

Living Water Viktor Schauberger And The Secrets Of Natural Energy

Schauberger shows how a world that exploited its resources rather than cherishing them was doomed to destroy itself.

Reviews and discusses the research studies of self-healing, CAM and bioenergy therapies in less detail, with explanations appropriate for lay readers. It is not referenced as extensively as the Professional edition. An additional chapter provides many self-healing approaches and exercises. Learn how the body and mind work together in health and illness, and how to use new and ancient holistic mind-body techniques to heal physical and psychological problems. Explore techniques used for self-healing; Learn about biological energy medicine from Acupuncture to Yoga; Learn the interactions of biological energies with environmental energies; See research in unconventional energies and their relevance to healing.

This introduction to the frontiers of healing deals in-depth with the psychological and emotional issues that stand in the way of good health. Wyeth-Morrison discusses esoteric domains of healing, including body electronics, a method of saturating the body with nutrients and releasing toxins through a process of point-holding. 60 illustrations. 10 charts.

The Whole Elephant Revealed offers clear insights into the existence and operation of universal laws and the golden ratio. It is a synthesis based on common insights found in all wisdom traditions into the operation of universal laws on the one hand and on cutting-edge scientific discoveries that are in line with those insights on the other hand. These principles are called universal because they work on all levels of existence, apply to everything that exist and create order and harmony in the universe. Insights into the operation of the universal laws reveals a whole new worldview. It helps us to understand how everything works in the universe, who we really are and how we can make conscious choices that are more in line with these universal laws. Above all it helps us to understand what works and what doesn't work in the long term. Everything that operates in line with the universal laws, follows the path of least resistance and is in harmony with the greater whole. It makes us realize that while everything in the universe works in harmony with these principles, many aspects of our personal life and our Western culture are not in line with the operation of these underlying principles. If we choose to act in line with the operation of the universal laws, it will go easier, will be more in tune with who we really are and more in harmony with the greater whole. This choice is hard to make though, if we don't know those principles. For that reason the rediscovery of the working of these principles seems to be of extreme importance. In this time of great changes and global unbalance a growing number of people begin to feel the need for a clear and well-founded insight into the universal laws, because this gives an understanding of what is needed to restore the balance and harmony in ourselves as well as worldwide. Because the nature of these principles is universal, they apply to all aspects of our individual and social life. Therefore they can be used as a frame of reference for all personal and social transformations which aim at a greater harmony within ourselves and with the greater whole.

The first book in English to describe Viktor Schauberger's prophetic work.

Water's wisdom on renewal, communication, and holism • How water, as a conscious organism, unites all of creation in one vast communication network • Includes the research of Masaru Emoto and Viktor Schauberger • Discusses the energetics of water, water treatments, finding the best-quality water, and the perils of bottled and distilled water Once held sacred the world over, water contains a wisdom few today acknowledge. Driving everything from our metabolic processes to weather patterns and climate change, its real significance lies in its role as a medium for metamorphosis, recycling, and exchanging energy and information. Seeking a return to our ancestors' reverence for water, Alick Bartholomew explores water's sacred uses, its role in our bodies and environment, and the latest scientific studies to reveal that water is a conscious organism that is self-creating and self-organizing. Examining new discoveries in quantum biology, he shows how water binds all of life into one vast network of energy, allowing instant communication and coherence. Covering the research of water visionaries such as Viktor Schauberger, Mae-Wan Ho, and Masaru Emoto, he examines the memory of water and reveals how the same water has been cycling through Earth's history since the dawn of time, making water nature's greatest recycling and reclaiming agent. With information on the energetics of water, water treatments, finding the best-quality water, and the perils of bottled and distilled water, this book offers us a path to reclaim the spirituality of water.

