Conscious of the fact that our Constitution was the product of socio-economic forces operating at the time of its enactment, the founding fathers bestowed upon the Parliament the powers under the article 368 of the Constitution to amend it with a view to bringing it in tune with the changing needs and aspirations of the people. Since we adopted the Constitution in 1950, this amending process has been working like a safety valve and has helped in reconciling with the requisites for peace and progress. This publication is a well-documented study on the nature, scope and operation of amending process of the Constitution of India. It contains a brief legislative history and a synopsis of each of the Constitution Amendment Act enacted till August 1994. A brief legislative history of the amending Bills which were either lapsed or withdrawn or removed or negatived after their introduction also forms part of the study. The texts of these Acts and Bills have been reproduced in full in the annexures give statements showing the provisions of the Constitution amended by various Amendment Acts and the number of the Constitution Amendment Bills, as introduced vis-a-vis the number of the Constitution Amendment Acts as passed and

status of Bills if removed, lapsed, withdrawn or negated. It is hoped that the study would be useful not only for Parliamentarians but for all those interested in constitutional studies.

The Indian Constitution is one of the world's longest and most important political texts. Its birth, over six decades ago, signalled the arrival of the first major post-colonial constitution and the world's largest and arguably most daring democratic experiment. Apart from greater domestic focus on the Constitution and the institutional role of the Supreme Court within India's democratic framework, recent years have also witnessed enormous comparative interest in India's constitutional experiment. The Oxford Handbook of the Indian

Courts, Codes, and Custom addresses the question of why some states recognize and comply with international human rights and environmental law, while others do not. To address this question, Dana Zartner has developed a novel cultural-institutional theory to explain the manner in which a state's domestic legal tradition shapes policy through the process of internalization. A state's legal tradition - the cultural and institutional factors that shape attitudes about the law, appropriate standards of behavior, and the legal process - is the key mechanism by which international law becomes recognized, accepted, and internalized in the domestic legal framework. Legal tradition shapes not only perceptions about law, but also provides the lens through which policy-makers view state interests, directly and indirectly influencing state policy. The book disaggregates the concept of legal tradition and examines how the individual cultural and institutional characteristics present within a state's domestic legal tradition facilitate or hinder the internalization of international law and, subsequently, shape state policy. In turn it explains both the differences in international law recognition across legal traditions, as well as the variance among states within legal traditions. To test this theory Zartner compares case studies within five of the main legal traditions in the world today: common law (U.S. and Australia), civil law (Germany and

Turkey), Islamic law (Egypt and Saudi Arabia), mixed traditions (India and Kenya), and East Asian law (China and Japan). She addresses the differences among legal traditions as well as between states within the same tradition; the important role that legal culture and history play in shaping contemporary attitudes about law; and similarities and differences in state policy towards human rights law versus environmental law.
