This book describes and analyzes authority relationships in classrooms through explorations of theory, prior research, and contemporary qualitative studies. The emphasis is on the social construction of authority and the crucial role authority plays in K-16 teachers' pedagogy and students' academic engagement and achievement. The introductory chapter grounds the reader in social theory on authority; presents groundbreaking qualitative studies of classroom authority; describes ideological debates over authority in schools; and discusses implications for research, practice, and policy. Six field-based qualitative studies illuminate the dynamics of authority across a spectrum of K-12 and college settings. These studies feature a variety of methodologies, theoretical lenses, and interpretive perspectives that the authors use to gather and analyze data. The emphasis in all the chapters is on the nature, negotiation, and implications of authority relations between teachers and students. The epilogue pulls the book together by elucidating new findings and vital themes that expand the reader's vision of what classroom authority means, how it is constructed, and why it is so important. This book seeks to revitalize dialogue and research on classroom authority with attention to the contextual factors that bear on its social construction. It is aimed at teacher educators, scholars, policymakers, students of education, and practitioners who seek empirically based understanding of authority that is inextricably connected to classroom life and ultimately to the larger issues of educational quality and democracy in schools and society.

This collection introduces readers to the philosophical interpretation of Scripture, specifically within American Philosophy. The purpose of the collection concerns starting a conversation about the practice and task of the philosophical interpretation of Scripture. Reflections on the philosophical interpretation of Scripture have been treated more as a “conversation-stopper” than a conversation-starter within the American academy. To start such a conversation, this collection offers substantive accounts of the role of Scripture in the philosophical thought of fifteen American philosophers: Jane Addams, Henry Bugbee, Stanley Cavell, John Dewey, Jonathan Edwards, Ralph Waldo Emerson, Margaret Fuller, William James, Martin Luther King, Jr., Charles Sanders Peirce, Josiah Royce, Richard Rorty, George Santayana, Henry David Thoreau, and Cornel West.

Curating Revolution examines how Mao-era exhibitions shaped popular understandings of, and participation in, the political campaigns of China's Communist revolution.

In 2008, Barack Obama's presidential campaign used an innovative combination of social media, big data, and micro-targeting to win the White House. In 2012, the campaign did it again, further honing those marketing tools and demonstrating that political marketing is on the cutting edge when it comes to effective branding, advertising, and relationship-building. The challenges facing a presidential campaign may be unique to the political arena, but the creative solutions are not. The Marketing Revolution in Politics shows how recent US presidential campaigns have adopted the latest marketing techniques and how organizations in the for-profit and non-profit sectors can benefit from their example. Distilling the marketing practices of successful political campaigns down into seven key lessons, Bruce I. Newman shows how organizations of any size can apply the same innovative, creative, and cost-effective marketing

In the past year the elected leaders of the government of the United States have taken that nation down a road that can only lead to disaster. The federal government of the United States has borrowed more money in the past year alone than all of the debt accumulated since the nation's found more than 200 years ago. In the process of bankrupting America, the nationally elected leaders have on many occasions literally ignored the Constitution of the United States. The American people are patient; however, their patience has reached the breaking point, and, as a result, BIG changes are just around the corner for America. The book titled "Our 2nd American Revolution: Honoring the Sacrifice of our Founders" spells out how the American people will "take back" their nation beginning on November 2nd, 2010. This book includes a "Nine Point Plan to Save America from an otherwise certain demise" and breaks down step by step what must be done if America is to survive in the future. Our 2nd American Revolution is a book about saving America. America has drifted very far away from the fundamental principles that allowed her to become the richest and fastest growing nation ever to have existed. As a result, America is on a collision course with certain disaster. The goal of the "Our 2nd American Revolution" is to sound a loud wake up call to all Americans who love thier country and cannot bear to see the great American experiment fail. America can be saved if dramatic and bold action is taken soon. However, time is of the essence and the citizens of American

This book examines the ways in which imperial agendas informed the writing of history in nineteenth-century Britain and how historical writing transformed imperial agendas. Using the published writings and personal papers of Walter Scott, J. A. Froude, James Mill, Rammohun Roy, T. B. Macaulay, E. A. Freeman, W. E. Gladstone, and J. R. Seeley among others, Theodore Koditschek sheds light on the role of the historical imagination in the establishment and legitimation of liberal imperialism. He shows how both imperialists and the imperialized were drawn to reflect back on the Empire's past as a result of the need to construct a modern, multi-national British imperial identity for a more economically expansive and enlightened present. By tracing the imperial lives and historical works of these pivotal figures, Theodore Koditschek illuminates the ways in which discourse altered practice, and vice versa, as well as how the history of Empire was continuously written and re-written.

It is a belief that he shares with Rodríguez: All children, adolescents, and adults, from all walks of life, from any corner of the globe, no matter their economic status, occupation, gender, race, or ethnicity, can philosophize. But perhaps more profoundly, and it is here where I think Kohan's written work and practice mirror the pedagogy and text of Rodríguez, philosophizing, living philosophically, with anyone, for anyone, we can invent school. The Inventive Schoolmaster: Simón Rodríguez is indeed about the inventive Simón Rodríguez. More importantly, however, it is an essay which shows us how a life of philosophical essaying and errantry can invent school. And in this regard it is also an introduction to the singular form of Walter Kohan's philosophy of education." – Jason Thomas Wozniak
