"After the conflict ended in Angola, the country was faced with development challenges in economic and social conditions. The Government needed direction and reforms to encourage private sector participation to meet Angola's vast infrastructure needs in electricity and gas, water and sanitation, transport, and telecommunications. Private Solutions for Infrastructure in Angola provides an objective assessment of Angola's general environment for private sector participation in infrastructure. The main purpose of the book is to assist the Government of Angola in developing policies and a framework for the promotion of private participation

in the rebuilding and development of the country's infrastructure. This book focuses on maximizing the role and contribution of the private sector in infrastructure and it analyzes and documents the barriers, opportunities, and measures to promote private participation in infrastructure over the period 2005-2020. The book also provides a summary of the action plan of the short, medium, and long-term steps to facilitate private sector participation."

This book explains the dynamics behind southeast Asia's foreign investment activity, and looks at the region's options for reviving its reputation as an attractive host for foreign investors. Each chapter focuses on a key element; together, they portray southeast Asia's foreign investment profile and prospects. By bringing these key interlocking elements together under a single cover, the book aims to provide a more profound understanding of the challenges southeast Asian countries face in their on-going attempts both to attract new foreign investment inflows and to continue hosting substantial existing foreign-invested assets.

"It is best described as that part of academic wisdom that the authors have found useful in actually managing assets, coupled with heuristics that they have developed over the last decade"--

Bank has emphasized that water must be treated as an economic and social good. From a management viewpoint, countries should explore the efficient allocation of water through the use of pricing. Although pricing through markets has existed for some time, the use of these markets has not been widespread. This volume covers the traditional fields in water management. Section I discusses water policy in the Middle East, North Africa, and China's Yellow River Basin. The second section reviews the Bank's experience with irrigation and drainage and the attitudes of water resources professionals toward problems in this area. The final section targets the general aspects of water markets with case studies from Chile, Mexico, Spain, and the United States. The suitability of markets for Central Asia and the Indo- Gangetic basin is also examined.

information and communications technology (ICT) policy-makers and regulators in an increasingly converged digital environment. Under the overarching theme "Regulatory incentives to achieve digital opportunities", the 16th edition of Trends explores topical issues regulators need to address to ensure that citizens can benefit from the social and economic opportunities brought about by the digital economy. For digital opportunities to fully materialize, an adaptive, consultative and innovative approach to ICT policy and regulation is more than ever necessary. The thematic chapters, drawing up from discussion papers presented at the 2015 ITU Global Symposium for Regulators, examine investment strategies to foster the deployment of broadband and access to the digital economy, network sharing and co-investment regulation, regulation and the Internet of Things (IoT), interoperability in the digital ecosystem and smart regulation to facilitate m-services and applications uptake and diffusion.

"This book collects the papers and discussions delivered at an October, 1998 conference co-sponsored by the Federal Reserve Bank of Chicago and the International Monetary Fund to examine the causes, implications and possible solutions to the crises. The conference participants included a broad range of academic, industry, and regulatory experts representing more than thirty countries.

Introducing Global Health: Practice, Policy, and Solutions is a contemporary overview of the major issues in global public health. The book explores how population health might be maximized with the right blend of health system, education, anti-poverty, infectious disease, urban development, governance, and incentive-based policies. It covers topics critical for understanding the state of the world today, including wars for natural resources, the missing women phenomenon, and whether global aid really works. The book's case studies focus on developing economies, mixed economies, and new emerging superpowers. Thematic chapters are interwoven with running motifs, such as the health risks and benefits associated with different totalitarian, capitalist, and market socialist economies. Moving beyond statistics, the book represents a major innovation in the teaching of global health by presenting technical concepts including the incidence and prevalence of disease within the context of more accessible topics such as global poverty. This helps students contextualize otherwise challenging but critical concepts, such as the burden of infectious disease. By encouraging reflection, focusing on what works, and using activities and exercises, Introducing Global Health both teaches fundamentals of global public health and cultivates a policy perspective that is appealing and compelling for today's students.

volume provides a broad and critical analysis of regional geoeconomic trends. It underscores the most important conditions of global and regional cooperation and political and economic rivalry, as well as the position of regions in the economic and foreign policy of global and regional powers. The wide selection of examples means that the reader receives a large dose of knowledge about the political and economic realities of these regions, the ongoing processes, and the specifics of the rivalry. One of the most significant developments in recent years has been the emergence of global markets, which has triggered opportunities for multinational firms to seek business across national borders. Global markets offer unlimited opportunities. But competition in these markets is intense. To be globally successful, companies must learn to operate and compete in multiple environments which may be different from the home environment. One important prerequisite for success in foreign markets is the ability to negotiate properly. Global business negotiations are affected by the cultural backgrounds of the negotiators, comprising language, cultural conditioning, negotiating style, approaches to problem solving, implicit assumptions, gestures and facial expressions, and the role of ceremony and formality. Therefore, negotiators assigned to deal with their foreign counterparts need a lot of learning and skills. With training and practice such learning and skills can be enhanced. The proposed book offers a practical guide to acquire negotiating skills. The purpose of this book is to provide consistently effective strategies and systematic approaches to negotiations that will dramatically improve

international managers as negotiators. The book provides sufficient familiarity with negotiating styles that will help managers identify their unique strength and weaknesses, thus enabling them to interpret and comfortably use the latest advances in the field of negotiation in dealing internationally.

