holistic approach helping nurses, therapists and social care professionals to better understand the impact of ageing upon the person and wider society. A unique feature of this text is the focus upon positive ageing and the attempt to dispel and challenge some of the myths, prejudices and negative attitudes that still prevail towards ageing and older people. A key objective of the book is to introduce practitioners to some of the neglected or under-addressed aspects of ageing such as spirituality, sexuality, and LGBT. Chapters are written in an engaging and interactive style and where appropriate draw upon case studies and scenarios to maximize engagement developing competence, by informing knowledge, attitudes and skills. The text introduces the practitioner to key dimensions of what it is to be a person, physically, psychologically, socially and spiritually and how these contribute to the ageing process and can enhance the quality of life of older people. Irrespective of whether one cares for older people in an acute hospital setting or domiciliary, home care, this text will be of relevance. The material and content transcend health and social care boundaries, providing valuable, contemporary evidence that can inform and shape practice. Above all this text will encourage reflection, dialogue and engagement with some fundamental aspects of ageing, challenging, attitudes, values and behaviour so that a more positive and balanced

counselling and communication skills within the helper role and explores how to apply these skills in the context of professional practice. Becky Midwinter and Janie Dickson introduce the reader to a new Relational Skills model which demonstrates the phases of relationship development. The authors show what happens within each phase and identify how and when to use skills appropriately. Learning is brought alive through the use of online unscripted video clip sessions of a real helper/client relationship giving the reader opportunities and encouragement to reflect and evaluate their learning. Written in a clear and accessible teaching style, Embedding Counselling and Communication Skills progresses through the 'initial helper' communication skills that are used in every day life, to the more complex and in-depth counselling skills required in a helper relationship. Knowledge of reflective practice, aspects of the relationship and how to manage change ensures the text considers the full range of general and specific skills and abilities required in a helper role situation, whilst the supporting online material is an invaluable tool to deepen and embed the theoretical understanding; practical application and self-reflection. This book will be an essential resource for students taking an introductory counselling skills course and qualified professionals who wish to enhance their knowledge of embedding counselling skills into their work and practice.

Social workers work with people at all stages of life, tackling a multitude of personal, social, health, welfare, legal and educational issues. As a result, all social work students need to understand human growth and development throughout the lifespan. This introductory text provides a knowledge base about human development from conception to death. It is designed to encourage understanding of a wide range of experiences, including some very difficult ones, such as child abuse, the developmental trajectories of children in care, mental distress, the experience of people with dementia, the experience of torture victims and untimely bereavements. Using engaging narratives to illustrate real-life situations, the author analyses them to demonstrate the link between theory, and different theoretical approaches, and practice. Packed with case studies, this student-friendly book includes overviews, summaries, questions and further reading in each chapter as well as a more formal academic section designed to challenge and intrigue students. A reference section contains a glossary and overviews of the principal theories discussed throughout the book. It is an essential read for all social work students.

A Therapist's Guide to Child Development gives therapists and counselors the basics they need to understand their clients in the context of development and to explain development to parents. The chapters take the reader through the various physical, social, and identity developments occurring at each age, explaining how each stage of development is closely linked to

mental health and how that is revealed in therapy. This ideal guide for students, as well as early and experienced professionals, will also give readers the tools to communicate successfully with the child's guardians or teachers, including easy-to-read handouts that detail what kind of behaviors are not cause for concern and which behaviors mean it's time to seek help. As an aid to practitioners, this book matches developmental ages with appropriate, evidence-based mental health interventions.

