

Leisure Program Planning And Delivery

Race and ethnicity have a significant impact on leisure behavior and activity choices. Yet, until now, no book has thoroughly explored that impact, though this topic is critical for leisure professionals to understand as they shape services and programs to meet the needs of the diverse populations they serve. *Race, Ethnicity, and Leisure: Perspectives on Research, Theory, and Practice* brings together 28 world-renowned researchers who provide a comprehensive review and unified perspective on leisure in relation to five minority populations in the United States and Canada: African Americans, Latino Americans, Asian North Americans, Indigenous peoples, and religious minority groups. This text offers a compendium of knowledge as it • synthesizes leisure research on race and ethnicity and discusses how changing demographics will affect leisure behaviors and activities in the 21st century; • explains the leisure behaviors and participation patterns of racial and ethnic minority groups in the United States and Canada; • explores issues, including natural resource recreation, physical activity and health, tourism, and sport, as they relate to recreation activities among minorities; and • presents an international perspective, delving into the leisure behaviors of minority groups in Europe, Australia, New Zealand, and East Asia. *Race, Ethnicity, and Leisure* examines the current theories and practices related to minority leisure and reviews numerous issues related to these diverse groups' leisure, including needs and motivations, constraints, and discrimination. The authors consider leisure behavior of ethnic and racial groups, investigating issues such as types of recreation participation among specific groups, recreation in specific environments, and factors affecting participation. The book also suggests future directions in research and professional practice, guiding students and professionals in addressing the demographic changes in the U.S. and Canadian populations. The result is an unprecedented text that offers an extensive look at the changing landscape of recreation, leisure pursuits, our world, and the populations that are driving these changes. As such, *Race, Ethnicity, and Leisure* is an essential text for those preparing to enter the recreation and leisure field.

Therapeutic Recreation Leadership and Programming will help students learn the essential aspects of professional practice while developing a leadership mind-set. The book focuses on the day-to-day responsibilities of the therapeutic recreation specialist (TRS) while integrating ethical considerations into each aspect of the job. Readers will learn how to perform the daily work of a TRS while maintaining the highest ethical standards of the profession. The book details • the principles, theories, and codes of ethics that will form the foundation of specialists' understanding of the field and set the stage for practice; • the knowledge, skills, and leadership principles that TRSs will need in order to help their clients accomplish therapeutic outcomes; • strategies that will guide TRSs in planning a wide range of programs and services, including information on frequently encountered health problems, major program areas, facilitation strategies, and client and program evaluation; and • methods for program organization and delivery that will prepare specialists to offer a regular schedule of therapeutic recreation programs that meet the needs of all of their clients, whether in group or individual settings. The book will arm students with the information and tools they need in order to succeed as therapeutic recreation specialists. It familiarizes students with their future

clients by describing the health concerns most often encountered in therapeutic settings. Case studies for the most common concerns provide students with concrete examples of how programming works in various clinical settings. The book also provides specific recreation activities from five major program areas, along with information on the effectiveness of the activities, risk management concerns, and implementation strategies. Step-by-step instructions for structuring, planning, and leading both group and one-on-one sessions will prepare students to implement programs in a wide variety of settings. Stories from professionals in the field, examples of real and hypothetical clients, and case studies show students how to use the principles they've learned when leading programs. Learning activities help them to further explore the concepts in each chapter, and highlight boxes emphasize key ideas related to each chapter's content. An instructor guide is available to course adopters at www.HumanKinetics.com/TherapeuticRecreationLeadershipandProgramming.

The text provides students in professional preparation programs with an effective & efficient method of recreation program planning.

Programming Recreational Services serves as a handbook for recreational practitioners at every level. It clearly presents the methods and materials necessary for the planning, organization, and operation of recreational services. This reader friendly text addresses each of the 12 recreational program categories in detail and includes illustrations to assist with learning. It teaches students a methodology for evaluating recreational programs from the establishment of objectives to the final instrument used, to determine whether or not the program performed in the way that it was intended.

Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

Introduction to Recreation and Leisure, Third Edition, presents perspectives from 52 leading experts from around the world. It delves into foundational concepts, delivery systems, and programming services; offers an array of ancillaries; and helps students make informed career choices.

Presents a comprehensive and integrated method for program design and evaluation. Uses a systems approach to program planning with step-by-step procedures. Information related to activity analysis, treatment plans, and management concerns are examined.

