This very small scale exploratory and mostly qualitative research (Qual–quan) study seeks to examine how non-native adult speakers of English (NNASE) can be motivated to speak English as a foreign language (EFL) or second language (ESL) more and better via the utilization of counselling psychology rather than through traditional teaching methods. The main research was done over a 3-month period of English language lessons in a classroom environment.

Complete IELTS combines the very best in contemporary classroom practice with stimulating topics aimed at young adults wanting to study at university.

The latest inventions in computer technology influence most of human daily activities. In the near future, there is tendency that all of aspect of human life will be dependent on computer applications. In manufacturing, robotics and automation have become vital for high quality products. In education, the model of teaching and learning is focusing more on electronic media than traditional ones. Issues related to energy savings and environment is becoming critical. Computational Science should enhance the quality of human life, not only solve their problems. Computational Science should help humans to make wise decisions by presenting choices and their possible consequences. Computational Science should help us make sense of observations, understand natural language, plan and reason with extensive background knowledge. Intelligence with wisdom is perhaps an ultimate goal for human-oriented science. This book is a compilation of some recent research findings in computer application and computational science. This book provides state-of-the-art accounts in Computer Control and Robotics, Computers in Education and Learning Technologies, Computer Networks and Data Communications, Data Mining and Data Engineering, Energy and Power Systems, Intelligent Systems and Autonomous Agents, Internet and Web Systems, Scientific Computing and Modeling, Signal, Image and Multimedia Processing, and Software Engineering.

A course for professionals who need English for work, travel, and socializing. This classic text has been used in over 20 countries by advanced undergraduate and beginning graduate students in biophysics, physiology, medical physics, neuroscience, and biomedical engineering. It bridges the gap between an introductory physics course and the application of physics to the life and biomedical sciences. Extensively revised and updated, the fifth edition incorporates new developments at the interface between physics and biomedicine. New coverage includes cyclotrons, photodynamic therapy, color vision, x-ray crystallography, the electron microscope, cochlear implants, deep

brain stimulation, nanomedicine, and other topics highlighted in the National Research Council report BIO2010. As with the previous edition, the first half of the text is primarily biological physics, emphasizing the use of ideas from physics to understand biology and physiology, and the second half is primarily medical physics, describing the use of physics in medicine for diagnosis (mainly imaging) and therapy. Prior courses in physics and in calculus are assumed. Intermediate Physics for Medicine and Biology is also ideal for self study and as a reference for workers in medical and biological research. Over 850 problems test and enhance the student's understanding and provide additional biological examples. A solutions manual is available to instructors. Each chapter has an extensive list of references.

This book is an integrated course in legal English with many opportunities to practise and hone the core skills of reading, listening, writing, and speaking the language of law. This book is ideal for those who need to use legal English in their professional environment. It is designed for law students as well as everyone who needs to use legal English vocabulary in their work. Its focus remains firmly on British and American legal language throughout. Essential legal terminology, as it relates to company and contract law, is explained in a concise and engaging way. Modern teaching tools facilitate learning and practical application of the authentic language of the law.

Forfatteren, der voksede op som medlem af den privilegerede elite i Maos Kina og senere blev forstødt under kulturrevolutionen i 1960'erne, fortæller sin families historie gennem tre generationer og giver hermed et billede af Kinas historie i 1900-tallet.