updated and reconceptualized *The Handbook of Child Psychology and Developmental Science*, a four-volume reference, is the field-defining work to which all others are compared. First published in 1946, and now in its Seventh Edition, the Handbook has long been considered the definitive guide to the field of developmental science. Volume 1, *Theory and Method*, presents a rich mix of classic and contemporary theoretical perspectives, but the dominant views throughout are marked by an emphasis on the dynamic interplay of all facets of the developmental system across the life span, incorporating the range of biological, cognitive, emotional, social, cultural, and ecological levels of analysis. Examples of the theoretical approaches discussed in the volume include those pertinent to human evolution, self regulation, the development of dynamic skills, and positive youth development. The research, methodological, and applied implications of the theoretical models discussed in the volume are presented. Understand the contributions of biology, person, and context to development within the embodied ecological system Discover the relations among individual, the social world, culture, and history that constitute human development Examine the methods of dynamic, developmental research Learn person-oriented methodological approaches to assessing developmental change The scholarship within this volume and, as well, across the four volumes of this edition, illustrate that developmental science is in the midst of a very exciting period. There is a paradigm shift that involves increasingly greater understanding of how

to describe, explain, and optimize the course of human life for diverse individuals living within diverse contexts. This Handbook is the definitive reference for educators, policy-makers, researchers, students, and practitioners in human development, psychology, sociology, anthropology, and neuroscience.

Human service professionals are often faced with complex decisions that can profoundly affect their clients' lives. Learning from the experience of mentors is an invaluable way for students and practitioners to equip themselves with the tools to make the best possible decisions under challenging circumstances. Featuring case studies shared by front line workers, *The Mentors Among Us* takes an innovative choose-your-own-path approach: each mentor's story presents a challenging scenario with two possible solutions. Readers have the opportunity to engage in the decision-making process by picking a path and turning to the corresponding page to find out how their chosen action plays out. Each option is accompanied by relevant concepts and discussions that will help students to think critically about issues such as ethics, poverty, parental rights, child welfare, trauma, self-care, education, and mental health. Highly accessible, this interactive book is well suited for students in the human services, including child and youth care, social service work, and early learning and child care. The real-life stories from mentors in the field will prepare aspiring human service workers with best practices and guide them to think like professionals.

PLAY. We all do it: wordplay, love play, role-play; we play cards, play sport, play the fool, and play around.

And that's just the grown-ups! It features in every aspect of our lives, whether we call it by that or another name. We all do it, but why do we do it? What does it mean to play and what, if any, difference does it make to our lives? Most crucially, and central to the theme of this book, is the question, 'Does play have a positive impact on our health and wellbeing, and consequently a role in modern healthcare delivery?' The contributors to this book provide a comprehensive overview of how play and play-based activities can be used throughout the adult lifespan to promote health and wellbeing within the context of healthcare service delivery for patients, their families and communities, and for the staff involved in their care. Responding to current global health concerns such as obesity, coronary heart disease, dementia and mental health, the book argues that play and playfulness offer a means of protection, promotion and recovery of positive health and wellbeing. The human tendency for play and playfulness as essential to personal growth and development lie at the heart of the discussion. This book will be of interest to all those working in health or social care settings, including nursing, social work and allied health students and professionals and those working within the therapeutic disciplines of art therapy, music therapy, and recreation alliances.

acting on the views of children. This trend was given added weight by the UN Convention on the Rights of the Child, ratified in 1990. Today, seeking the perspective of the child has become an essential process in all sorts of tasks, from framing new legislation to regulating professions. This book answers the fundamental question of what it is that constitutes a 'child perspective', and how this might differ from the perspectives of children themselves. The answers to such questions have important implications for building progressive and developmental adult-child relationships. However, theoretical and empirical treatments of child perspectives and children's perspectives are very diverse and idiosyncratic, and the standard reference work has yet to be written. Thus, this work is an attempt to fill the gap in the literature by searching for and defining key formulations of potential child perspectives within parts of the so-called 'new child paradigm'. This has been derived from childhood sociology, contextual-relational developmental psychology, interpretative humanistic psychology and developmental pedagogy. The highly experienced authors develop a comprehensive professional child perspective paradigm that integrates recent theory and empirical child research. With its clear presentation of underlying theories and suggested applications, this book illustrates a child-oriented understanding of specific relevance to both child-care and preschool educational practice.