A detailed guide to restoring the eight foundational areas of health • Explains how each of legendary Taoist masters known as the Eight Immortals has a specific area of health as the focus of his or her teachings • Offers practices, techniques and guidelines for each of the Eight Immortal Healer teachings, including the important roles of oxygen and water in the body, nutrition, detoxification, exercise, energy work, emotional pollution, and spiritual hygiene The Eight Immortals are a group of legendary ancient Taoist masters, each associated with a specific area of health or a powerful healing technique. These eight disciplines can bestow vibrant health and well-being and provide the antidote to the stresses, ailments, degenerative diseases, and toxins of modern life. In this guide to the healing practices of the Eight Immortals, Master Mantak Chia and Johnathon Dao share the legends of each Immortal teacher and detail the many ways to apply their wisdom through nutrition, exercises, supplements, detoxification methods, spiritual practices, and energy work. They explain how the first Immortal, born during the 8th century AD, is associated with oxygen, considered in the Taoist healing perspective as the body's primary nutrient. They discuss how oxygen deficiency is the main culprit in cancer and virus and provide a number of oxygen therapies including the use of hydrogen peroxide and deep breathing to stimulate the metabolism and immune system. The second Immortal Healer centers on water, and the authors explain how chronic dehydration can lead to a host of ailments and offer advice for rehydrating. The other teachings of the Immortal Healers include Nutrition, with guidance on supplements, superfoods, toxic foods, and daily meals; Detoxification, with detailed guidelines for cleansing the body's organs and glands; Avoiding environmental poisons, with advice on vaccines, dental amalgam fillings, sunscreen, chemotherapy, fluoride, and pesticides; Exercise, with step-by-step instructions for Inner Alchemy practices, yoga, and breathing techniques; Maintenance of the energy body, through acupuncture, chi kung healing, magnet therapy, and photon sound beams; and Emotional pollution and spiritual hygiene, with a wealth of practices for balancing the emotional body and staying connected to Source, including forgiveness, meditation, and karmic yoga. By following these Eight Immortal Healers, you can take control of your health, remove the root causes of the chronic ailments that inhibit well-being and longevity, and choose to live life to the fullest in happiness and radiant health.

This e-book is the sum of 30 years of near-natural and practical research on the water - Nadeen K. Althoff (Germany) is a Kombu'Cha brewer and beverage developer in the organic sector. "Water is the element I work with every day. And water is not only my life - it also determines the life of every single person on this planet." This eBook is intended to show in a simple and understandable way [nature is simple] what blatant deadly sins we are committing to our drinking water today and how we can improve the water quality for ourselves and our families. Read more about water in its nature and about its natural laws. Learn about the current treatment techniques for revitalising water and what you can do to have natural and Living Water at home. It's as simple as Nadeen's 10 Commandments to Living Water!

Electrical Engineer Moray B. King expands, with diagrams, on how free energy and anti-gravity are possible. The theories of zero point energy maintain there are tremendous fluctuations of electrical field energy embedded within the fabric of space. King explains the following topics: Tapping the Zero-Point Energy as an Energy Source; Fundamentals of

a Zero-Point Energy Technology; Vacuum Energy Vortices; The Super Tube; Charge Clusters: The Basis of Zero-Point Energy Inventions; Vortex Filaments, Torsion Fields and the Zero-Point Energy; Transforming the Planet with a Zero-Point Energy Experiment; Dual Vortex Forms: The Key to a Large Zero-Point Energy Coherence. Packed with diagrams, patents and photos. With power shortages now a daily reality in many parts of the world, this book offers a fresh approach very rarely mentioned in the mainstream media.

This book will transform your world view. Dr. Masaru Emoto's first book, *The Hidden Message in Water*, told about his discovery that crystals formed in frozen water revealed changes when specific, concentrated thoughts were directed toward them. He also found that water from clear springs and water that has been exposed to loving words showed brilliant, complex and colourful snowflake patterns. In contrast, polluted water, or water exposed to negative thoughts formed incomplete, asymmetrical patterns with dull colors. *The Healing Power of Water* includes contributions from leading scientists such as William A. Tiller, who was featured in the film *What the Bleep Do We Know!?*; and from spiritual teachers such as Doreen Virtue, Starhawk, William Bloom, and Sig Lonegren.

Second edition of a concise introduction to Schauberger's life and thinking. Viktor Schauberger's knowledge of natural energies led to inventions which, if properly harnessed, could solve the world's energy crisis. Unfortunately most people find his ideas difficult to understand or accept.

Engaging the Movement of Life is an invitation to discover new ways to experience health and embodiment. Osteopathic physician and Continuum Movement teacher Bonnie Gintis offers an approach that encompasses fluid movement, open attention, and awareness of sensation and breath as empowering practices to enrich all aspects of life. She presents a philosophy in which the body is a portal to "something greater"—an opportunity to join a grand experiment in deepening consciousness and connectedness. Moving fluidly increases our vitality, just as water in the natural world is vitalized by flowing freely. Chronicling a path that encompasses views of body, mind, and spirit as a self-healing intercommunicating whole, *Engaging the Movement of Life* is equally useful for medical professionals, bodyworkers, exercise enthusiasts, and spiritual seekers.

