

Interpersonal Skills

Revised, extended and updated, this edition will continue as the core textbook for students of interpersonal communication as well as for professional groups such as counsellors, doctors, nurses, social workers and psychologists.

This fully revised and updated second edition: * outlines the main components and distinctive characteristics of interpersonal communication * offers detailed analysis of communication structures, considering their everyday applications and implications * includes new material on race, gender and sexuality * looks to the future of interpersonal communication.

This textbook on communication is directly relevant to a multiplicity of research areas and professions. This revised edition has been expanded to include further research as well as a new chapter on negotiating.

Good communication skills are at the heart of effective social work practice. This Third Edition enables students to develop a flexible and responsive approach to communicating with the most vulnerable people in society. Building on the success of the previous book, Juliet Koprowska looks in detail at all approaches to communication, paying particular attention to young people, adults and families. The emphasis of this book is not on any particular 'right way' to communicate, but more the ability of the student to be pro-active and aware in different situations.

Good communication and interpersonal skills remain one of the enduring and fundamental characteristics of high-quality nursing and midwifery practice. This is despite major developments in our knowledge of scientific, technological and pharmacological health

treatments. However, because communication is viewed as an implicit part of everyday life, the skills required for effective communication and appropriate professional interactions are often overlooked. This book provides student nurses with the essential information on communication and interpersonal skills. It clearly explores the core concepts and evidence base and is practical and accessible, helping students to gain confidence in these skills.

This text introduces health sciences students to the various interpersonal communication skills that are commonly used within health settings to establish relationships with clients and fellow professionals, and improve therapeutic outcomes. It focuses on developing self awareness and skills for use in health settings and covers the types of scenarios commonly encountered in health settings that are rarely covered in generic professional communication texts.

Perspectives and examples are drawn from a wide range of health professions. The book includes activities that will enable students to reflect on their experiences and practice using the skills. Ancillary package including MCQs Scenarios Reflection questions Health professions focus Specific chapters on - communicating with indigenous peoples Culturally appropriate communication Reflective practice Self awareness

Nursing education is facing a massive set of obstacles as the fields of medicine continues to progress at warp speed at the same time hospitals do not have enough doctors and depend more on nurses than anytime before. The result is overworked nurses running to keep it with the fields in which they must work. This book presents some analyses of nursing education at a critical juncture in the field.

Experienced professionals and novice care workers alike need to communicate
