Legacy of Bitterness: Ethiopia and Fascist Italy, 1935-1941 is an important study of the relationship between Ethiopia and Fascist Italy during the 1930s. The author, a renowned authority on the subject, has skillfully provided a broad perspective on the Italo-Ethiopian war in global terms. His study looks at the response to the war by the emergent Black nationalism in the diaspora, and Ethiopia's bitter struggle to tip the balance of world opinion in its favor.

Marcianus Graecus Z. 454 [= 822], known to Homeric scholars as the Venetus A, is the oldest complete text of the Iliad in existence, meticulously crafted during the tenth century ce. An impressive thousand years old and then some, its historical reach is far greater. The Venetus A preserves in its entirety a text that was composed within an oral tradition that can be shown to go back as far as the second millennium bce, and the writings in its margins preserve the scholarship of Ptolemaic scholars working in the second century bce and in the centuries following. Two thousand years later, technology offers a new opportunity to rediscover this scholarship and better understand the epic that is the foundation of Western literature. The high-resolution images of the manuscript that

accompany these essays were acquired by a multinational team of scholars and conservators in May 2007.

This work presents a historical survey of the evolution of neo-Nazism in Germany from 1945 to the present. Rand argues that there is a direct link between Nazis and the postwar right-wing extremist movements that became far more visible in the 1980s. He traces the postwar efforts to eliminate Nazis, the rise of right-wing political parties, the growth of militancy, and the increased extremism of the 1970s and 1980s. The recent move toward terrorism and its future implications are also discussed.

"Aside from Amelia Earhart, America's earliest airwomen and their achievements remain largely unknown to the public. While enjoying widespread media attention in the twenties, thirties, and forties, America's female pilots lapsed into obscurity following World War II, denying current generations of women a promising cadre of role models. This book pays tribute to these spectacular pioneers: Katherine Stinson, Louise Thaden, World War II's Women Airforce Pilots, and many others." "Heroes Without Legacy examines basic features of the dramatic and exciting period between 1912 and 1944, when aviation began to mature both technically and commercially and when airwomen were competing head-to-head with men in record-breaking flights. During this period, women were among the entrepreneurs and innovators. They participated in the establishment of transportation routes and the transition from open cockpit biplanes to machines with practical cabins." "Examining the important role they played in fields as diverse as racing and aerial navigation, Dean Jaros probes the reasons why the substantial accomplishments of these women have been so neglected and reflects on whether the airwomen themselves might not have affected their own future in more positive ways. Rather than popularize or glorify the airwomen, Jaros provides an interpretive assessment of these individuals and the circumstances that influenced their lives." "Illustrated with eighteen photographs, most never before published, Heroes Without Legacy not only addresses a glaring historical deficiency but documents a recent resurgence of interest in these women aviators."--BOOK JACKET.