A scientist with a revolutionary cure for AIDS is incarcerated without explanation. Valuable artifacts are mysteriously misplaced by a prominent archaeological institution. Three celebrated astronauts perish in a suspicious fire after voicing their criticism of the US space program. Yet our world's most powerful agencies hastily dispel these alarming reports as conspiracy theories, and bury them in padlocked archives. The fact is that a suppression syndrome exists in our society. *Suppressed Inventions and Other Discoveries* exposes the startling degree of truth behind the rumors. Jonathan Eisen has collected over forty intriguing stories of scientific cover-ups and programs of misinformation concocted to conceal some of the most phenomenal innovations in mankind's history. These no-holds-barred accounts force us to confront the naiveté—and danger—of trusting our academic and political leaders to act always for the common good. *Suppressed Inventions and Other Discoveries* presents documented evidence that corporate self-interest, scientific arrogance, and political savvy have contrived to keep us in the dark about technological breakthroughs or interplanetary contact that may shift the current balance of power. Prepare yourself for a revealing look at the research and development to which we've been denied access. *Suppressed Inventions and Other Discoveries* begins by examining the ties that bind the medical establishment to powerful pharmaceutical corporations. Then it details the struggle of the independent research against Orthodox Science and its code of conduct, the Scientific Method. Next, the book investigates the cover-up of information concerning UFOs and extraterrestrial life that's certain to make you reconsider what you thought was science fiction. The final section discusses just a few of the numerous alternate energy resources and fuel savers that, if put on the market today, would soon run the fossil fuel monopolies out of business.

Takes readers on a journey through the free-energy research underground and the secret traditions of Occult Technology, focusing on the inventions of John Worrell Keely, the world's free-energy pioneer.

Learn the purpose of ley lines and ancient megalithic structures located on the grid. Discover how the grid made the Philadelphia Experiment possible. Explore Coral Castle and other mysteries including acoustic levitation, Tesla shields and Scalar wave weaponry.

Austrian naturalist Viktor Schauberger (1885-1958) was far ahead of his time. From his unusually detailed observations of the natural world, he pioneered a completely new understanding of how nature works. He also foresaw, and tried to warn against, the global waste and ecological destruction of our age. This book describes and explains Schauberger's insights in contemporary, accessible language. His remarkable discoveries -- which address issues such as sick water, ailing forests, climate change and, above all, renewable energy -- have dramatic implications for how we should work with nature and its resources.

This is an extremely well-researched and documented book. The authors hypothesis is that the current water and wastewater sector is failing the populations of the western-world by clinging to orthodox and short-term visions of new technology and innovation, and also failing the developing nations by believing that delivery of western-world high-technology solutions is a contribution to humanitarian development. This is the crisis of innovation. To many practitioners in the water industry the book will be perceived to be hypercritical (of the incrementalism, conservative and dogged traditionalism) of the sector, but in fact it is stimulating and positive. In the latter chapters an alternate more holistic model of water development is described. There needs to be a movement from large, central infrastructure resources to distributed systems that are more appropriate to local needs and can be coupled with environmentally sustainable energy sources and practices. Tim Lack, European Topic Centre on Water, UK Whilst acknowledging a massive leap from standpipe to universal water provision in 100 years in developed countries, the authors of this book see problems for global sustainable water supply and wastewater removal in the future. Using the UK water industry as an example, they describe the global water industry as risk averse and unwilling to innovate, a view that is encouraged by the institutional and financial regimes under which it works. The book explores the reasons for concern and sets out some hard-hitting views on how the water industry is failing to identify and tackle the essential problems in a world which is becoming ever more depleted of fresh water. The concluding chapter brings to a focus the problems of the crisis in innovation and gives some concrete suggestions for tackling them. This volume should raise the awareness of policymakers and regulators, technologists and concerned members of the public. Peter Chave, Independent Consultant and formerly Head of Pollution Control, National Rivers Authority, UK This significant new book highlights a little acknowledged but potentially catastrophic crisis of innovation in the global water sector, which institutions and industries are frighteningly ill-equipped to tackle or even accept. It suggests potential new technology and policy approaches

to overcome both current and future problems. The book explores how technological innovation is vital to help provide sustainable water in both the UK and developing countries. However, innovation is being overlooked in the face of global trends to privatize and regulate water utilities. The authors highlight how the global water sector is failing to respond to increasingly complex world needs and continues to build largely unsustainable centralized infrastructures, opposing more appropriate, distributed and local modern technologies. The book also includes suggestions for potentially innovative technology and policy solutions to meet escalating global water and wastewater demands. Importantly, the authors adopt a long-term perspective that crosses both disciplinary and institutional boundaries, and include an international comparative perspective, covering a diverse range of examples and countries. This comprehensive book will have a broad appeal amongst researchers and academics with an interest in technology management, innovation studies, geography and development studies. It will also be a valuable asset for water regulators and governmental and non-governmental organisations working in this field.

