

briefly describes other major contract documents used within USA and UK construction industries.

Law for Professional Engineers: Canadian and Global Insights, Fifth Edition McGraw Hill Professional

Application of heat and chemicals to a biofouling well is a relatively new approach for water well rehabilitation. For the first time, *The Application of Heat and Chemicals in the Control of Biofouling Events in Wells* explains what many microbiologists now believe is the most effective form of treatment: pasteurization and application of chemicals. Consider an increasingly prevalent alternative to traditional forms of encrustation: an approach which recognizes that water wells are conduits to the sub-surface realm, whose organisms impact the production characteristics of wells.
