of attributes and procedures of such topics as nonimmigrant visa classifications, procedures to permanent residence, and standards of "extreme" hardship. * Citations throughout the book, and collection in the extensive CD-ROM Appendix, to

File Type PDF Immunohematology For Medical Laboratory Technicians

primary source materials and the most useful Internet site URLs with explanation of the increasingly helpful free databases and tools available through each one. • Internet Links: Constantly increased and updated links to government web sites containing current contact information, forms, primary law sources of all types, case status information, and processing and substantive guides--all referenced by pinpoint citations in the text. See Chapter 5 explaining sources of law, Appendix C and D-1 showing web links, and the CD-ROM in the back cover providing one-click access! Readers are strongly encouraged to review and use the CD-ROM and to consider saving Appendix C, D-1, and E-1 into their hard drives or saving the links to their internet browser "favorites" or "bookmarks" for ready reference all the time. • Upgraded removal-related treatment: significant improvements to Chapters 10, 11, and 16 by attorney who has worked for immigration courts several years. • Supreme Court decisions: effects of limited marijuana distribution offense as aggravated felony (§ 10-6(b)(1)(vi)); tax offenses as aggravated felonies (§ 10-6(b)(1)(vi)); rejection of "comparable grounds rule" for 212(c) eligibility (§ 10-6(b)(1)(vii)); modified categorical approach applies only to divisible statutes (§ 10-6(b)(2)(i)); non-retroactivity of Padilla decision (§ 10-6(b)(2)(vi)); rejection of the "statutory counterpart rule" for § 212(c) waivers (§ 11-5(f)); invalidation of the Defense of Marriage Act § 14-7(a)(2)(i)); non-imputation to child of firm resettlement of parents (§ 16-4(c)). • Lower federal court decisions: concerning such issues as: recognizing a beneficiary to have standing to challenge a USCIS petition denial (§ 2-2(a)(1)(I)); reviewability of good moral character determinations and other (§ 2-2(a)(1)(I)); court order of USCIS to speed up FOIA certain responses (§ 4-2); CBP FOIA process (§ 4-2); DOL case disclosure data (§ 4-5); need to exhaust remedies under DHS TRIP to challenge inclusion on watch list (§ 10-3); CIMT

crime determinations (§ 10-6(b)(1)(iii)); effect of a single firearm sale (§ 10-6(b)(1)(vi)); 212(h) waiver eligibility in regard to post-entry adjustment but not as to stand alone request (§ 10-6(b)(3)); interference with police helicopter using laser light as CIMT (§ 10-6(c)); whether post-entry adjustment is an admission for § 212(h) waivers (§ 10-6(b)(3)); whether there is an involuntariness or duress exception to the terrorism support bar (§ 10-6(c)); enforcement of I-864 financial support obligations (§ 10-6(d)(2)); mandatory bond hearing after six months of detention (§ 11-3(f)); ICE detainers found to lack authority (§ 11-3(g)); representation in immigration court at government expense for aliens with serious mental disabilities (§ 11-4(g)); stop-time and petty offense exceptions relating to cancellation of removal (§ 11-5(f)); revelation of the BIA's erroneous reliance for decades on nonexistent provisions of Mexican Constitution affecting legitimation issues (§ 12-3(d)(3)); rejection of BIA's rule against nunc pro tunc adoption orders (§ 14-7(b)(3)); invalidation of FSBPT efforts to restrict applicants from certain countries to sit for physical therapy exams (§ 15-2(c)(2)); use of impeachment evidence only to terminate asylum (16-2(b)); asylum claims of German homeschoolers, and mixed motive cases (§ 16-4(a)(3)); social group asylum claims (§ 16-4(a)(3)); expansive implications of inconsistencies in testimony (§ 16-4(a)(4)); "particularly serious crimes" barring asylum claims (§ 16-4(c)); special asylum procedures for unaccompanied children (§ 16-4(c)); adjustment eligibility of alien who entered without inspection and then obtained TPS (§ 16-7(a)(6)); eligibility of after-acquired spouse under Cuban Adjustment Act (§ 16-7(e)); preempted state law provisions aimed at aliens, employers, and landlords (§ 19-4(l)(3)). • BIA decisions on such issues as: what constitutes a drug trafficking crime (§ 10-6(b)(1)(iv)); implications of child pornography conviction (§ 10-6(b)(1)(vi));

