For use in instruction of sign language beyond basic course.

"Translation and Own-language Activities provides structured, practical advice and guidance for using students' own languages within the ELT classroom. It presents effective ways of integrating carefully chosen activities, covering themes such as tools, language skills, language focus and techniques. The practical activities range from using bilingual dictionaries to translating long texts, with a number of tasks drawing on easy-to-use web tools. The book also considers the relationship between translation and intercultural understanding"--

This book brings together and builds on the current research efforts on adaptation, conceptualization, and theorization of Lesson Study (LS). It synthesizes and illustrates major perspectives for theorizing LS and enriches the conceptualization of LS by interpreting the activity as it is used in Japan and China from historical and cultural perspectives.

Presenting the practices and theories of LS with practicing teachers and prospective teachers in more than 10 countries, it enables the reader to take a comparative perspective. Finally, the book presents and discusses studies on key aspects of LS such as lesson planning, post-lesson discussion, guiding theories, connection between research and practice, and upscaling. Lesson Study, which has originated in Asia as a powerful effective professional development model, has spread globally. Although the positive effects of lesson study on teacher learning, student learning, and curriculum reforms have been widely documented, conceptualization of and research on LS have just begun to emerge. This book, including 38 chapters contributed by 90 scholars from 21 countries, presents a truly international collaboration on research on and adaptation of LS, and significantly advances the development of knowledge about this process.

Theory and Practice of Lesson Study in Mathematics: An International Perspective shows that the power of Lesson Study to transform the role of teachers in classroom research cannot be explained by a simple replication model. Here we see Lesson Study being successful internationally when its key principles and

practices are taken seriously and are adapted to meet local issues and challenges. (Max Stephens, Senior research fellow at The University of Melbourne) It works. Instruction improves, learning improves. Wide scale? Enduring? Deep impact? Lesson study has it. When something works as well as lesson study does, while alternative systems for improving instruction fail, or only succeed on small scale or evaporate as quickly as they show promise, it is time to understand how and why lesson study works. This volume brings the research on lesson study together from around the world. Here is what we already know and here is the way forward for research and practice informed by research. It is time to wake up and pay attention to what has worked so well, on wide scale for so long. (Phil Dara, A leading author of the Common Core State Standards of Mathematics in the U.S.)

different sectors. The fields tackled by this book are various and include economics, business, medicine and journalism. This book is unique because not only does it clearly show how corpora and the web can be consulted to obtain relevant and reliable information in the field of technical translations, but it also provides the reader with a collection of electronic texts which can be consulted to translate the documents proposed in each chapter. In this way, the user will learn how to use corpora successfully by self-practising and will have free databases in economics, business and medicine for his/her own use. For these reasons, this is both a reference book for lecturers or technical translators and a self-study practice guide for students in translation studies. The ideal level of English is at least B2.