Innovation and Technology - Strategies and Policies contains a selection of outstanding contributions by world experts on how a culture of innovation is able to produce a response to fast global changes affecting society. The book describes major evolutionary directions and foreseen trends in: environment versus industry; technology breakthroughs; energy planning; education and research; intangible investment requirements; new health technologies; and economics and management of innovative actions at strategic, organisational and technological levels. The actual percolation of the innovative process throughout the multiple facets of society is presented in relation to the main challenges facing us in the 21st Century. The book is addressed to all those concerned with innovation in dynamic terms as a creative response to the ongoing changes in society integrating sciences, technologies, humanities, life-long education and training, and other disciplines.

The integrated solutions for Bodie, Kane, and Marcus' Investments set the standard for graduate/MBA investments textbooks. Available as a separate purchase, McGraw-Hill's adaptive learning component, LearnSmart, provides assignable modules that help students master chapter core concepts and come to class more prepared. In addition, resources within Connect help students solve financial problems and apply what they've learned. Bodie Investments' blend of practical and theoretical coverage combines with a complete digital solution to help your students achieve higher outcomes in the course. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

In the last fifty years, the world economy has benefited from a globalization process driven by the enlightened confluence of technology, innovation, trade, and foreign direct investment. This book broadens our understanding of that process. Opening with a review of current global economic metrics and the significant differences between advanced and developing nations, the book goes on to discuss the globalization paradigm and the forces driving it. Also covering the evolution of international trade, the book reviews trade distortions from external and internal sources, comparing trade on a multilateral, non-discriminatory basis with alternative trade practices. Describing the rapidly growing practice of foreign direct investment, the book shows how FDI is closely linked to international trade and concludes with a review of the important function FDI can play.

How do we prepare for and manage the challenges and the transformations that are increasingly confronting cities? Solutions are necessary for the impacts expected from the global population movement toward urban centres; the evolution of technologies and its influence on the economy; the evolving socio-cultural fabric of our cities and what it means for citizen engagement and happiness; and for the increasing need to protect and better manage the environment. The series of essays presented here will help governments, organizations, and concerned citizens think differently about ways we can improve the places we call home. It will stimulate local stakeholders to move away from silo-thinking and work collaboratively toward innovative solutions to make cities more liveable and sustainable. The volume brings together international experts on development, innovation, education, health, digitalization, and planning to provide stimulating new ideas and successful examples of tools and systems being used worldwide to improve the future of cities.

Defining the value of an entire company can be challenging, especially for large, highly competitive business markets. While the main goal for many companies is to increase their market value, understanding the advanced techniques and determining the best course of action to maximize profits can puzzle both academic and business professionals alike.

Every four years since 2004, the Copenhagen Consensus Center has organized and hosted a high profile thought experiment about how a hypothetical extra \$75 billion of development assistance money might best be spent to solve twelve of the major crises facing the world today. Collated in this specially commissioned book, a group of more than 50 experts make their cases for investment, discussing how to combat problems ranging from armed conflicts, corruption and trade barriers, to natural disasters, hunger, education and climate change. For each case, 'Alternative Perspectives' are also included to provide a critique and make other suggestions for investment. In addition, a panel of senior economists, including four Nobel Laureates, rank the attractiveness of each policy proposal in terms of its anticipated cost-benefit ratio. This thought-provoking book opens up debate, encouraging readers to come up with their own rankings and decide which solutions are smarter than others.

This book identifies second stage challenges and opportunities for expanding renewable energy into a mainstay of electricity generation that can replace fossil fuels and nuclear power, comparing Japan with several countries in East Asia and Northern Europe. Environmentally sustainable renewable energy technologies have now overtaken fossil fuel and nuclear technologies in terms of total global investment, and the costs of these technologies and related ones (e.g. storage batteries) are rapidly falling. Yet renewable energy use varies greatly from country to country. Major second stage obstacles to replacing fossil and nuclear-fueled electricity generation include the lack of electricity grid capacity and storage assets. Opportunities and solutions include expanding grids regionally and internationally, building flexible smart grids that offer better demand management, and policies that promote the expansion of storage assets, especially grid batteries and hydrogen. In addition, two key factors – electricity market restructuring through unbundling transmission from electricity generating companies; and electricity market liberalization, especially for retail customers – allow consumers to choose power companies based not only on price, but also on method of generation, especially fossil or nuclear generation versus renewable energy. Despite the development of environmental initiatives, healthcare, and cultural assimilation in today's
