You started a business, and you have tried enough (or so you think), but things have not exactly played in your favor. You expected more, way more, but the reality of the world has hit you, and the numbers don't match your expectations. If you have made the mistake of doubting yourself even for a moment in this 'crisis' which by the way in other words means opportunity, this book will get you back on track. Guess what? I am not going to take a whole lot of time of yours: All I need from you is 30 days, and only 13 tools to be implemented. Don' worry, not all of them need a huge strategy, board meetings, four cups of coffee, and lots of evaluations. They are things that got me from \$100 start-up to \$25,000 a year the 1st year, and on the way to \$ 100,000 this year (minimum); multiply that by ten at least with the way I see the year turning up. I have never incurred a loss, or burnt out cash. Moreover, my clients which include Taj Hotels, Adani Group, Bank of Baroda, Frankfinn Air Hostess Institute, DPS, The Future Group, and 50+ more humongous corporate houses across 25 cities have benefited at least 10 times more from these 13 tools (though I have not given all 13 to all of them as some of them only needed a few; you might too.) But since my only goal of writing this exclusive e-book is to get you in profits, stay positive, and for sure enjoy the entrepreneurial and life journey, I am going to give you all so that you can put the pieces together and fix things immediately! After all, you didn't pick this book up because you wanted your life to change in the distant future (I will leave that for others.) But, you picked this book up because you got tired of feeling lazy, staying demotivated, suffering from lack of energy, low sales numbers, and worst of all, as I said, doubting yourself if you can make it. So my only demand and request: Knock this book off within 24 hours, keep a notepad, or highlight the key points, and start acting on the 13 tools immediately and see things moving for you. Let's get started.

We are somewhat made to believe that Quality and its management will happen naturally by having some sets of documents and certifications. However, it's never the case as many efforts in the name of achieving Quality and Excellence are seen in isolation. This happens quite easily because there are no proper mechanisms in place to touch the Belief System of an individual or groups when it comes to ensuring a Quality Culture. The Facts, Lies, and Quality Management will give a clearer picture on what Quality Management is all about and how to address those weaknesses that plague many organizations out there. The topics such as Quality, the creation of right experiences to touch the belief system, the science of variations, data and measurements, being innovative and problem solving framework is explained in detail. Simple and clear this book will allow you to think more holistically when dealing with day to day challenges towards the creation of a more dynamic robust solutions in making quality outcomes a reality. It will also give the readers an idea of how much of wasted efforts that go into play every day with or without realizing that creates more damages than you think in the name of Quality and its management. So, with the limited resources that we have, we sure can't afford to do the right things wrong or the wrong things very correctly.
