For many post-graduate students undertaking a research project for the first time is a daunting prospect. Gaining the knowledge and skills needed to do research typically has to be done alongside carrying out the project itself. Students often have to conduct their research independently, perhaps with limited tutor contact. What is needed in such situations is a resource that supports the new researcher on every step of the research journey, from defining the project to communicating its findings. *Management Research: Applying the Principles* provides just such a resource. Structured around the key stages of a research project, it is designed to provide answers to the questions faced by new researchers but without neglecting the underlying principles of good research. Each chapter includes 'next steps' activities to help readers apply the content to their own live research project. The companion website provides extensive resources, including video tutorials, to support the development of practical research skills. The text reflects the richness and variety of current business and management research both in its presentation of methods and techniques and its choice of examples drawn from different subject disciplines, industries and organizations. *Management Research: Applying the Principles* combines diversity of coverage with a singularity of purpose: to help students complete their research project to a rigorous standard.

Focusing on the gap between democratic ideals and performance, three European academics study the common experience and even more common perception of the corrupt behavior of bureaucrats in post-communist Ukraine, Bulgaria, Slovakia, and the Czech Republic. The authors conducted focus-group studies, one-on-one interviews, and large-scale surveys to reveal plentiful details about the ways ordinary citizens cope in their day-to-day dealings with low-level officials and state employees, whose decisions can have a critically important impact on people's lives. c. Applied Social Research focuses on the real world context of applied research. It discusses the often overlooked, yet essential process of planning: poor planning inevitably produces inadequate research. The text helps researchers decide how to approach their applied research problems and to think through the major issues in the design and analysis of their project. 'Applied Social Research' also discussed the idea that in applied social research the use of a single method type is unlikely to provide answers to the often complex set of research questions being addressed and highlights the benefits of using two or more research methods in the one study. The author argues that such mixed method designs are becoming widely used in applied social research, particularly where the methods combine qualitative and quantitative data, thereby enabling a richer set of data to provide various perspectives on the research topic, removing limitations imposed by using single methods. Examples of such designs are provided throughout, useful mixed method designs are outlined and their advantages discussed.

In *Flirting with Danger*, Lynn M. Phillips explores how young women make sense of, resist, and negotiate conflicting cultural messages about sexual agency, responsibility, aggression, and desire. How do women develop their ideas about sex, love, and domination? Why do they express feminist views condemning male violence in the abstract, but often adamantly refuse to name their own violent and exploitive encounters as abuse, rape, or victimization? Based on in-depth individual and collective interviews with a racially and culturally diverse sample of college-aged women, *Flirting with Danger* sheds valuable light on the cultural lenses through which young women interpret their sexual encounters and their experiences of male aggression in heterosexual relationships. Phillips makes an important contribution to the fields of female and adolescent sexuality, feminist theory, and feminist method. The volume will also be of particular use to advocates seeking to design prevention and intervention programs which speak to the complex needs of women grappling with questions of sexuality and
