Each number is the catalogue of a specific school or college of the University. English Unlimited is a six-level (A1 to C1) goals-based course for adults. Centred on purposeful, real-life objectives, it prepares learners to use English independently for global communication. The Teacher's Pack consists of a Teacher's Book with DVD-ROM. As well as clear teaching notes, the Teacher's Book offers lots of extra ideas and activities to suit different classroom situations and teaching styles. The DVD-ROM provides a range of extra printable activities, a comprehensive testing and assessment program and clear mapping of the syllabus against the CEF 'can do' statements. It also includes the videos from the Self-study Pack DVD-ROM for classroom use.

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

This book presents the refereed proceedings of the Third International Conference on Intelligent Tutoring Systems, ITS '96, held in Montreal, Canada, in June 1996. The book contains 69 revised papers selected from a total of 128 submissions; also included are six invited papers from well-known speakers. All in all, the book reflects the state-of-the-art in the area. In particular the following topics are covered: advising systems, ITS architectures, cognitive models, design issues, empirical studies, formal models, learning environments, real-world applications, software tools for tutoring, student modelling, teaching and learning strategies, and multimedia and WWW.

Business Benchmark Second edition is the official Cambridge English preparation course for Cambridge English: Business Preliminary, Vantage and Higher (also known as BEC), and BULATS. A pacy, topic-based course with comprehensive coverage of language and skills for business, it motivates and engages both professionals and students preparing for working life. The Business Vantage Student's Book contains authentic listening and reading materials, including interviews with business people, providing models for

up-to-date business language. Grammar and vocabulary exercises train students to avoid common mistakes, identified using Cambridge's unique collection of real exam candidates' answers. 'Grammar workshops' practise grammar in relevant business contexts. A BULATS version of this Student's Book is also available.

English for Business Communication is a practical teaching and learning handbook for STIESIA students who take English Laboratory course in third semester.

Includes music.

This volume contains the papers accepted for presentation at the 10th International Conference on Advanced Concepts for Intelligent Vision Systems (ACIVS 2008). Following the first meeting in Baden-Baden (Germany) in 1999, which was held as part of a large multiconference, the ACIVS conference then developed into an independent scientific event and has ever since maintained the tradition of being a single-track conference. We celebrate this year the 10th anniversary of ACIVS, the conference being held in France for the very first time. ACIVS currently attracts computer scientists from 33 different countries, mostly from Europe, Australia and Japan, but also from the USA, Asia and the Middle-East. Although ACIVS is a conference on all areas of image and video processing, submissions tend to focus on certain major fields of interest. About a quarter of the selected papers deal with image and video coding and processing, including filtering and restoration. This year, topics related to biom-

face recognition), tracking, pattern recognition and scene understanding for security applications are covered by about a third of the papers, highlighting a growing interest in that area. Segmentation and feature extraction – which has been one of the cores of the conference over the years – has decreased slightly in importance. The remaining papers deal with systems and other applications such as medical imaging. We would like to thank the invited speakers Ivan Selesnick (Polytechnic University, NY, USA), Josiane Zerubia (INRIA, Sophia Antipolis, France) and Marc Antonini (Université Nice Sophia Antipolis, France) for enhancing the technical program with their presentations.

M.A.Bramer University of Portsmouth, UK This volume comprises the refereed application papers presented at AI-2003, the Twenty-third SGAI International Conference on Innovative Techniques and Applications of Artificial Intelligence, held in Cambridge in December 2003. The conference was organised by SGAI, the British Computer Society Specialist Group on Artificial Intelligence. The papers present new and innovative developments in the field, divided into sections on Personalisation, E-Commerce and Resource Management, Hazard Prediction, Fault Diagnosis and Design, Medical and Social Services and Image Recognition, Knowledge Bases and Attribute Selection. This year's prize for the best refereed application paper, which was sponsored by the Department of Trade and Industry, was won by a paper entitled Design-a-Trial: A Rule-Based Decision Support System for Clinical Trial Design, which

has no fewer than nine authors: K Nammuni, C Pickering (InferMed Ltd), S Modgil (University College, London), A Montgomery (InferMed Ltd), P Hammond (University College, London), IC Wyatt (National Institute for Clinical Excellence), DG Altman (Centre for Statistics in Medicine), R Dunlop (InferMed Ltd) and H Potts (Kings College, London). This is the eleventh volume in the Applications and Innovations series. The Technical Stream papers are published as a companion volume under the title Research and Development in Intelligent Systems XX. On behalf of the conference organising committee I should like to thank all those who contributed to the organisation of this year's application programme, in particular the programme committee members, the referees and our administrators Fiona Hartree and Linsay Turbert.

The Intelligent Business Upper Intermediate Workbook consolidates the language of the Coursebook by providing further practice of key vocabulary, grammar and skills. Throughout the workbook there are Cambridge BEC style tasks to familiarise students with the exam.

This book covers significant recent developments in the field of Intelligent Methods applied to eCommerce. The Intelligent Methods considered are mainly Soft Computing Methods that include fuzzy sets, rough sets, neural networks, evolutionary computations, probabilistic and evidential reasoning, multivalued logic, and related fields. There is no doubt about the relevance of eCommerce in our daily environments and in the work carried out at many research centers throughout the world. The

application of AI to Commerce is growing as fast as the computers and net works are being integrated in all business and commerce aspects. We felt that it was time to sit down and see how was the impact into that field of low-level AI, i.e. softcomputing. We found many scattered contributions disseminated in conferences, workshops, journal, books or even technical reports, but nothing like a common framework that could serve as a basis for further research, comparison or even prototyping for a direct transfer to the industry. We felt then the need to set up a reference point, a book like this. We planned this book as a recompilation of the newest developments of researchers who already made some contribution into the field. The authors were selected based on the originality and quality of their work and its relevance to the field. Authors came from prestigious universities and research centers with different backgrounds.
