Although orthopantomography (OPT) is a very frequently employed radiological examination, even the expert radiologist can encounter difficulty in reporting the findings owing to the specific terminology, the nature of the diagnostic queries, and the need to describe precisely the clinical implications for the dentist. Additionally, artifacts are a frequent occurrence, and many radiologists and dentists are unfamiliar with their causes and solutions. Methodological inaccuracies during the execution of OPTs also have important clinical implications. For all of these reasons, this richly illustrated monograph on OPT sets out to describe in detail diverse technical and methodological aspects of the examination, from image acquisition through to artifact generation due to lack of experience or malfunctioning. Possible solutions are suggested for all of the most common diagnostic and methodological problems. Emphasis is placed on appropriate terminology and guidance offered on the interpretation of findings in a range of conditions, including the most common odontological problems. This book will be of great value to the radiologist in routine interpretation and reporting of OPTs.?

"This book engage with Helen Frankenthaler's profound interest in the beauty and structure of the natural landscape, an interest present throughout the artist's long and celebrated career. The book's essays provide a rare chance to consider the breadth of the artist's work, organizing the book around her well-known works from the 1950s and 60s as well as the increasingly experimental paintings made during the four subsequent decades of her career"--

Uan Tabu is a rockshelter on the left bank of the central valley of the Wadi Teshuinat, which is a main ancient water course in the Tadrart Acacus mountain range. It is located in the Fezzan region, south-western Libya (Great Jamahirya). The site was discovered by Fabrizio Mori in 1960 and was re-excavated and studied by a multi-disciplinary team at the beginning of the 1990s. It has also remarkable rock art that includes paintings from the Round Head and Pastoral phases. Between 1960 and 1963, a trench was dug into the archaeological deposit at the foot of the rock wall. The results of the 1960s' excavation have never been published before, apart from some brief notes. They are thoroughly described and discussed in the present volume. Between 1990 and 1993, the excavation was resumed and extended. The 1990s' excavation has been preliminarily published. Further information and details are now presented and commented. A stratigraphic and cultural correlation between the two excavations is also attempted in this volume. Four main archaeological and paedological units were identified and dated. They spanned from the Late Pleistocene to the Late Holocene. The earliest one, dating to the Pleistocene, included an Aterian techno-complex and was dated to around 61,000 years BP. Later, during the Early Holocene, a 'pre-pastoral' occupation occurred since the 10th millennium bp. This period was differentiated in two phases characterised by different socio-cultural systems: 1. during the Early Acacus (around 9800-8800 years bp), the site was used on a seasonal basis, probably during the dry season, for practising hunting activities; 2. during the Late Acacus (around 8800-8600 years bp), a more sedentary lifestyle was hypothesised for the inhabitants of the site. These two cultural facies comprised the upper three units. The fourth phase of occupation of the shelter was only attested to the surface of the site, but it could be still considered as an indication of the use of the site during the Late Holocene, as late as the 4th millennium bp. A dung fill in the wall of the rockshelter dated to the end of this, Late Pastoral, phase and is the only evidence for domesticated animals.

When Marco Pierre White's mother died of a brain haemorrhage when he was just six years old, it transformed his life. Soon, his father was urging him to earn his own keep and by sixteen he was working in his first restaurant. He would go on to learn from some of the best chefs in the country. He survived the intense pressure of hundred-hour weeks in the heat of the kitchen, developed his own style, and struck out on his own. But he was also a man who might throw you out of his restaurant, and his temper was legendary, as younger chefs such would find out. He eventually opened several more restaurants, won every honour going and then realised it still wasn't enough. This book tells his astonishing story...

The Mediterranean is an outstanding 'hot-spot' of biological diversity. It is exceptional not only for this, but also because of its long history of interactions between its human inhabitants and the other fauna and flora of the region. The cradle of many civilizations, the Mediterranean region has been host to humans for thousands of years. This book is the first to synthesise our current understanding of the ecology, biology, and geology of Mediterranean animals, birds, and plants, and their habitats. The authors focus on the unique historical determinants and spatial patterns of Mediterranean biodiversity. In particular, the dramatic impacts of long-term human activities on the region's landscapes, flora, and fauna, are considered. This fascinating story will be of interest to researchers and students in ecology, biology, conservation, and geography, as well as to naturalists, and ecotourists visiting this popular holiday region.

