Business has been increasingly becoming global in its scope, orientation and strategic intent. This book by a renowned author provides a comprehensive yet concise exposition of the salient features, trends and intricacies of international business. The subject matter is presented in a lucid and succinct style so that even those who do not have a prerequisite knowledge of the subject can easily understand it. The text is enriched and made more interesting by a number of illustrative diagrams, tables and boxes. Another significant feature is the profuse references to Indian contexts and examples. Obsolete materials have been deleted and new ones are added at many places. The sixth edition of the book is characterised by updating of information throughout, besides significant modifications and recasting of most of the chapters. The text is supplemented with five new cases. The book is primarily intended for the undergraduate and postgraduate students of management and commerce. Besides, it will also prove useful for the postgraduate students of economics. Visit

The first and definitive book of its kind, Joan Spero's *The Politics of International Economic Relations* has been fully updated to reflect the sweeping changes in the international arena. With the expertise of co-author Jeffrey Hart, the fifth edition strengthens the coverage of political and economic relations since the end of the Cold War, economic polarization in developing nations and the roots of economic decline in centrally planned economies. A new chapter on industrial policy and competitiveness debates further illustrates the changing dynamics of International Political Economy. Ideal as a supplement to the International Relations course or as the core text in International Political Economy, Spero and Hart's *The Politics of International Economic Relations* continues to give students the breadth and depth of scholarship needed to understand the politics of world economy.

This book is the eagerly awaited successor to Robert Gilpin's 1987 *The Political Economy of International Relations*, the classic statement of the field of international political economy that continues to command the attention of students, researchers, and policymakers. The world economy and political system have changed dramatically since the 1987 book was published. The end of the Cold War has unleashed new economic and political forces, and new regionalisms have emerged. Computing power is increasingly an impetus to the world economy, and technological developments have changed and are changing almost every aspect of contemporary economic affairs. Gilpin's *Global Political Economy* considers each of these developments. Reflecting a lifetime of scholarship, it offers a masterful survey of the approaches that have been used to understand international economic relations and the problems faced in the new economy. Gilpin focuses on the powerful economic, political, and technological forces that have transformed the world. He gives particular attention to economic globalization, its real and alleged implications for economic affairs, and the degree to which its nature, extent, and significance have been exaggerated and misunderstood. Moreover, he demonstrates that national policies and domestic economies remain the most critical determinants of economic affairs. The book also stresses the importance of economic regionalism, multinational corporations, and financial upheavals. Gilpin integrates economic and political analysis in his discussion of "global political economy." He employs the conventional theory of international trade, insights from the theory of industrial organization, and endogenous growth theory. In addition, ideas from political science, history, and other disciplines are employed to enrich understanding of the new international economic order. This wide-ranging book is destined to become a landmark in the field.

International Economics is one of the most important and dynamic disciplines of economics. The subject has become all the more complex and interesting because of the interesting because of the intricacies involved in economic factors, international relations, and the socio-economic environment. This book captures all the recent developments in the international economics and business scenario. The contents of the book are divided into four parts. The first part contains - International Economics and Trade, Analytical Tools of International Economics, Theory of Comparative Costs, Modern Theories of International Trade, Heckscher- Ohlin Theory and Gains from International Trade. The second part includes-International Trade and Economic Development, Terms of Trade, Tariffs and International Trade, Contribution of Economic Growth to International Trade, Analysis of Growth Parameters, Free Trade vs. Protection, Non-Tariff Trade Barriers - Quota System, Dumping and State Trading. The third part comprises - Balance of Payments, Foreign Trade Multiplier, Monetary Policy-Fiscal Policy Mix and Foreign Exchange Management. The Fourth part includes - Strategy Towards Globalization, Theory of Economic Integration; Customs Union, Theory of Economic Integration: Regional Blocs and Grouping, WTO Framework, International Financial Institutions, GATS and National Income Determination. The book has a special section on Case pertaining to International Economics and International Business. The book has been written in a clear, crisp and lucid style. Authentic (up-to-date) data and proper illustrations have been provided to facilitate proper understanding of the subject. This book has been designed keeping in view the standard requirements of the undergraduate and postgraduate students of various areas of Economics, International Business and Management.

