

Into The Breach Gateway To The Galaxy Book 1

This insightful book provides a comprehensive analysis of the interplay between EU financial regulation and civil liability. It explores this interrelationship in order to determine whether a coordinated approach has been adopted.

Francis Gurry's renowned work, *Breach of Confidence*, published in 1984, was groundbreaking and invaluable in the field of intellectual property as the first text to synthesise the then burgeoning case law on breach of confidence into a systematic form. A highly regarded book, it was the first point of resort for practitioners and a key source for judges. Aplin, Bently, Johnson and Malynicz bring us a new edition of this important work, which remains faithful to the original in its approach, but is fully updated in light of the developments since the first edition. The authors expand upon the original work, in particular adding new material on the history and current relevance of the action for breach of confidence. The authors stress both the advantages and disadvantages of the action for breach of confidence and, like Gurry, they constantly distinguish the action from associated legislative regimes which regulate the access to, acquisition, use and disclosure of information. The book extensively references the many analyses of the data protection regime and considers also issues of jurisdiction and choice of applicable law. Bringing together their particular skills and interests, the three authors produce a fresh re-writing of a highly significant text which retains the academic quality and precision of the original and stakes its claim once more as the leading authority in the field.

This is an account of the modern law of contract by a leading authority in the field. Through this fresh approach to the subject students should obtain a firm understanding of the central doctrines and the controversies associated with them.

Provides a selection of primary legal materials with accompanying commentary and discussion, covering the principal areas of equity and the law of trusts taught in Australian law schools. Fully revised and updated, the second edition features a new chapter on the termination of trusts and includes extracts from recent decisions.

This book explores how Indigenous Peoples are impacted by globalization and the cult of the individual that often accompanies the phenomenon.

In today's fast-paced and ultra-competitive high-tech environment, an effectively managed patent licensing program is a must. The Second Edition of *Drafting Technology Patent License Agreements* shows you how to achieve one. This valuable resource covers all of the legal and business transactional issues you are likely to encounter during the drafting and negotiation of patent licensing agreements. It guides you step-by-step through the unique aspects of the implementation of a patent licensing program for computers, electronics, telecommunications, and other industries, and it clarifies the issues involved in the enforcement and litigation of these patents. You'll find incisive legal analysis on complex issues including: How to implement an aggressive and well-managed patent licensing program How to evaluate a patent or portfolio for licensing How to identify industry segments and select potential licensees How to discuss terms with industry targets How to formulate an effective licensing strategy How to use databases effectively in patent practice How to organize a licensing team How to file a patent infringement lawsuit And many more critical issues like these. Included with this key resource are 40 time-saving forms on the bonus CD-ROM: Forms for establishing a new technology company using patented technology Confidentiality agreements (for a third-party vendor, third party evaluation, or consultant) A projected royalty stream analysis A semiconductor technology cross-licensing agreement Software technology license agreements Model licensing and patent agreements for the telecommunications industry And many more!

Edited by the acclaimed scholar Jacob Neusner, this thirty-five volume English translation of the Talmud Yerushalmi has been hailed by the *Jewish Spectator* as a "project...of immense benefit to students of rabbinic Judaism."

This volume brings together unpublished Italian and Albanian archaeological reports and new archaeological studies from recent fieldwork that throw new light on the archaeology and history of the Pavllas River Valley, the Mediterranean alluvial plain in the territory of Butrint, ancient Buthrotum, in southwestern Albania. It gives prominence for the first time to two important sites, Kalivo and Çuka e Aitoit, which are here reinterpreted and shown to have played major roles in the early history of Butrint as it evolved in the later first millennium BC to emerge as the key city of Chaonia in Epirus. Butrint 7 also presents the full excavation report of the Late Bronze Age and Hellenistic fortified site of Mursi, in addition to other Butrint Foundation surveys and excavations in the hinterland of Butrint, including the Roman villa maritima at Diaporit, the villa suburbana on the Vrina Plain, and Roman sites on Alinura Bay and at the Customs House, as well as new surveys of the early modern Triangular Fortress and a survey to locate the lost Venetian village of Zarópulo. The volume also features a new study of the Hellenistic bronze statuette of Pan found on Mount Mile and of his sanctuary at Butrint. The volume concludes with a comprehensive reassessment of the Pavllas River Valley in relation to Butrint, from the Palaeolithic to the modern eras, examining how dominion, territory, environment and the 'corrupting sea' reshaped Butrint and its fluvial corridor diachronically and particularly brought profound territorial, economic and social alterations under the Roman Empire.

