This first Asia-Pacific edition of Reilly/Brown's Investment Analysis and Portfolio Management builds on the authors' strong reputations for combining solid theory with practical application and has been developed especially for courses across the Australia, New Zealand, and Asia-Pacific regions. The real-world illustrations and hands-on activities enhance an already rigorous, empirical approach to topics such as investment instruments, capital markets, behavioural finance, hedge funds, and international investment. The text also emphasises how investment practice and theory are influenced by globalisation.

This guide describes biological and economic procedures developed by the Bureau of Land Management (BLM) to evaluate the biological effects and economic benefits of BLM's resource improvements and treatments, especially habitat improvements, affecting wildlife populations. Although developed as part of an instructional package for teaching BLM resource managers to use BLM procedures for benefit-cost analysis and project ranking, this expanded publication is also intended to provide a basic level of knowledge and understanding of wildlife economics and productivity analysis. This guide is written for biologists and other resource specialists, economists, other social scientists, planners, and managers.

How One Man Created a Profession—and Entirely Transformed the World of Investing “The small list of investment books that must grace the library of any serious investor—not to gather dust, but to be opened over and over again—just grew by one. This wonderful compilation of the wit and wisdom of Benjamin Graham is the new addition. Savor it. Learn from it. Treasure it.” John C. Bogle, founder and former Chief Executive, The Vanguard Group “If youth is measured by creativity and excitement about new ideas and a thirst for learning, then Ben Graham—in his early 80s—was the youngest guy in the room when two-dozen stellar investment managers met for three days to explain the inner workings of investment management.” Charles D. Ellis, CFA, Bestselling Author of *Winning the Loser's Game* “These writings, spanning over 30 years, help us understand even better the remarkable achievement of this visionary man and his lasting influence on the finance profession.” Burton Malkiel, Princeton University, Bestselling Author of *A Random Walk Down Wall Street* “Investing involves the intelligent triangulation between fundamentals, psychology, and prices. Benjamin Graham, *Building a Profession* . . . illustrates how this investment legend never stopped thinking about this multi-dimensional challenge.” Seth Klarman, The Baupost Group “Serious professionals in the investment business will delight in pouring over this and checking their own thoughts against those of the master.” Jeffrey J. Diermeier, CFA, Diermeier Family Foundation, and former CFA Institute president and CEO “This is a must-read for anyone interested in the history and development of our profession and the importance of critical investment thinking.” Gary P. Brinson, CFA, GP Brinson Investments “Some investors ('the happy few') know that Ben Graham's writings on financial analysis give them a leg up. So they will want to read this book, and other investors should.” Jean-Marie Eveillard, First Eagle Funds

“The CFA Institute and Jason Zweig have performed an invaluable service to our profession in collecting these [writings] in one volume.” William H. Miller, CFA, Legg Mason Funds Management About the Book: When Benjamin Graham began working on Wall Street in 1914, the center of American finance resembled a lawless frontier. The concept of regulatory laws was in its infancy, the SEC wouldn't see the light of day for 20 years, and many firms hid assets and earnings from nosy outsiders. And security analysts didn't exist as we know them. They were called “diagnosticians,” and they didn't do much analyzing. These investors prided themselves on going with the “feel” of the market, and most of them rarely looked at a financial statement. Appalled by the lack of research and quantification, Benjamin Graham set out to change all this—and ended up creating the discipline of modern security analysis. A collection of rare writings by and interviews with one of financial history's most brilliant visionaries, Benjamin Graham, *Building a Profession* presents Graham's evolution of ideas on security analysis spanning five decades. Articles include: “Should Security Analysts Have a Professional Rating? The Affirmative Case” *Financial Analysts Journal* (1945) “Toward a Science of Security Analysis” *Financial Analysts Journal* (1952) “Inflated Treasuries and Deflated Stockholders: Are Corporations Milking Their Owners?” *Forbes* (1932) “The Future of Financial Analysis” *Financial Analysts Journal* (1963) “Controlling versus Outside Stockholders” *Virginia Law Weekly* (1953) These pages reveal the revolutionary ideas of a man who didn't so much find his calling as he created it from scratch—and opened the door for entire generations of investors.

Active Investment Management looks at where active management has come from, where it is today, what problems it faces and where the answers to these questions are leading it. The book addresses the major issues concerning the key groups within the industry. Charles Jackson's wonderfully readable book will be essential reading for the practitioner and is broken down into five sections covering the whole spectrum of active investment management: * asset classes and products * balancing risk and return * active product selection * the nature of skill * the price of skill .

The revised and updated fourteenth edition of *Investments: Analysis and Management* explains the essentials of investing and supports good investment decisions. More than a simple introduction to the subject, this comprehensive textbook prepares students to handle real-world investment problems and controversies in a clear and accessible manner. Emphasizing readability, Authors Charles Jones and Gerald Jensen minimize complex formulas and simplify difficult material—enabling students of all levels and backgrounds to follow the entire discussion and delve further into the subject. Ideally suited for beginning courses in investments, this textbook is designed as a practical guide to help students gain foundational knowledge of investing and develop the analytic skills necessary for deciphering investment issues. Carefully organized chapters guide students through fundamental investing concepts, portfolio and capital market theory, common stock analysis and valuation, fixed-income and derivative securities, the specifics of security analysis

and portfolio management, and more. A broad range of pedagogical tools—including bulleted summaries, numbered examples, spreadsheet exercises, computational problems, and an extensive set of chapter review questions—strengthens student comprehension and retention.

This thesis describes an empirical study on the efficiency of Jakarta Stock Exchange (JSX), involving tests of semi-strong form market efficiency with respect to listing as an event of interest. The major objective of the study was to identify if investors following the news of additional share listing and those buying newly issued stocks from the secondary market on the first day of trading could earn significant abnormal returns. The stocks examined in this respect cover 58 firms classified as the most active stocks in trading frequency, volume and value, selected out of 155 listings that took place on the Jakarta Stock Exchange over the period 1993-1995. A variant of the simple market model technique was used to estimate daily abnormal returns around the events of interest.
