The monograph constitutes an attempt to demonstrate how Cognitive Grammar (CG) can be employed in the foreign language classroom with a view to aiding learners in better understanding the complexities of English grammar. Its theoretical part provides a brief overview of the main tenets of Cognitive Grammar as well as illustrating how the description of English tense and aspect can be approached from a traditional and a CG perspective. The empirical part reports the findings of an empirical study which aimed to compare the effects of instruction utilizing traditional pedagogic descriptions with those grounded in CG on the explicit and implicit knowledge of the Present Simple and Present Continuous Tenses. The book closes with the discussion of directions for further research when it comes to the application of CG to language pedagogy as well as some pedagogic implications.

The theme of this collection is a discussion of the notions of 'norms' and 'standards', which are studied from various different angles, but always in relation to the English language. These terms are to be understood in a very wide sense, allowing discussions of topics such as the norms we orient to in social interaction, the benchmark employed in teaching, or the development of English dialects and varieties over time and space and their relation to the standard language. The collection is organized into three parts,

each of which covers an important research field for the study of norms and standards. Part 1 is entitled "English over time and space" and is further divided into three thematic subgroups: standard and non-standard features in English varieties and dialects; research on English standardization processes; and issues of standards and norms in oral production. Part 2 deals with "English usage in non-native contexts," and Part 3 is dedicated to "Issues on politeness and impoliteness." The notions of standards and norms are equally important concepts for historical linguists, sociolinguists with a variationist background, applied linguists, pragmaticians, and discourse analysts.
