When considering the structures that drive the global diffusion of human rights norms, Brian Greenhill argues that we need to look beyond institutions that are explicitly committed to human rights and instead focus on the dense web of international government organizations (IGOs)-some big, some small; some focused on human rights; some not-that has arisen in the last two generations. While most of these organizations have no direct connection to human rights issues, their participation in broader IGO networks has important implications for the human rights practices of their member states. Featuring a rigorous empirical analysis, *Transmitting Rights* shows that countries tend to adopt similar human rights practices to those of their IGO partners, whether for better or worse. Greenhill argues that IGOs constitute a tightly-woven fabric of ties between states and that this network provides an important channel through which states can influence the behavior of others. Indeed, his analysis suggests that a policy of isolating "rogue" states is probably self-defeating given that this will reduce their exposure to some of the more positive IGO-based influences on their human rights. Greenhill's analysis of the role of IGOs in rights diffusion will not only increase our understanding of the international politics of human rights; it will also reshape how we think about the role of international institutions in world politics.

This volume reports on a conference held by the World Bank's independent Operations Evaluation Department (OED) to discuss the Bank's role in global program partnerships. The starting point for the discussions was a comprehensive review by OED of the effectiveness of 26 of the largest programs, including the Consultative Group on International Agricultural Research and programs in health, environment, and trade. Participants at the conference provided crosscutting lessons about program design, implementation, and evaluation, and shared views about how the Bank can best help build commitment and assure financing for high priority global public goods that benefit the poor.

International Organizations and the Idea of Autonomy is an exploratory text looking at the idea of intergovernmental organizations as autonomous international actors. In the context of concerns over the accountability of powerful international actors exercising increasing levels of legal and political authority, in areas as diverse as education, health,

financial markets and international security, the book comes at a crucial time. Including contributions from leading scholars in the fields of international law, politics and governance, it addresses themes of institutional autonomy in international law and governance from a range of theoretical and subject-specific contexts. The collection looks internally at aspects of the institutional law of international organizations and the workings of specific regimes and institutions, as well as externally at the proliferation of autonomous organizations in the international legal order as a whole. Although primarily a legal text, the book takes a broad, thematic and inter-disciplinary approach. In this respect, *International Organizations and the Idea of Autonomy* offers an excellent resource for both practitioners and students undertaking courses of advanced study in international law, the law of international organizations, global governance, as well as aspects of international relations and organization.

In the tradition of the Policy Studies Review Annual series, Volume Eight continues to offer the best of recent writing and analysis in a number of policy relevant area. Indeed, reflecting the shifting nature of policy debates and public attention, Volume Eight has introduced seven entirely new substantive areas, including such sensitive issues as the viability of the "safety net," information policy, work and labor policy, immigration policy, and environmental policy. The volume is also characterized by explicit attention to two critical aspects of the policy analysis craft--the strengths and weaknesses of various methodological approaches and the role noneconomic factors should play in economic policy analysis. Drawing from such public sector administrators as William Ruckelshaus and Eleanor Chelimsky, academic policy analysts such as Martin Feldstein and Irving Louis Horowitz, and two congressional support agencies (CBO and GAO), the volume provides the most timely and relevant assessments of current policy issues. It also provides the reader with a framework within which to approach substantive areas as widely disparate as national security and health care. The volume is an indispensable tool for those who seek to sort through the confusions and contradictions of present policy statements in order to gain a cogent view of how these and other issues are framed and what viable policy options are available. , Contents (partial): METHODS FOR POLICY ANALYSIS--S. In a profound recollection Miranda\* remembers her earthly mission. Under the guidance of Spirit and extra-terrestrials Miranda\* undergoes years of training, in multiple dimensions and the synchronistic realm. With spiritual initiations as well as trials and suffering, Miranda\* evolves, rapidly integrating lessons learned in other lifetimes, and developing the paranormal abilities needed for the monumental role she is to play as she fulfills her destiny. On a trip to Peru in 2001 she finds an ancient engraved stone, and when she unravels its message, it unveils a Truth so astonishing that she guards it in secret. Revealing the written prophecy too soon may unleash the greatest religious and political revolution in the history of mankind. Tuning in to the collective consciousness, Miranda\* has waited to come forward until humanity was not only ready for this momentous message, but eagerly awaiting it. With the Mayan Calendar ending in 2012, that time is now. After "The Secret" which quickly spread around the world, this book is "The Revelation". After an introductory part on current qualitative and quantitative sources, this comprehensive collection of state-of-the-art essays is comprised of four main thematic parts: Part II examines actors other than governments, such as transnational religious actors, business representatives and experts, and also parliamentarians and agencies set up by IGOs. Part III studies the perceptions and understandings in political philosophy, international law and international relations theory. It questions concepts used (civil society, NGO, governance) and covers the limitations to be kept in mind. Part IV analyses the nature and impact of non-state actors. Chapters discuss processes within international bureaucracies (diplomacy, dynamism, bureaucratic power, contribution to democracy) and the quintessence of deliberation and decision making within NGOs and IGOs and of implementation, accountability and dispute settlement. Part V studies specific worlds of non-state actors: humanitarian aid, human rights, security, the North-South divide, health, trade and environment. Accessible and articulately written, *The Ashgate Research Companion to Non-State Actors* is aimed at a wide readership of scholars and practitioners in international relations.

