A study book for Year 5 Maths students, with study notes covering Year 5 topics. It includes colourful pictures and is suitable for key stage two children.

This book contains all the questions that came in SATs exams from 2016 onwards and categorised them into simple topics. Even more, we have also gone through all the questions that are relevant to the current syllabus from 2010 to 2015 and put them in their respective topics. If you complete this book, CONGRATULATIONS, you have solved all the questions that have come in exams ever since 2016. This book is created with one simple idea- the more you practise, the better you get. But if you target that practice topic wise, the results are extraordinary. The book can be used to revise your learning. You can choose any of the individual topics and see where your preparations are at.

ongoing assessment, a section where children can record their results and track their own progress, and a pull-out answer section.

If learners in the classroom are to be excited by mathematics, teachers need to be both well informed about current initiatives and able to see how what is expected of them can be translated into rich and stimulating classroom strategies. The book examines current initiatives that affect teaching mathematics and identifies pointers for action in the classroom. Divided into three major sections, it looks at: the changing mathematics classroom at primary, secondary and tertiary level major components of the secondary curriculum practical pedagogical issues of particular concern to mathematics teachers. Each issue is explored in terms of major underpinnings and research in that area, and practical ideas can be drawn from the text and implemented in the reader's classroom practice. Each chapter has been written by a well-respected writer, researcher and practitioner in their field and all share a common goal: to look thoughtfully and intelligently at some of the practical issues facing mathematics teachers and offer their perspectives on those issues.