This title endeavours to repair the long-standing problem of updating the official text of the Federal Arbitration Act (FAA). In this book, Thomas E. Carbonneau proposes to transform the FAA into a genuine national law of arbitration, based exclusively on the federal rules applicable to arbitration. He argues for necessary change in the federal law of arbitration that will not only benefit commercial interests and the US economy, but also provide protection for smaller individual interests, such as consumers and employees.

This book examines the relationship between the EU investor protection regulations enshrined in MiFID and MiFID II and national contract and torts law. It describes how the effect of the conduct of business rules as implemented in national financial supervision legislation in private law extends to the issue of enforcement, and critically assesses this interaction from the perspective of EU law. In particular, the conclusions identified in the book will deepen readers' understanding of the interplay between the conduct of business rules and private law norms governing a firm's liability to pay damages, such as duty of care, attributability of damage, causation, contributory negligence and limitation. In turn, the book identifies the subordination and the complementarity model to conceptualise the interaction between the conduct of business rules and private law norms. Moreover, the book challenges the view that civil courts are – or should be – forced to give private law effects to violation of the MiFID and MiFID II conduct of business rules in line with the subordination model. Instead, the complementarity model is advanced as the preferred approach to this interaction in view of what MiFID and MiFID II require from Member States in terms of their implementation, as well as the desirability of each model. This model presupposes that courts should consider the conduct of business rules when adjudicating individual disputes, while preserving the autonomy of private law norms governing

liability of investment firms towards clients. Based on analysis of case law of courts in Germany, the Netherlands and England & Wales, as well as scholarly literature, the book also compares the available causes of action, the conditions of liability and the obstacles investors face when claiming damages, as well as how and the extent to which investors can benefit from the conduct of business rules in clearing these obstacles. In so doing, under the approach adopted by national courts to the interplay between the conduct of business rules of EU origin and private law, the book shows how investors can benefit from the influence of these rules on private law norms. In closing, it demonstrates a hybridisation of private law remedies resulting from the accommodation of the conduct of business rules into the private law discourse according to the complementarity model, illustrating how judicial enforcement through private law means may contribute to investor protection.

Our Daily Breach: Exploring Your Personal Myth Through Herman Melville's Moby-Dick offers both a way of understanding what has generally been called the greatest novel of the American myth while simultaneously exploring one's own personal myth. Its added feature is that it is an interactive book in allowing reader's to meditate on one question per page for each day of the year and to uncover many facets of one's personal myth through cursive writing. It has been long understood that classics of literature are their own form of therapy in that they frequently tap into some of the most shared concerns of being human. This book makes such a connection between our interior life and the plot of the story through the power of mythopoiesis, namely the imaginative act of giving a formative shape to the myth we are each living in and out through the power of analogy, correspondence or accord with the classic poem. Using Melville's epic of America, the reader may enter the deepest seas of his/her own mythic waters to realize and give language to the myth that resides in our daily plot line.

For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

Baen now launches an exciting new science fiction adventure series by the New York Times best-selling author: When a 60-kiloton explosion destroyed the University of Central Florida, and much of the surrounding countryside, the authorities first thought that terrorists had somehow obtained a nuclear weapon. But there was no radiation detected, and, when physicist Dr. William Weaver and Navy SEAL Command Master Chief Robert Miller were sent to investigate, they found that in the center of the destruction, where the University's physics department used to be, was an interdimensional gateway to . . . somewhere. An experiment in subatomic physics had produced a very unexpected effect. Furthermore, other gateways were appearing all over the world and one of them immediately began disgorging demonic visitors intent on annihilating all life on Earth and replacing it with their own. Other, apparently less hostile, aliens emerged from other gateways, and informed Weaver and Miller that the demonic invaders—the name for them that humans could most easily pronounce was the *¿Dreen¿¿* were a deadly blight across the galaxy, occupying planet after planet after wiping out all native life; and now it would be Earth's turn, unless Weaver and Miller could find a way to close the gateways. If they failed, the less belligerent aliens would face the regrettable necessity of annihilating the entire Earth to save their own worlds. . . .

