Each chapter also examines how social studies is situated within the larger elementary curriculum to demonstrate the interdisciplinary nature of the instruction. In this book, Farr examines the spoken and written language of post-observation teaching-practice feedback on teacher education programs. To do so, she draws upon theories from discourse analysis, conversation analysis, and pragmatics to frame the analysis of feedback meetings and written tutor reports, which are then examined using comparative quantitative and qualitative corpus-based techniques. The overall aim is to determine the defining characteristics of this genre, focusing especially on pragmatic factors, with the ultimate goal of investigating the salient aspects responsible for making feedback both effective and affective. Farr's research draws upon a spoken corpus of feedback interactions and a written corpus of tutor reports from language teacher education and is also strongly informed by data in the form of diary reflections and questionnaire responses from student teachers and questionnaire responses from the relevant tutors.

Although the idea of the reflective practitioner is embraced by many, there is still a need to understand how teachers' practical experience and the theoretical insights of researchers can be linked in teacher education. This book offers a framework for addressing this problem. It brings together 15 years of experience in teacher education and research, based on Korthagen's concept of "realistic teacher education" which is well known in Europe and gaining interest in North America. Set up as a journey back and forth between practice and theory, this book is not only about linking them but models how it can be done, providing both practical solutions and research-based theoretical foundations. *Linking Practice and Theory: The Pedagogy of Realistic Teacher Education*: \* serves as a guidebook for teacher educators, with many practical ideas and guidelines; \* prepares the reader for a fundamental shift in thinking about teacher education; and \* uses an international perspective in analyzing real, practical experience in teacher education, in the Netherlands and in other countries.

The Common Core State Standards require students to do more with knowledge and language than ever before. Rather than be mere consumers of knowledge, students must now become creators, critics, and communicators of ideas across disciplines. Yet in order to take on these new and exciting roles, many students need daily teaching with an extra emphasis on accelerating their academic communication skills. Common Core Standards in Diverse Classrooms describes seven research-based teaching practices for developing complex language and literacy skills across grade levels and disciplines: using complex texts, fortifying complex output, fostering academic interaction, clarifying complex language, modeling, guiding, and designing instruction. Most important, you will find clear descriptions and examples of how these essential practices can--and should--be woven together in real lessons. You will also find the following: Classroom activities based on the practices Dozens of classroom examples from lessons in different grade levels and disciplines Detailed lessons with annotations focused on language and literacy development Strategies and tools for building system-wide capacity for sustained growth in the practices Common Core Standards in Diverse Classrooms is a concise guide for helping us improve our practices to strengthen two vital pillars that support student learning: academic language and disciplinary literacy. The Reflexive Teaching Artist invites Teaching Artists at all levels of experience to consider the power of reflective practice. Kathryn Dawson and Daniel A. Kelin, II offer a reflective framework – a series of foundational concepts, including intentionality, quality, artistic perspective, assessment, and praxis – illuminated through reflexive case-study examples from Teaching Artists in a wide range of settings. Through questions, guided reflection activities, collected wisdom from the field, and an introductory action-research model, Dawson, Kelin and their contributors closely examine the practice of teaching in, through, and about drama and theatre.

A clear, systematic road map to effective campus leadership development *Building Academic Leadership Capacity* gives institutions the knowledge they need to invest in the next generation of academic leaders. With a clear, generalizable, systematic approach, this book provides insight into the elements of successful academic leadership and the training that makes it effective. Numerous examples of current campus programs illustrate the concepts in action, and reflection questions lead readers to assess how they can apply these concepts to their own programs. The academic leader is the least studied and most misunderstood management position in America. Demands for accountability and the complexities of higher education leadership are increasing, and institutions need ways to shape leaders at the department chair, dean, and executive levels of all functions and responsibilities. This book provides a road map to an effective development program, whether the goal is to revamp an existing program or build one from the ground up. Readers will learn to: Develop campus leadership programs in a more systematic manner Examine approaches that have been proven effective at other institutions Consider how these approaches could be applied to your institution Give leaders the skills they need to overcome any challenge The field of higher education offers limited opportunity to develop leaders, so institutions must invest in and grow campus leaders themselves. All development programs are not created equal, so it's important to have the most effective methods in place from day one. For the institution seeking a better way to invest in the next generation of campus leaders, *Building Academic Leadership Capacity* is a valuable resource.
