Simplified Chinese edition of Frindle. A 5th grader named Nick is a little on the enterprising side mixed with mischievous, and the love for pushing his limits. To irk his tough teacher, he invented a word "frindle," and convinced everyone this is a real word. Years later when the word made it into the dictionary, Nick discovered that his teacher was secretly rooting for and helping him.

What are you getting if you order this book?Here's what you get: the latest Addition & Subtraction Math Practice the Activity Workbook for kids in Kindergarten, First Grade, Second Grade. This book uses Fact Families to help kids learn the mathematical relationships of adding and subtracting numbers!This book contains 400 total fact family math addition and subtraction problems. These are split into 4 levels. Each level gets progressively more difficult.Here's what others say about learning with fact families:"Fact families are one of the many strategies that can be investigated by children to help them make advances in number and operations (Clarke & Cheeseman, 2000; Cobb, 1987; NCTM, 2000). The idea is that the fact families allow children to think about part-whole relationships while also helping them realize that subtraction and addition are opposites of one another (Cobb, 1987; Sun & Zhang, 2001; Zhou & Peverly, 2005)." - https://www.researchgate.net/publication/242266096_Helping_a_Young_Child_Connect_Fact_Family_Addition_and_Subtraction_using_ToolsAnother great thing about fact families in math: the answer is always there. One of the three values is the answer. That's the thing that makes it possible for kids in kindergarten, 1st grade or 2nd grade to identify the relationships so easily.What this book is NOT. This book is not designed with a particular influence like Singapore Math, Kumon, Everyday Math, or that kind of thing. It's strictly practice problems conveniently organized into workbook format...So YOU don't have to worry that this workbook is going to recommend a different learning style than what your child is being taught. Practice, practice, practice...and your child will be on their way.

Traditional Chinese edition of James and the Giant Peach, the Roald Dahl classic . In Traditional Chinese. Distributed by Tsai Fong Books, Inc.

Sociology of Organizations: Structures and Relationships is a timely and unique collection of both classic and contemporary studies of organizations. Designed around competing theoretical frameworks, this cutting-edge book examines organizations with attention to structure and objectives, interactions among members and among organizations, the relationship between the organization and its environment and the social significance or social meaning of the organization. This volume sheds light on some of the most interesting changes and challenges facing organizations today: the integration of new media, the implementation of diversity and inclusion, and the promotion of sustainable workforce engagement. Lively and provocative, this textbook is theoretically rigorous, disciplinarily informed and representative of heterogeneity within organization studies.

A cumulative tale in which a wakeful flea atop a number of sleeping creatures causes a commotion with just one bite.

Chinese edition of "Writing magic: creating stories that fly" by Newbery Award winner Gail Carson Levine, author of Ella Enchanted. Levine shares her experience and tips of writing: emails, essays, greeting cards, love letters... She inspires young people to effectively communicate with words and how to break through the writer's block. In Traditional Chinese. Distributed by Tsai Fong Books, Inc.

One Tuesday evening, frogs rise on their pads, float through the air, and explore nearby houses while their inhabitants sleep. An almost wordless book.
