In recent years trade and investment in Myanmar have soared, buoyed by ongoing efforts to liberalise the economy and a successful political transition in November 2015 that saw the National League for Democracy become the country's first civilian-led government elected to power in modern history. Political reforms have brought significant economic benefits, as the US government moved to lift burdensome sanctions that had weighed on investor sentiment and trade growth. With the administration now moving to implement a host of domestic reforms, loosen internal trade restrictions and draft a new investment law, growth is expected to resume apace following a slowdown during the election year.

The Arab world's second-largest economy, and its largest population, Egypt has endured more than three years of political and economic turbulence which have slowed its performance, but its long-term fundamentals remain strong. Egypt has been through a turbulent time, but still manages to churn out headline growth higher than the Eurozone. Still, an economy that was growing at a rate of 7% has given way to a more modest GDP expansion of 2.2% in the 2011/12 fiscal year, following the ousting of Mubarak, while foreign direct investment fell by two-thirds over the same period. The figures are likely to remain subdued in the near term but there have been some improvements in cyclical performance, particularly with the country's capital markets, as 2012 saw Egypt's exchange grow by 51% year-on-year. More importantly, the country still benefits from significant competitive advantages, including a strong trade profile, a large private sector, a sizable manufacturing base and favourable demographics.

In recent years, the German government has intentionally expanded the low-wage work sector in an effort to reduce exceptionally high levels of unemployment. As a result, the share of the German workforce employed in low-paying jobs now rivals that of the United States. Low Wage Work in Germany examines both the federal policies and changing economic conditions that have driven this increase in low-wage work. The new "mini-job" reflects the federal government's attempt to make certain low-paying jobs attractive to both employers and employees. Employers pay a low flat rate for benefits, and employees, who work a limited number of hours per week, are exempt from social security and tax contributions. Other factors, including slow economic growth, a declining collective bargaining system, and the influx of foreign workers, also contribute to the growing incidence of low-wage work. Yet while both Germany and the United States have large shares of low-wage workers, German workers receive health insurance, four weeks of paid vacation, and generous old age support—benefits most low-wage workers in the United States can only dream of. The German experience offers an important opportunity to explore difficult trade-offs between unemployment and low-wage work. The tourism industry, of which the hospitality industry is the core element, is one of the largest and the fastest growing industries world-wide. According to World Tourism Organisation forecasts, the industry will continue to grow and employ more people in the twenty-first century. In parallel with the growth of the tourism and hospitality industry world-wide, consumer expectations and demands for quality are rising while consumer tastes are varying on the one hand, and competition among the firms, both nationally and internationally, is intensifying on the other. In this business environment of heightened consumer expectations, distinct market segments that demand unique products and services, and stiff competition, tourism and hospitality organisations are looking for ways to excel in service quality, customer satisfaction, competition and performance. This book takes the view that employees are one of the most, if not the most, important resources or assets for tourism and hospitality organisations in their endeavour to provide excellent service, meet and exceed consumer expectations, achieve competitive advantage and exceptional organisational performance. The purpose of this book is to emphasise the critical role of employees for tourism and hospitality organisations and to examine the ways and means of managing their attitudes and behaviours for the mutual benefit of both parties: tourism and hospitality organisations and their employees.

This timely book is one of the first of its kind to consider contemporary issues such as skills shortages, labour turnover and training, as well as changes in employment protection law in different areas of the hospitality industry.

Today, India's education sector remains a victim of poor policies, restrictive regulations and orthodoxy. Despite being enrolled in schools, children are not learning adequately. Increasingly, parents are seeking alternatives through private inputs in school and tuition. Students are dropping out from secondary school in spite of high financial returns of secondary education, and those who do complete it have inferior conceptual knowledge. Higher education is over-regulated and under-governed, keeping away serious private providers and reputed global institutes. Graduates from high schools, colleges and universities are not readily employable, and few are willing to pay for skill development. Ironically, the Right to Education Act, if strictly enforced, will result in closure of thousands of non-state schools, and millions of poor children will be left without access to education. Eleventh in the series, India Infrastructure Report 2012 discusses challenges in the education sector — elementary, secondary, higher, and vocational — and explores strategies for constructive change and opportunities for the private sector. It suggests that immediate steps are required to reform the sector to reap the benefits from India's 'demographic dividend' due to a rise in the working age population. Result of a collective effort led by the IDFC Foundation, this Report brings together a range of perspectives from academics, researchers and practitioners committed to enhancing educational practices. It will be an invaluable resource for policymakers, researchers and corporates.