File Type PDF Immunohematology For Medical Laboratory Technicians

possession of ammunition by a convicted felon (§ 10-6(b)(1)(vi)); availability of "stand-alone" § 212(h) waiver without adjustment application (§ 10-6(b)(3)); service of NTA on a minor (§ 11-3(b)); service of NTA and other safeguards for aliens with serious mental conditions (§ 11-4(g)); approval of administrative closure of removal cases (§ 11-5(d)); termination of asylum, then removal and relief in proceedings (§16-2(b)); relocation issues in asylum claims (§ 16-4(a)(3)). • Regulations, government policy memorandums, other decisions, and government web site enhancements concerning such matters as: differing government renderings of single name for certain persons (§ 1-6(a)(3)); USCIS refusal to accept stamped signatures for attorneys on G-28 (§1-6(a)(3)); USCIS use of bar codes for forms, and danger of making marginal notes on forms (§1-6(a)(3)); USCIS use of customer-completed "e-Request Service" inquiries (§ 2-2(a)(1)(F)); movement of all visa processing to the electronic CEAC system (§ 2-3(a)); replacement of the CBP Inspectors Field Manual with the Officer's Reference Tool and the beginning effort to replace the USCIS Adjudicators Field Manual with the online Policy Manual (§ 5-4); replacement of the paper I-94 card for air and sea entries with an "automated" online I-94 record (§ 7-4(b) and other sections); new section on "Other Redress for Adverse Results (on visas and admissions, § 7-4(c)(14)); the radical implications of Matter of Arrabally and Yerrabally concerning the effects of departure under advance parole (§§ 8-7(d)(2)(i) and 10-6(f)); modernization of the immigrant visa process (§ 8-8); new "Provisional Unlawful Presence Waivers" within the U.S. using Form I-601A (§ 10-6(f)); exception to false claim to U.S. citizenship inadmissibility if claim made before individual was age 18 (§ 10-6(g)); EOIR Online representative registration system (§ 11-3(e)); ICE Parental Interests Directive and ICE "eBOND" online bonding process (§ 11-3(f)); ICE non-

File Type PDF Immunohematology For Medical Laboratory Technicians

renewal of 287(f) agreements (§ 11-3(g)); Deferred Action for Childhood Arrivals (§ 11-3(h)(3)); ICE recognition and implementation of statute allowing post-removal challenges (§11-8(b)); new USCIS Policy Manual provisions on naturalization eligibility and process, including residence, selective service, § 319(b) special rules, and other issues, and new N-400 form and instructions (Chapter 12); Government-side implementation of the Supreme Court's recognition of same-sex marriage (various chapters); exceptional circumstances allowing foreign-country filing of I-130 petitions where no USCIS office is located (§ 14-5(a)); implications of a withdrawn I-140 (§ 15-1(h)); various policy developments concerning EB-5 investors (§ 15-2(f)); numerous BALCA cases and DOL positions affecting the PERM labor certification process and the publication of data about applications (§ 15-3); updated Affirmative Asylum Procedures Manual (§ 16-3(a)); USCIS memo on "exceptional circumstances" for failure to appear at asylum interview (§ 16-3(a)(1)(iii)); litigation settlement agreements to share asylum officer interview notes in FOIA (§ 16-3(a)(2)), concerning asylum applicant work authorization process and "Clock" (§ 16-3(c)), and failure to appear at I-730 interview (§ 16-3(f)); bundling of related L-1 petitions (§ 17-3(b)(4)(i)); presumed L-1 visa validity for maximum reciprocity duration but sometimes more limited stays from CBP (§ 17-3(b)(7)); filing I-129 petition for Canadian TN, and duration of Mexican TN separate from visa validity (§ 17-4(c)(2)(ii)); H-1B and H-2A flip-flopping administrative and congressional positions (§ 17-4(d) and 17-5(e)(1)); "B-1 in lieu of H" in effect but "under review" (§ 18-3(1)(2)(B)); accreditation requirements for F-1 language training programs (§ 18-4(d)(1)); cessation of CBP stamping of I-20 forms (§ 18-4(d)(3)); use of electronic ELIS system for certain changes of status (§ 18-4(d)(4)); new "cap gap" and STEM OPT extension policies