Leisure Program Planning and Delivery will guide your students in: employing a comprehensive three-step plan for successful program planning, implementing, and evaluating; learning the essentials of successful recreation programming theory through real-world case studies and examples; and building a professional programming portfolio through completion of class assignments. Leisure Program Planning and Delivery will prepare recreation students for 21st-century programming. The book provides a comprehensive three-step plan for successful programming of services, program leadership, and understanding operational management of program systems in recreation and leisure service organizations. The scope of the book makes it practical either for preparing students and new professionals or for retooling your recreation program for today's challenges. Grounded in contemporary professional practice and real-world applications, the book provides a systematic plan for students to learn the essentials of successful recreation programming, with examples of a variety of activities in community, outdoor, sport, cultural arts, and tourism sectors of the field. Each chapter of Leisure Program Planning and Delivery includes the following student-friendly features: Learning objectives; An opening vignette with a real-world example tied to the theme of the chapter; Photographs, tables, and figures; Examples of specific chapter programming concepts taken from actual programming for outdoor, sport, tourism, cultural arts, and community recreation organizations;

A continuing case study highlighting the City of Westerville, Ohio, Parks and Recreation Department, a 2001 and 2007 Gold Medal Awardee; A chapter summary keyed to the learning objectives; A glossary of key terms. Throughout the text, the City of Westerville, Ohio, Parks and Recreation Department--a 2001 and 2007 Gold Medal Awardee--serves as a case study. The case illustrates how program concepts and practices apply in the real world of recreation programming. Leisure Program Planning and Delivery is the foundational text to prepare students and practicing professionals for situations they will encounter on the job. As a reference, the book contains the essentials of programming and offers cutting-edge programming techniques, support tools, and forms that will help professionals meet challenges in leisure programming, making it a text that students will keep long after their course work is completed.

Leisure Program Planning and Delivery Human Kinetics

The new human development paradigm rests on the human and cultural capital of peoples and revolves around the challenge of increasing the well-being and happiness of people.

Therefore, leisure understood in today's societies as one of the key means to feel good, satisfied with life and reaffirmed in the pursuit of a meaning for life, seems to be ultimately called to play a key role in promoting human development processes. The contents of this book are a good proof of it. Each chapter focuses on a different approach, discipline or group and highlights the potential of leisure experiences for human development. This book is an invitation to reflection and thought on issues that, far from being irrelevant, have a bearing on people's future, in terms of happiness, well-being and quality of life. It is everyone's responsibility to ensure that future leisure develops under the guidelines of a leisure that contributes to human development.

The "Park and Recreation Professional's Handbook "offers a thorough grounding in all areas of programming, leadership, operations, administration, and professionalism. It integrates foundational concepts, the latest research, and real-world examples to present readers with a complete picture of all of the skills needed for success in the field.

Substance abuse is one of the most frequent and serious problems encountered by human service workers, criminal justice professionals, and clinicians. Unfortunately, many professionals in these fields receive little, if any, formal training about this problem. Our planned encyclopedia presents state-of-the-art research and evidence-based applications in A-to-Z format. Rather than create a compendium of specific drugs and drug effects, for which there are any number of fine titles already available, the focus will be upon practical knowledge and skills for pre-service and in-service human service professionals, including substance abuse counselors and prevention specialists.

Ecotourism continues to be embraced as the antithesis of mass tourism because of its promise of achieving sustainability through conservation mindedness, community development, education and learning, and the promotion of nature based activities that were sensitive to both ecological and social systems. The extent to which this promise has been realised is open to debate. Focusing on an array of economic, social and ecological inconsistencies that continue to plague ecotourism in theory and practice, the volume examines ecotourism in reference to other related forms of tourism, impacts, conservation, sustainability, education and interpretation, policy and governance, and the ethical imperative of ecotourism as these apply to the world's greenest form of tourism. Ecotourism is a growing field attracting increasing attention from students and academics. Fennell provides an authoritative and comprehensive review of the most important issues that continue to both plague ecotourism and make

it one of the most dynamic sectors in the tourism industry. It covers a comprehensive range of themes and geographical regions. Building on the success of prior editions, Ecotourism has been revised throughout to incorporate recent research and benefits from the introduction of real-life case studies and summaries of recent literature. An essential reference for those interested in Ecotourism, the book is accessible to students but retains the depth required for use by researchers and practitioners in the field. New chapters on the theory and application of animal ethics; community development in sustainable tourism; and education and learning in the field have added further value to an already very comprehensive volume. This book will be of interest to students across a range of disciplines including geography, economics, business, ethics, biology, and environmental studies.

