Much has been written about the economic and political problems of countries that are in the process of changing from centrally planned systems to market systems. Most studies have focused on the economic, legal, political and sociological problems these economies have had to face during the transition period. However, not much has been written about the dramatic changes that have to be made to the accounting and financial system of a transition economy. This book was written to help fill that gap. This book is the second in a series to examine accounting and financial system reform in transition economies. The first book used Russia as a case study. The present volume in the series examines some additional aspects of the reform in Russia and also looks at the accounting and financial system reform efforts that are being made in Ukraine, Bosnia & Herzegovina, Armenia and five Central Asian republics. The Financial Accounting and Reporting Volume of the Wiley CPA Examination Study Guides arms readers with detailed outlines and study guidelines, plus skill-building problems and solutions, that help the CPA candidates identify, focus on, and master the specific topics that need the most work. Many of the practice questions are taken from previous exams, and care was taken to ensure that they cover all the information candidates need to master in order to pass the new computerized Uniform CPA Examination

Contains an inventory of evaluation reports produced by and for selected Federal agencies, including GAO evaluation reports that relate to the programs of those agencies.

By direction of Congress, the U.S. Department of Defense's (DoD's) program manager for the Assembled Chemical Weapons Assessment (PMACWA) asked the National Research Council

(NRC) Committee on Review and Evaluation of Alternative Technologies for Demilitarization of Assembled Chemical Weapons: Phase II (the ACW II committee) to conduct an independent scientific and technical assessment of three alternative technologies (referred to as Demo II) under consideration for the destruction of assembled chemical weapons at U.S. chemical weapons storage sites. The three technologies are AEA Technologies Corporation's (AEA's) electrochemical oxidation process; the transpiring-wall supercritical water oxidation and gasphase chemical reduction processes of Foster Wheeler/Eco Logic/Kvaerner (FW/EL/K); and Teledyne-Commodore's solvated electron process. Each of these technologies represents an alternative to incineration for the complete destruction of chemical agents and associated energetic materials. The demonstration tests were approved by the PMACWA after an initial assessment of each technology. The results of that initial assessment were reviewed by an earlier NRC committee, the Committee on Review and Evaluation of Alternative Technologies for Demilitarization of Assembled Chemical Weapons (the ACW I committee). For the present review, the committee conducted an indepth examination of each technology provider's data, analyses, and demonstration test results for the critical components tested. This review report supplements the ACW I report and considers the demonstration performance of the Demo II candidate technologies and their readiness for advancement to pilot-scale implementation. Because testing in these areas is ongoing, the committee decided to cut short its fact-finding efforts for input to this report as of March 30, 2001.

Nuclear medicine is the bridge between a particular clinical problem and a relevant test using radionuclides. It began as a minor technical tool used in a few branches of medicine, notably endocrinology and nephrology. However, throughout the world it has now become established as a clinical discipline in its own right, with specific training programmes, special skills and a particular approach to patient management. Although the practising nuclear medicine physician must necessarily learn a great deal of basic science and technology, a sound medical training and a clinical approach to the subject remains of fundamental importance. It is for this reason that we have attempted in this book to approach the subject from a clinical standpoint, including where necessary relevant physiological material. There exist many excellent texts which cover the basic science and technology of nuclear medicine. We have, therefore, severely limited our coverage of these aspects of the subject to matters which we felt to be essential, particularly those which have been less well covered in other texts - for example, the contents of Chapter 21 on Quantitation by Royal and McNeil. Similarly, we have included at the end of some chapters descriptions of particular techniques where we and the authors felt that it would be helpful. In order to emphasize the clinical approach of this book we have inverted the traditional sequence of material in chapters, presenting the clinical problems first in each instance.

INTERMEDIATE ACCOUNTING by Kieso, Weygandt, and Warfield is, quite simply, the

standard by which all other intermediate accounting texts are measured. Through thirty years and thirteen best-selling editions, the text has built a reputation for accuracy, comprehensiveness, and student success. The Fourteenth Edition maintains the qualities for which the text is globally recognized, and continues to be your students' gateway to the profession! Volume I is comprised of Chapters 1-14. Each study guide chapter is comprised of a detailed chapter review, demonstration problems, true/false, multiple-choice, matching questions, and comprehensive exercises. This book is a bound paperback with three-hole punches for convenient storage in a binder.