File Type PDF Immunohematology For Medical Laboratory Technicians

(§ 18-4(d)(9)(iii); possible need for separate waivers for different J experiences subject to § 212(e) (§ 18-5(b)(2)(ix)); revisions to M-274 Handbook for Employers for I-9, USCIS "I-9 Central" web site, and IRS tightening of ITIN application process (§ 19-4(b)); ICE policies about auditing electronically generated I-9 forms (§ 19-4(h)); OCAHO reductions of ICE I-9 fines on employers (§ 19-4(j)); ICE definition of "technical and procedural" errors subject to correction under good faith rules (§ 19-4(j)); USCIS revision of E-Verify MOU and new notice to workers about TNC resolution, expansion of E-Verify "photo tool," and "lock out" of suspect SSNs from E-Verify (§ 19-4(l)(1)).

A fun, fast, carry-anywhere review for the Medical Laboratory Technician certification exam LANGE Medical Laboratory Science Flashcards for Examination and Certification Review is the perfect way for students to prepare for the MLT exam and become certified medical laboratory technicians. The set includes 300 two-sided cards that cover all seven of the major disciplines included on the exam (general lab practice, hematology, immunology/serology, immunohematology, clinical chemistry, body fluids, clinical microbiology, and management and education) . The subject matter of the cards is weighted to duplicate their importance on the actual examination. The cards ask students questions and also provide them with high-yield information essential for exam success. Cards are tabbed by discipline Includes online learning center with additional questions and timing mechanism

Clear and accessible, this text addresses the fundamental knowledge and skills you need to work in a blood-banking laboratory. It integrates basic theory genetics, immunology, and immunohematology then adds practical, problem-solving exercises. Clinical scenarios and critical thinking exercises help you apply basic concepts to modern transfusion and

File Type PDF Immunohematology For Medical Laboratory Technicians

blood-bank settings. Experienced authors offer a practical "in the trenches" view of life in the laboratory. A clinical application focus relates concepts to practice and offers examples of using theoretical information in the laboratory setting. Coverage of quality control assurance and regulatory issues includes the "whys" in both reagents and equipment. An entire chapter is devoted to basic genetics and immunology coverage. Blood group systems are described in easy-to-follow, student-friendly terms. Illustrations and tables help you understand critical information. A two-color design brightens the text and makes it more reader-friendly. Chapter outlines, review questions, learning objectives, and key terms are included in each chapter, highlighting and reinforcing important material. Critical Thinking exercises ask you to draw conclusions based on a case study. Chapter summaries include a paragraph, table, or box of the essential information. NEW information reflects changes in the field, including: Different types of DNA testing and uses Automation impact and issues Latest donor criteria from the AABB and the FDA Hepatitis C and HIV NAT testing West Nile testing Bacterial contamination statistics and prevention Bone marrow transplant blood use Peripheral stem cell collection Cord blood collection and use More case studies, examples, and flow charts in the Antibody Detection and Identification chapter help to illustrate principles and practices. Margin Notes are added throughout to reinforce key terms and procedures. More review questions are added for thorough and efficient self-assessment. Expanded Evolve resources include web links, ArchieMD animations, and additional study questions

-- Covers the major divisions of the medical technology (clinical laboratory science) certification examinations: hematology; immunology; immunochemistry; microbiology; clinical chemistry; body fluids; and education and

File Type PDF Immunohematology For Medical Laboratory Technicians

management-- Problem-solving section for each chapter-- A study guide for use during and after training-- Includes over 1,500 multiple-choice questions that allow the student to identify strengths, weaknesses, and gaps in knowledge base-- 50 color plates -- twice as many as the 1st edition!-- Provides rationales for both correct and incorrect answers; correct answer and rationale appear on the same page as the question; and each question is followed by a test item classification-- Final examination to test retention-- A disk with a computerized mock certification examination with color images-- New section on laboratory mathematics

This book is a compilation of useful calculations used in transfusion medicine. Students who may benefit from this book include Medical Laboratory Technicians (MLTs), Medical Laboratory Scientists (MLS), Specialists in Blood Banking (SBB), and Transfusion Medicine Fellows. When students are taking courses in blood banking or immunohematology often times calculations are presented as part of a chapter and soon forgotten after the examination. This book will serve to concentrate useful calculations in a stand alone book using a plethora of examples and questions in realistic transfusion medicine scenarios. Each chapter has an introduction describing the application of the calculation. Examples and formulas are presented in Numbered Boxes to highlight the material, and questions are presented at the end of each chapter. Technologists working in the blood bank may also find this book beneficial.