It's not all "fun and games." A growing body of research suggests that recreation activities can be powerful development contexts when they are properly framed and intentionally designed. This volume highlights much of that research, and the articles that follow provide ample evidence that well-framed recreation activities and contexts can provide a range of positive developmental outcomes. Editors Lawrence R. Allen and Robert J. Barcelona draw on their own work in human and youth development and have assembled contributing authors who explore the importance of meaningful recreation and leisure experiences in the lives of youth and the value of recreation from a developmental perspective. Chapters focus on the developmental potential of specific recreation contexts and settings and provide research and evidence-based strategies outlining the activities that best promote positive youth development. Finally, the volume demonstrates how recreation is being used to strengthen individual and community assets and its role as a contributor in addressing pressing social issues. This is the 130th volume of *New Directions for Youth Development*, the Jossey-Bass quarterly report series dedicated to bringing together everyone concerned with helping young people, including scholars, practitioners, and people from different disciplines and professions. The result is a unique resource presenting thoughtful, multi-faceted approaches to helping our youth develop into responsible, stable, well-rounded citizens. This comprehensive, multi-disciplinary introduction to public policymaking and planning in the leisure, sport and tourism sectors examines theoretical issues underpinning public sector policymaking, including: political ideologies; leisure wants, needs, demand and benefits; human rights; role of the state versus the market; and models of organizational decision-making. Expanded to include sport as a subject separate from leisure, this updated edition of the successful *Leisure and Tourism, Policy and Planning* includes new coverage of U-Plan, a practical, participation-based local planning methodology, and three sets of planning tools: stakeholder consultation, demand forecasting, and facility and service appraisal. The book provides a link between theory and practical analytical techniques for policy development, plan-making and evaluation of outcomes. It includes an extensive bibliography and questions and exercises for each chapter, making it an ideal text for students as well as practitioners. Web-based support materials are also available for students and teachers.

Transitions for Students with Severe Disabilities presents transition programs for students with moderate and severe disabilities from school to community life. Taking the position that the most effective transition programs are those that cumulatively build on the capacity of students for employment, community living, and citizenship, the

authors address the full range of curricular and instructional issues that face professionals working in primary school, secondary school, and post-A level programmes.

This comprehensive text addresses all three levels of leisure programming: direct service delivery, program planning, and program management. It focuses on issues related to customer service and benefits, such as providing leisure experiences, assessing customer needs, evaluating program impact, promoting positive customer and leader interactions, analyzing and implementing policies, and supervising staff.. Introduction to Recreation and Leisure, Second Edition, is a textbook designed for an initial undergraduate course in a recreation and leisure program. With its 21st-century views of recreation and leisure services, it incorporates indicators for future directions in the field and presents international perspectives as well as career opportunities in recreation and leisure. A new web resource is included.

Leisure Program Planning and Delivery provides a comprehensive three-step plan for successful programming of leisure services and operational management of program systems in recreation and leisure service organizations. Grounded in contemporary professional practice and real-world applications, the book provides a systematic plan for students to learn the essentials of successful recreation programming, with examples of a variety of activities in community, outdoor, sport, cultural arts, and tourism sectors of the field.

Used in numerous universities throughout the United States, Canada, Australia, and New Zealand, this book provides programming insights for educators, practitioners, and students. The book will present readers with the vital tools necessary in providing successful programs for their patrons.

This comprehensive text addresses all three levels of leisure programming: direct service delivery; program planning, and program management. It focuses on issues related to customer service and benefits-such as providing leisure experiences, assessing customer needs, evaluating program impact, promoting positive customer and leader interactions, analyzing and implementing policies, and supervising staff. Tourism is the world's largest industry. In the past decade it is the natural-resource-based sector that has experienced the greatest growth. In particular, adventure, cultural and ecotourism (ACE tourism): for example, skiing, white-water rafting, whale watching, festivals and fairs. This book provides an in-depth overview of the different operations of ACE tourism. It draws on theory from recreation and leisure studies, tourism, marketing, and environmental management to demonstrate the importance of effective program planning. This is especially significant as industry competition becomes more intense in this growth sector.

This classic textbook provides practitioners and students working in geriatric rehabilitation an interdisciplinary approach to the assessment and rehabilitative management of older persons. Clinically focused, the 4th edition reviews crucial information about the elderly people and suggests strategies for implementing practical rehabilitation goals in a variety of care settings.