La notte prima di Ferragosto, a Savona, è molto movimentata. Si è nel pieno della stagione balneare, la gente balla e si diverte e in mare galleggiano migliaia di "lumetti" messi in acqua uno ad uno dai bagnanti e portati al largo dalle correnti. Ma il magistrato Ludovica Sperinelli non può godersi il giorno di festa perché il ritrovamento del cadavere di un annegato, un rocambolesco incidente d'auto e la scoperta di uno sconosciuto assassinato a colpi di pistola sconvolgono la "movida" che anima la zona portuale della città. Omicidio in Darsena è il quarto noir che vede all'opera il collaudato pool di investigatori, già protagonisti di Delitto alla Cappella Sistina, Morte al Chiabrera e La sala nera. Con loro una miriade di personaggi dalle caratteristiche contrastanti: spacciatori senza scrupoli, un magistrato pasticciere, una bionda con un abito leopardato, un professore con l'hobby del disegno, una madre preoccupata. Tra Savona e la Costa Azzurra, il Sostituto Procuratore Sperinelli e i suoi collaboratori dovranno dipanare la complessa matassa di indizi e trovare i responsabili dei tremendi delitti.

Politica, cultura, economia.

What do Eastern Europe's booming sex trade, America's subprime mortgage lending scandal, China's fake goods industry, and celebrity philanthropy in Africa have in common? With biopirates trolling the blood industry, fish-farming bandits ravaging the high seas, pornography developing virtually in Second Life, and games like World of Warcraft spawning online sweatshops, how are rogue industries transmuting into global empires? And will the entire system be transformed by the advent of sharia economics? With the precision of an economist and the narrative deftness of a storyteller, syndicated journalist Loretta Napoleoni examines how the world is being reshaped by dark economic forces, creating victims out of millions of ordinary people whose lives have become trapped inside a fantasy world of consumerism. Napoleoni reveals the architecture of our world, and in doing so provides fresh insight into many of the most insoluble problems of our era.

Una corretta alimentazione favorisce la salute generale, ma è importante sapere che alcuni cibi – i super cibi – possono proteggere il cervello e farlo funzionare al meglio fino a età avanzata. Il dottor Barnard, ricercatore impegnato nel campo della medicina preventiva, ha raccolto qui i risultati degli studi più recenti e ideato un programma rivoluzionario in 3 passi che può rafforzare la memoria e proteggere il cervello dalle malattie che possono colpirlo. L'autore insegna quali cibi privilegiare nella dieta e quali invece eliminare; descrive esercizi, fisici e mentali, e altre semplici scelte che rinforzano la memoria. Leggendo questo libro, non solo è possibile imparare come migliorare il funzionamento del proprio cervello e garantire una memoria d'acciaio, ma anche come mantenerlo in salute, riducendo il rischio di diventare una delle molte vittime della demenza di Alzheimer, dell'ictus cerebrale e di altre condizioni che possono interferire con la vita di relazione. Nel libro: • I migliori cibi per far funzionare il cervello. • I pericoli derivanti dall'assunzione dei cibi animali. • I danni causati dall'assunzione eccessiva di metalli (come il ferro, lo zinco e il rame). • Un programma alimentare completo, con menu settimanali, ricette e consigli di cucina. Edizione italiana a cura di Luciana Baroni.

A career flavor scientist who has worked with such companies as Lindt, Coca-Cola and Cadbury organizes food flavors into 160 basic ingredients, explaining how to combine flavors for countless results, in a reference that also shares practical tips and whimsical observations.