Declared dead some twenty-five years ago, the idea of freedom of contract has enjoyed a remarkable intellectual revival. In *The Fall and Rise of Freedom of Contract* leading scholars in the fields of contract law and law-and-economics analyze the new interest in bargaining freedom. The 1970s was a decade of regulatory triumphalism in North America, marked by a surge in consumer, securities, and environmental regulation. Legal scholars predicted the “death of contract” and its replacement by regulation and reliance-based theories of liability. Instead, we have witnessed the reemergence of free bargaining norms. This revival can be attributed to the rise of law-and-economics, which laid bare the intellectual failure of anticontractarian theories. Scholars in this school note that consumers are not as helpless as they have been made out to be, and that intrusive legal rules meant ostensibly to help them often leave them worse off. Contract law principles have also been very robust in areas far afield from traditional contract law, and the essays in this volume consider how free bargaining rights might reasonably be extended in tort, property, land-use planning, bankruptcy, and divorce and family law. This book will be of particular interest to legal scholars and specialists in contract law. Economics and public policy planners will also be challenged by its novel arguments. Contributors: Gregory S. Alexander, Margaret F. Brinig, F. H. Buckley, Robert Cooter, Steven J. Eagle, Robert C. Ellickson, Richard A. Epstein, William A. Fischel, Michael Klausner, Bruce H. Kobayashi, Geoffrey P. Miller, Timothy J. Muris, Robert H. Nelson, Eric A. Posner, Robert K. Rasmussen, Larry E. Ribstein, Roberta Romano, Paul H. Rubin, Alan Schwartz, Elizabeth S. Scott, Robert E. Scott, Michael J. Trebilcock

Into the Breach

A full-text reporter of decisions rendered by federal and state courts throughout the United States on federal and state labor problems, with case table and topical index.

Through a collective biographical methodology of four scholars 20th century scholars this book investigates how Jewish identity and intellectual ties to Judaic civilisation in the German speaking legal context influenced the international legal discipline.

Uses excerpts from diaries, memoirs, letters, and newspaper accounts to depict the experiences of wartime nurses, entertainers, canteen workers, interpreters, and journalists

The End Times have arrived. For over a decade, the sorceress Phaedra has had a single, vital task: to keep the world of the elves separated from humanity's. But when her world experiences its first skyquake, it's clear that something is very wrong. Has all Phaedra's work been for nothing? She'll need a new plan — and her friends' help — to keep the worlds from smashing into each other and shredding all of creation. Unfortunately, not everyone likes the new plan. To the God of the Underworld, destroying creation doesn't seem like such a bad idea. File Under: Fantasy [Fresh Start | The Bands Back | Merging Worlds | All Good Things]

The volume presents the results of a research project (named “Legafight”) funded by the Luxembourg Fond National de la Recherche in order to verify if and how digital tracing applications could be implemented in the Grand-Duchy in order to counter and abate the Covid-19 pandemic. This inevitably brought to a deep comparative overview of the various existing various models, starting from that of the European Union and those put into practice by Belgium, France, Germany and Italy, with attention also to some Anglo-Saxon approaches (the UK and Australia). Not surprisingly the main issue which had to be tackled was that of the protection of the personal data collected through the tracing applications, their use by public health authorities and the trust laid in tracing procedures by citizens. Over the last 18 months tracing apps have registered a rise, a fall, and a sudden rebirth as mediums devoted not so much to collect data, but rather to distribute real time information which should allow informed decisions

and be used as repositories of health certifications.

The sixth edition of Ewan McKendrick's *Contract Law: Text, Cases, and Materials* provides a complete guide to the subject in a single volume, containing everything needed for the study of contract law at undergraduate level. The book comprises a unique balance of 40% text to 60% cases and materials, combining the best features of a textbook with those of a traditional casebook. The author's clear explanations and analysis of the law provide invaluable support to students, while the extracts from cases and materials promote the development of essential case reading skills and allow for a more detailed appreciation of the practical workings of the law. Online Resource Centre The book is accompanied by an Online Resource Centre which includes: * Extra material with in-depth coverage of topics such as illegality and incapacity * Updates on recent developments in the law * Annotated web links to key sources of information on contract law * Lecturer access to a test bank of multiple choice questions and answers

You know that "We come in peace" thing? Apparently, they didn't get the memo. Frank and Marine Space Corps One find themselves across the galaxy in a WWE smackdown with the legions of a boss-level villain. But the party's just getting started. He donned the mantle of a celestial knight to impress a girl, well, an empress. Now destiny's calling in a debt. A lightning-paced military fantasy full of outlandish comedy and impossible situations that will have you hailing for these Marines from the get go. For fans of Green Lantern and the Stargate Universe. For a good time, click the Buy link above. Come on, you know you want to.

This edited collection examines the formation of urban networks and role of gateways in Europe from the Middle Ages to the modern world. In the past, gateway cities were merely perceived as transport points, only relevant to maritime shipping. Today they are seen as the organic entities coordinating the allocation of resources and supporting the growth, efficiency and sustainability of logistics (including both the transport and distribution of goods and services). Using different historical case studies, the authors consider how logistics shaped urban networks and were shaped by them.

Index digest...and consolidated tables of cases reported and cases judicially considered, 1865-1969 found with Western Australian law reports.