This volume addresses highly topical issues at a crucial time in international economic relations. The world has never been closer to dismantling the liberal multilateral trading system which has been painstakingly established and successfully operated since the Second World War. In this volume many of the world's most distinguished economists examine the movement toward protectionism, bilateralism, and regionalism, and its causes, effects, and possible solutions. The contributors are theorists, researchers, and advisors to governments and international organizations who are at the forefront of trade theory, policy, and practice, and whose analyses have a real impact on international trade. By collecting together these analyses in a single volume, this book provides a unique survey for students and scholars of economics, and all those concerned with trade theory and policy in business and government.

The North American Free Trade Agreement (NAFTA) was launched amid great hopes and controversy in 1994. More than a dozen years later, progress toward economic integration has stalled. Mexico's economy remains far behind those of Canada and the United States, and such pressing issues as energy security remain unaddressed. In *Requiem or Revival?* scholars and policymakers from all three nations dissect NAFTA's failure to fulfill its early promise and evaluate the prospects for further integration. The authors explore the interaction between regionalism and multilateralism, the impact of the "new trade" agenda, and NAFTA's unresolved problems—migration, security, and energy. Recognizing the limits of the NAFTA framework, they examine its relationship to the Free Trade Agreement of the Americas negotiations and the Doha Development Round, and they discuss various ways in which NAFTA could be revamped or improved. The result is an intriguing volume offering important insights on the future of economic integration in North America and beyond. Contributors include Chantal Blouin (North-South Institute), Theodore H. Cohn (Simon Fraser University, emeritus), I. M. Destler (University of Maryland), Charles F. Doran (Johns Hopkins University–SAIS), Christina Gabriel (Carleton University), Sergio Gómez Lora (IQOM, Inteligencia Comercial), Jerry

Haar (Florida International University), Laura Macdonald (Carleton University), Gordon Mace (Université Laval), Isidro Morales (University of the Americas), Glauco Oliveira (University of Southern California), Antonio Ortiz Mena (CIDE), Jeffrey J. Schott (Peterson Institute for International Economics), Anne Weston (North-South Institute), Tamara Woroby (Towson University, Johns Hopkins University—SAIS), and Jaime Zabludovsky (Soluciones Estratégicas).

The ninth edition of International Economics, by Dominick Salvatore, continues to present a comprehensive, up-to-date, and clear exposition of the theory and principles of international economics that are essential for understanding, evaluating, and suggesting solutions to important international economic problems and issues facing the world today.

In these heady days of ever increasing globalization it has become vital to question whether governments should be allowed to protect domestic enterprises from foreign competitors. This book represents a first attempt to provide a new conceptual basis for discussing the cases in which free trade should be the option of choice in trade policy and those in which protectionism should be used. Lüder Gerken expands the economic tool of ordo-liberalism, founded by Walter Eucken and developed by Friedrich von Hayek, to make it applicable to foreign trade. With impressive clarity and ingenuity, Gerken powerfully argues a scientific case for free trade as a best practice solution to the demands of globalization

Work more effectively and gauge your progress as you go along! Argues that competitiveness is essential to the health of the U.S. economy and standard of living

A collection of leading international scholars examine the concept of regions from a range of perspectives and assess leading contemporary examples.

This study examines the major macroeconomic determinants and the structural relationships of current account variability, capital flows, saving and investment in open economies that are linked to the international financial markets. It explores the appropriateness of domestic policy responses (such as money stock growth, government spending, openness criteria, GDP growth) and the size of population or the impact of external shocks (such as exchange rate variability and the terms of trade uncertainty) for determining the domestic saving-investment comovement and capital flows worldwide. This analysis finds that even high positive correlations between national saving and investment rates could naturally arise within a perfect capital mobility framework where domestic policy variability and external shocks are likely to play a significant role for capital inflow.

Approximately two years ago, the Guido Carli Association charged a group of distinguished economists with studying various aspects of the international monetary system and proposing ways to improve it. The studies were presented at a conference in Florence, Italy, on June 19, 1998 and their edited versions are published in this volume. Ideas for the Future of the International Monetary System consists of two parts: Part I contains the studies commissioned by the Carli Association - those by Dominick Salvatore; Koichi Hamada; Forrest Capie; Michele Fratianni, Andreas Hauskrecht and Aurelio Maccario; Jrgen von Hagen and Ingo Fender, Michael Artis, Marion Kohler and Jacques Mlitz; Barry Eichengreen; Michele Fratianni and Andreas Hauskrecht; Paolo Savona and Aurelio Maccario; and Elvio Dal Bosco - and the comments by Paul De Grauwe and William Branson, and the editors' conclusions. Part II contains three papers presented at the Florence conference, by Antonio Fazio, Carl Scognamiglio, and Alberto Predieri.