You **always** have more work options than you imagine -- easy surfing across 7700+ of the most common job titles nationwide; includes key information like approximate wages and typical education, links to national profiles and groups of jobs where required skills & knowledge are equivalent. Sources: Bureau of Labor Statistics, US Department of Labor and Oregon Employment Department (all national data, not

File Type PDF Immunohematology For Medical Laboratory Technicians

limited to Oregon).

This book will enable the production of reliable, accurate, reproducible (best possible care) results that satisfies the customer's requirements obtained from an accredited, process oriented, health and safety conscious laboratory that is cost effectively run (value for money) by qualified, certified and highly motivated biomedical staff (Joy and pride at work) using well maintained, validated and quality controlled equipments and appropriately stored reagents on the right sample drawn from the right patient that is appropriately communicated in a timely fashion to the requesting clinician to enable them render the best possible evidenced- based medical care to their patients.

The Second Edition offers a concise review of all areas of clinical lab science, including the standard areas, such as hematology, chemistry, hemostasis, immunohematology, clinical microbiology, parasitology, urinalysis and more, as well as lab management, lab government regulations, and quality assurance. A companion website offers 35 case studies, an image bank of color images, and a quiz bank with 500 questions in certification format.

This is the first book of its type meant for medical laboratory technology students, covering all theoretical and practical aspects related to pathology. It is written in a simple manner so that the student can grasp the subject and can recall it easily while writing exams. Wherever required, flowcharts, colour diagrams, and photomicrographs have been introduced in each section. Technical aspects in relation to laboratory medicine have been dealt with accurately. Covered in 84 chapters, the book provides concise information on each topic, especially from examination point of view. The book covers: - Practical and technical aspects of the hematology laboratory, including stains, bone marrow examinations, and coagulation profiles. - Histological

File Type PDF Immunohematology For Medical Laboratory Technicians

techniques, including routine stains, special stains, tissue processing, and fixatives. - Histopathology and cytopathology, including automation, specimen management, and electron microscopy. - Laboratory management, including quality control, job analysis, record keeping, and inventories. - Clinical pathology, including fluid, urine and semen analysis. - Transfusion medicine and immunohematology, including blood grouping, crossmatching, and plasmapheresis.

Celebrating a vast readership among clinical laboratory personnel for over two decades, Medical Laboratory Technology, in its revised, enlarged and updated edition, brings together all relevant medical laboratory technologies new and existing ones in three volumes. Particularly tailored to the needs of laboratories with limited facilities in developing countries, the book:

- Describes all tests in a step-by-step manner with guidelines to avoid errors and hazards
- Details the care and use of laboratory equipments and preparation of reagents
- Highlights the clinical significance of laboratory findings
- Provides diagrams for easy comprehension
- Introduces methods and procedures for producing reliable laboratory findings

Contents:

- Introduces methods and procedures for producing reliable laboratory findings
- Vol. I: Introduction, Hematology and Coagulation, Immunohaematology (or Blood Banking)
- Introduces methods and procedures for producing reliable laboratory findings
- Vol. II: Microbiology, Serology, Clinical Pathology
- Introduces methods and procedures for producing reliable laboratory findings
- Vol. III: Clinical Biochemistry, Histology and Cytology, Miscellaneous Information
- Introduces methods and procedures for producing reliable laboratory findings

This book serves as an invaluable reference for students as well as practicing professionals in medical diagnostic laboratories. Covering more than 5,000 educational programs in more

File Type PDF Immunohematology For Medical Laboratory Technicians

than 40 different health care professions, this reference provides in-depth information on educational programs, curricula, prerequisites, and standards. It also includes each profession's historical development, job outlook, and work environment. It is an indispensable resource for anyone who requires up-to-date, reliable health care career information.

