Spannendes Kinderbuch. 2. Band von Lionboy

This book presents a pioneering critical study of Complicite's work throughout the years. Drawing on an extensive overview of the available research material – including interviews, manuscripts and the company's own archive – the book is framed within a clearly defined research perspective and explores the singularity of theatre communication. The book results from an encounter between the London-based – but cosmopolitan in scope – company, and a fresh application of the form-oriented scholarship of Eastern Europe, Yuri Lotman's semiosphere in particular. Focused on the aesthetics of Complicite, this study achieves a critical distance and undertakes multidimensional scrutiny of the available research

material. By identifying the principles of Complicite's aesthetics, the book attempts to grasp the company's artistic paradigm. It focuses on ways of creating, preserving, and decoding meanings, rather than on the nuances of performance or contextual issues.

In the near future, a boy with the ability to speak the language of cats sets out from London to seek his kidnapped parents and finds himself on a Paris-bound circus ship learning to train lions.

And the CD includes wonderful orchestrations of the pieces for you to listen to - or play along with on the piano!"--Back cover.

Science fiction is often considered the genre of ideas and imagination, which would seem to make it ideal for juveniles and young adults; however, the ideas are often dispensed by adults. This book considers the development of science fiction for children and teens between 1950 and 2010, exploring why it differs from science fiction aimed at adults. In a broader sense, this critical examination of 400 texts sheds light on changing attitudes toward children and teenagers, toward science education, and toward the authors' expectations and sociological views of their audience.