'Malcolm Smith's Research Methods in Accounting provides a useful addition to the limited number of books on research methods that are addressed specifically to the area of accounting. For students taking DBA degrees in the area, it is probably an ideal companion' - The European Accounting Review Research in accounting is concerned with solving problems, investigating relationships and building a body of knowledge. With this in mind, this book will provide a clear and concise overview of the conduct of applied research studies in accounting. It provides the principal building blocks of how to implement research in accounting and related fields. This book provides students with: - an understanding of contemporary research ideas in accounting, so that readers can identify and define research problems and prepare strategies for their solution; - an awareness of alternative research methods, to facilitate the selection of the most appropriate method for addressing particular research questions; - an ability to review existing research and to offer critiques of articles published in refereed journals; - an appreciation of the ethical constraints on the conduct of accounting research. This book will be essential for students and academics in the fields of accounting and management.

The bestselling book on intermediate accounting, Kieso is an excellent reference for practicing accountants and an invaluable resource for anyone entering the field. They'll learn how to leverage everyday accounting programs like Excel, GLS, and other computerized accounting software giving them a strong background in the tools needed in the accounting profession. Intermediate Accounting 14th Edition is the market leader in providing the tools needed to understand what GAAP is and how it is applied in practice. Through many editions, this textbook has continued to reflect the constant changes taking place in the GAAP environment. This edition continues this tradition, which has become even more significant as the financial reporting environment is exploding with major change. There are three areas of major importance that are now incorporated extensively into the text: New way of looking at GAAP, Convergence of U.S. GAAP and IFRS, and Fair Value Movement. The core of Kieso's value statement continues to be authoritativeness and preparation for the profession (CPA exam). New to This Edition: Expanded and Updated Coverage of IFRS: Some of this new content has been adapted from the recently published Intermediate Accounting, IFRS Accounting. In addition, readers will benefit from new end-of-chapter content and assignments specifically related to IFRS. Critical Thinking and Conceptual Understanding: Building on traditional strengths from previous editions, the new edition includes new Accounting, Analysis, and Principles review exercises to help reinforce these three important elements from each chapter. Updated Real-world Focus: Contains many new chapter-opening stories and "What Do the Numbers Mean?" boxes. Such applications join theory and practice, and demonstrate the use of accounting in today's business world. Professional Simulations: This edition includes updated professional simulations that model the latest version of the computerized CPA exam.

This study seeks to contribute to a better understanding of how syntactic variation is affected by probabilistic factors in English as a foreign language (EFL, L2), exemplified by the effect of weight on the syntactic variation with English transitive verb-particle constructions (e.g. look up, sort out) and transitive verb-prepositional phrase (PP) constructions (e.g. take into account, bear in mind). With these constructions, the particle/PP may occur either adjacent to the verb or separated from the verb by a direct object noun phrase (DO NP). Being highly influenced by the weight of the DO NP in native (L1) English, little is known about the factors, including syntactic weight, that govern this variation in L2 English. Against the background of possible native-language transfer, this study examines whether advanced L1-German EFL learners are sensitive to the probabilistic effect of weight on syntactic choices with verb-particle/PP constructions and whether there are differences when compared to English native speakers. Triangulating comparative corpus data and experimental data, i.e. elicited production and elicited assessment, the study provides converging evidence from language production and intuition that the learners have acquired a near-native awareness of weight effects in verb-particle/PP constructions, with differences indicating a tendency to more conservative choices. Designed solely for accounting students and scholars, this easy-to-follow and engaging text will ensure that you can successfully apply the most relevant research methods to your accounting research studies. New to this updated edition: Expanded coverage on how to successfully identify your research proposal question. Additional qualitative data chapter enabling you to have a stronger understanding of qualitative methods. Real-life accountancy examples provide insight into choices made by accountants, relating your theoretical research to practical application. Further reading at the end of each chapter to further enhance and

expand your knowledge.

"Research on Professional Responsibility and Ethics in Accounting" is devoted to publishing high-quality research and cases that focus on the professional responsibilities of accountants and how they deal with the ethical issues they face. The series features articles on a broad range of important and timely topics, including professionalism, social responsibility, ethical judgment, and accountability. The professional responsibilities of accountants are broad-based; they must serve clients and user groups whose needs, incentives, and goals may be in conflict. Further, accountants must interpret and apply codes of conduct, accounting and auditing principles, and securities regulations. Compliance with professional guidelines is judgment-based, and characteristics of the individual, the culture, and situations affect how these guidelines are interpreted and applied, as well as when they might be violated. Interactions between accountants, regulators, standard setters, and industries also have ethical components. Research into the nature of these interactions, resulting dilemmas,

and how and why accountants resolve them, is the focus of this series. This title publishes annually.