A bright star of the Italian Renaissance, Girolamo Cardano was an internationally-sought-after astrologer, physician, and natural philosopher, a creator of modern algebra, and the inventor of the universal joint. Condemned by the Inquisition to house arrest in his old age, Cardano wrote The Book of My Life, an unvarnished and often outrageous account of his character and conduct. Whether discussing his sex life or his diet, the plots of academic rivals or meetings with

supernatural beings, or his deep sorrow when his beloved son was executed for murder, Cardano displays the same unbounded curiosity that made him a scientific pioneer. At once picaresque adventure and campus comedy, curriculum vitae, and last will, *The Book of My Life* is an extraordinary Renaissance self-portrait—a book to set beside Montaigne's *Essays* and Benvenuto Cellini's *Autobiography*.

Swank and Dugan provide complete background information on the development of the diet and the clinical tests that have proven its effectiveness. In addition to helpful sections on the lifestyle of the M.S. patient, Swank and Dugan offer tips on sticking to the diet, equipping the kitchen, shopping for healthful food, eating out (with some pertinent information on fast-food restaurants), and keeping the careful dietary records that are essential to continuing good nutrition. This is the low-fat diet that works in reducing the number and severity of relapses in M.S. patients — and *The Multiple Sclerosis Diet Book* provides the nutritious and tasty recipes that M.S. patients and their families can live with for years to come.

A totally revised and updated edition of the first book to offer a holistic approach to slowing the progression of MS • Provides guidance on special diets and nutritional supplements, exercise, alternative therapies, and the effects of negative and positive thoughts on MS • Explains how to reduce toxic overload from mercury and chemicals • Includes life wisdom and coping strategies from others who suffer with MS

Judy Graham is an inspiration. Diagnosed with multiple sclerosis when she was just 26 years old, 35 years later Judy Graham is still walking, working, and has successfully birthed and raised a son who is now an adult. In this totally revised and updated edition of her groundbreaking *Multiple Sclerosis*, first published in 1984, she shares the natural treatments that have helped her and many others with MS stabilize or even reverse the condition. Beginning with the effects of diet, she explains that many people with MS have been eating the wrong foods and shows which foods are “good” and “bad,” how to recognize food sensitivities, and how to correct nutritional deficiencies using dietary supplements. She also looks at reducing the body's toxic overload, whether from mercury amalgam fillings, chemicals, or medications. She presents the exercises with proven benefits for MS she has found most reliable and appropriate, such as yoga, pilates, and t'ai chi, and explores alternative therapies that provide relief and support to the body's efforts to control MS, including acupuncture, reflexology, shiatsu, reiki, and ayurveda. Most important are the insights she provides on the effects of negative thoughts on MS. She demonstrates how a positive mental attitude can actually slow down or even reverse the progression of this disease. Judy Graham is living proof that, as devastating as a diagnosis of MS is, life can still be lived to its fullest.

"The Science of Wine does an outstanding job of integrating 'hard' science about wine with the emotional aspects that make wine appealing."--Patrick J. Mahaney, former senior Vice President for wine quality at Robert Mondavi Winery

"Jamie Goode is a rarity in the wine world: a trained scientist who can explain complicated subjects without dumbing them down or coming over like a pointy head. It also helps that he's a terrific writer with a real passion for his subject."--Tim Atkin MW, *The Observer*

An exuberant and discursive historical novel, crammed with fascinating detail.' *The Independent* It's 11 September 1683, Rome. The citizens of the city wait anxiously for the outcome of the battle for Vienna as Ottoman forces lay siege to the defenders of Catholic Europe. Meanwhile, a suspected outbreak of plague causes a famous Roman tavern to be placed under quarantine. One of its detainees, the mysterious Atto Melani, a spy in the service of France, discovers a secret passage leading deep into the Roman underworld. A plot to assassinate the pope and plans to use the plague as a weapon of mass destruction in the battle between Islam and the West are discovered. Meticulously researched and brilliantly conceived, *"Imprimatur"* contains startling revelations that have been concealed for centuries, drawing on original papers discovered in the Vatican archives. A thriller in the vein of Umberto Eco's *"The Name of the Rose"*, this novel sheds new light on the power struggles of 17th-century Europe, the repercussions of which are still felt today. First published to great controversy in Italy in 2002, *"Imprimatur"* was boycotted by the Italian press and publishing world. Despite this, the novel has gained European bestseller status; it has been translated into 20 languages with editions published in 45 countries. Over 1 million copies have been sold to date.