Here is a concise presentation of the essential knowledge and skills readers need to perform blood banking effectively. Coverage addresses blood group systems, compatibility testing, quality assurance, antiglobulin testing, blood donor selection, collection, processing and more. A second-color highlight, case studies, real-life clinical scenarios, learning objectives, review questions, and a glossary make the material come alive for readers. Coverage addresses ABO, Rh, and other group systems, hemolytic diseases of the newborn, compatibility testing, quality assurance, antiglobulin testing, blood donor selection, collection, and processing, transfusion practice, complications, and reactions, and other essential blood banking topics. Basic immunohematologic procedures are described at the end of appropriate chapters. Review questions at the end of each chapter, as well as an additional 150-question practice examination, allow readers to build their mastery of the material. Answers are provided for all questions. Case studies prepare readers for the real-life challenges that they will face in this field. Solutions explain how to deal with each situation, organize one's work effectively, and interpret test results correctly. Boxes present more in-depth information to complement

File Type PDF Immunohematology For Medical Laboratory Technicians

the core content. Over 80 2-color illustrations keep the material visually appealing and enable readers to more readily grasp complex concepts and principles.

IMMUNOHEMATOLOGY FOR MEDICAL

LABORATORY TECHNICIANS is a text appropriate for all levels of laboratory science programs. Each chapter is structured to provide detailed technical information interspersed with critical thinking activities, web activities, case studies, sample procedures, and review questions.

Students will have the opportunity to complement readings with activities that match his/her learning style.

Basic concepts are covered in the early chapters and application in later chapters. Concepts of

Immunohematology are comprehensively prepared, along with some review of appropriate support topics, such as immunology, components of blood, and anticoagulants. Clinical applications and problem solving are incorporated in the text as appropriate. Important

Immunohematology for Medical Laboratory

Technicians Cengage Learning

With an illustrated, storyboard format for procedures,

Phlebotomy: Worktext and Procedures Manual, 4th

Edition describes all aspects of phlebotomy, with current coverage of equipment, safety procedures, arterial blood gases, point-of-care testing, and practical phlebotomy

skills. Procedures cover core functions and are outlined with step-by-step instructions and new full-color photos.

Clinical scenarios, practice tips, and new Avoid That

File Type PDF Immunohematology For Medical Laboratory Technicians

Error features keep the focus on application and practice. Written by phlebotomy expert Robin Warekois, this practical worktext also includes competency checklists, a mock certification exam, a detachable bookmark that can serve as a tube guide, and a new video collection on the Evolve companion website. A detailed, storyboard format outlines common procedures, with steps accompanied by new full-color photos. Study and certification exam preparation questions in each chapter help you review and remember the material. A mock certification exam in the appendix mirrors the format of the actual phlebotomy certification exam, allowing you to review for the exam with 150 multiple-choice questions. Competency Checklists at the end of the book summarize the most critical and important steps in phlebotomy procedures. Clinical scenarios and tips encourage you apply your knowledge to real-life challenges in the workplace. Student resources on an Evolve companion website include a pre-test, animations, a new procedural video collection, interactive exercises, a mock certification exam, and an audio glossary. An anatomy and physiology section offers illustrated, in-depth information on body systems. A perforated bookmark on the back cover serves as a quick, portable reminder of which stopper tops to use for various diagnostic tests. Flashbacks and Flashforwards provide a cross reference to related information in previous or upcoming chapters. NEW video collection on the Evolve companion website demonstrates how critical procedures are performed. NEW photos have been added, in addition to new content on professionalism and

File Type PDF Immunohematology For Medical Laboratory Technicians

HIPAA, equipment, and technology. NEW! Avoid That Error scenarios help you develop critical thinking skills and provide helpful tips on resolving problematic situations.

With more than 8,000 nonmedical words, phrases, and acronyms related to the healthcare industry, Slee's Health Care Terms covers finance and reimbursement, managed care, government regulation, health professionals, legal issues, and more. Now in its fifth edition, Slee's is a reference for anyone who deals with the healthcare industry.

A valuable review for a wide range of laboratory professionals, this book prepares candidates for certification examinations by presenting them with the latest technology and terminology, as well as current test taking formats. Its large number of practice questions, variety of practice modes, and explanations for clarification prepare learner for success on examinations. Comprehensive coverage of laboratory medicine includes clinical chemistry, hematology, hemostasis, immunology, immunohematology, microbiology, urinalysis and body fluids, molecular diagnostics, laboratory calculations, general laboratory principles and safety, laboratory management, education, and computers and laboratory informatics.
