

Jeppesen Airway Charts Student Pilot Route Manual

Flightpath is the definitive course for pilots and Air Traffic Controllers who need an ICAO4 level of English to work in the industry. Written by Philip Shawcross, one of the world's leading Aviation English experts, and reviewed by a panel of aviation English specialists, this course offers a thorough grounding in the range of communication skills needed by both pilots and Air Traffic Control Officers (ATCOs) aiming to reach ICAO4 level or above. The Teacher's Book is a complete manual and subject matter reference book for Aviation English teachers of any level of experience, with detailed notes and instructions for each unit. The teacher's notes provide further support and will help the trainer customise the course for pilots, ATCOs and mixed classes.

The Pilot's Manual: Ground School will walk you through everything you need to know to pass your FAA Knowledge Exams and earn your pilot certificate. The Fifth Edition of this comprehensive textbook has been updated to reflect current rules, procedures, FAA Airman Certification Standards and technologies including drones, ADS-B, weather services available to pilots and BasicMed. Subjects covered include aerodynamics, the airplane and its performance factors, physiological factors affecting the pilot, weather, regulations, charts and airspace, airport operations, navigation, and flight planning, including specific instructions on how to use the flight computer. Helpful marginal notes are provided for quick definitions of terms, further emphasis of key points, and mnemonic devices that can be of tremendous benefit to study. Each chapter closes with review questions highlighting the important facts. Ninety percent of the material is for the private pilot applicant, and the remaining ten percent, well-separated, will raise you to the commercial pilot certificate standard. Also available in The Pilot's Manual Series: Flight School--How to fly all the maneuvers required for certification Instrument Flying--Aeronautical knowledge and skill required for the Instrument Rating Multi-Engine Flying--Aeronautical knowledge required to earn a Multi-Engine Rating Access to Flight--An integrated Private Certificate and Instrument Rating curriculum Airline Transport Pilot--Complete ATP certification training program

Until recently, the only option for instrument rating training in Europe was a full course requiring up to 200 hours of theoretical knowledge instruction, but the Enroute and Competency-Based Instrument ratings (for aeroplanes only) are a part of a new approach that is supposed to make instrument flying more accessible, because the original courses were designed as part of a commercial course and were necessarily intense. This book is for people who already hold an ICAO IR, and who can simply convert to the EASA version by completing the skill test and demonstrating to the examiner (during the skill test) an adequate knowledge of air law, meteorology and flight planning. It contains all the information needed to answer the examiner's questions, plus tip and tricks not usually taught on such a basic course.