The writer of such influential songs as "Pancho and Lefty," "To Live's to Fly," "If I Needed You," and "For the Sake of the Song," Townes Van Zandt exerted an influence on at least two generations of Texas musicians that belies his relatively brief, deeply troubled life. Indeed, Van Zandt has influenced millions worldwide in the years since his death, and his impact is growing rapidly. Respected singer/songwriter John Gorka speaks for many when he says, "'Pancho and Lefty' changed—it unchained—my idea of what a song could be." In this tightly woven, intelligently written book, Brian T. Atkinson interviews both well-known musicians and up-and-coming artists to reveal, in the performers' own words, how their creative careers have been shaped by the life and work of Townes Van Zandt. Kris Kristofferson, Guy Clark, Billy Joe Shaver, Rodney Crowell, Lucinda Williams, and Lyle Lovett are just a few of the established musicians who share their impressions of the breathtakingly beautiful tunes and lyrics he created, along with their humorous, poignant, painful, and indelible memories of witnessing Van Zandt's rise and fall. Atkinson balances the reminiscences of seasoned veterans with the observations of relative newcomers to the international music scene, such as Jim James (My Morning Jacket), Josh Ritter, and Scott Avett (the Avett Brothers), presenting a nuanced view of Van Zandt's singular body of work, his reckless lifestyle, and his long-lasting influence. Forewords by "Cowboy" Jack Clement and longtime Van Zandt manager and friend Harold F. Eggers Jr. open the book, and each chapter begins with an introduction in which Atkinson provides context and background, linking each interviewee to Van Zandt's legacy. Historians, students, and fans of all music from country and folk to rock and grunge will find new insights and recall familiar pleasures as they read I'll Be Here in the Morning: The Songwriting Legacy of Townes Van Zandt.

Exploitation filmmakers played a significant role in revolutionizing American cinema during the 1960s and early 1970s, churning out a string of independent Westerns, biker films, nudie-cuties and horror flicks in record times and often on shoestring budgets. With titles like Horror of the Blood Monsters, Cycle Savages and The Incredible 2-Headed Transplant, these films pushed the boundaries of acceptable on-screen violence and nudity and kept the American theater industry afloat as several major studios teetered on the brink of financial collapse. This work tells the story of that "other" Hollywood through interviews with 16 directors, performers, screenwriters, and stuntmen who helped bring these zero-budget films to the screen against incredible odds. The interviews give insights into exploitation filmmaking from the perspectives of pioneering directors Al Adamson and Jack Hill, actors Jenifer Bishop and Robert Dix, and stuntmen Gary Kent and Gary Littlejohn, and others. The work includes more than 50 photographs, including many rare behind-the-scenes images of the filmmakers on set.

While most studies focus on states as principals and international bureaucrats as agents, [the author] demonstrates that many international bureaucrats have mastered the art of insulating themselves from state control.

International collaboration has become increasingly important in carrying out research activities. This book, written by a large group of scholars from Europe and Latin America, maps, analyses and discusses research collaboration between the two continents during the last twenty years. The empirical material underlines the richness and the variety of the links that bind the two continents, well beyond the simplified views of science, either as the brainchild of global networking or as a result of dependence. The book also develops an innovative methodological approach, combining bibliometric analysis, social surveying, in-depth interviews, and a careful analysis of research programmes and policies. While arguing that the asymmetry of relations that once existed in cooperation has turned into a more equal partnership between the two continents, it deciphers some of the reasons behind this more balanced cooperation. It also challenges the view of science as a global self-organising system through collective action at the level of researchers themselves. On the contrary, the importance of policy, institutions, and previously developed research is highlighted and recognised

Usan is a Papuan language. In this monograph on the grammatical structures of Usan and their function the author shows the unique features of this language: how speakers can exploit certain principles for communicative purposes, how the language reflects their physical environment. Uniqueness can only be shown in the context of communality with other languages. This monograph offers numerous occasions to observe similarities and differences between Usan and other language, those that can be called Papuan in particular.