Connects the arrival of a new type of children with the fulfillment of the Fifth World of the Mayan Calendar and other great prophecies • Provides detailed information about the world changes that will take place before and after December 21, 2012 • Explores the seven "root races" representing the genetic gene pool of the human family and the phenomenon of soaring intelligence • Explains the grand sweep of human evolution and the worldwide ascension of energy now occurring, which will take humanity to the next level of development According to prophecy, the fifth sun or fifth world of the Mayan calendar moves into a higher octave of vibration, or ascension, on December 21, 2012. This date represents a "gateway" of planetary development that will open humanity to new ways of living and new worlds of opportunity. Ancient traditions have foretold that our successful passage through this gateway depends on the "fifth root race"--new stock in the human gene pool--destined to help us through the exciting and massive changes ahead. In *Beyond the Indigo Children* P. M. H. Atwater illuminates the characteristics of the fifth root race, the capstone being the extraordinary "new children," those brilliant and irreverent kids born since 1982. She explores the relationship of the new children to the prophecies in the Mayan calendar and other traditions, providing extensive background information about the seven root races (the sixth and seventh of which haven't yet appeared) and the great shifting of consciousness already underway. She reveals the connection of the seven root races to the seven chakras, and how the fifth chakra--the chakra of willpower--will be opened for humankind as the new children grow to maturity. She also discusses the phenomenon of soaring intelligence and undeveloped potential and provides concrete guidance and tools for those who seek to understand and help the new children achieve their full potential. *Beyond the Indigo Children* is the first major study of today's children, and their place in our rapidly changing world, that combines objective research with mystical revelation and prophecy.

A comprehensive and in-depth look at the early 'flying saucer technology' of Nazi Germany and the genesis of early man-made UFOs. From captured German scientists, escaped battalions of German soldiers, secret communities in South America and Antarctica to today's state-of-the-art 'Dreamland' flying machines, the astonishing book blows the lid off the 'Government UFO Conspiracy'. Examined in detail are secret underground airfields and factories; German secret weapons; 'suction' aircraft; the origin of NASA; gyroscopic stabilisers and engines; the secret Marconi aircraft factory in South America, and other secret societies, both ancient and modern, that have kept this craft a secret, and much more.

The new science of ecological engineering is winning increasing acceptance all over the world. Established industrial economies like Sweden and the United States are investing more in it as initial skepticism and regulatory hurdles are giving way to burgeoning investments by companies and municipalities, increased research activity, and great inter

Beyond the Secret... Beyond the Power of Now... is the Science of Spirit... a Deeper look at life. Why are we here alive on planet earth trapped in a life of 9 to 5 wage slavery? "Science of Spirit: Lost Keys to the Kingdom of Heaven on Earth" shows that all life on planet earth and in the universe is based on an evolution of consciousness from the beginning of time the Big Bang. It clarifies the connectedness of all life with Science and to Spirit through the understanding of world-old Hermetic Teachings in a balance of Reason and Faith. Consciousness is the very fabric that all form is made out of and is the ground of all beingness of life Consciousness and the energy that makes up matter are inextricably combined or linked, emerging in a sequence of events called occasions of experience that ultimately create our experiences in life and our reality. The universe isn't made of things or particles. It's a process. It's made up of events. The result of this evolution of consciousness is an Analogical Awareness of life living in the now moment of unlimited potentials for the growth of a new super-conscious species of humanity moving through an Omega Point in time between 2011-- 2013. These Hermetic Teachings were clarified for me through the teaching of Ramtha and his Ancient Gnostic School much of what I have learned in 20 years my philosophy of life has its foundation in Ramtha's philosophy. Our accelerating consciousness is moving to a quantum existence of Spirit-in-Mass God Man realized alive with all the lower species of life specifically the Sheeple of Economic Western Society. The Science of Spirit is based on my personal experience... my research... and my understanding of the ancient philosophy that this work comes from... It uses from research the philosophy and experience of other very credible people that have studied different aspects of a Science of Spirit as a philosophy to live by... I use this eclectic approach to build an accurate model of reality based in consciousness that allows us to create our own reality once we rid ourselves of the illusions of society. This approach gives credibility to my overall viewpoint a modern interpretation of a very old philosophy and way of life... A Science of Spirit that is inherent in Mother Nature... It goes in-depth about understanding What Consciousness Is! - An Analogical State of Awareness that is continuously evolving faster and faster to the eternal Now Moment It uses the discovery of a new perspective of the Mayan Calendar that is supposed to end in a religious "Apocalypse at "The Omega Point" in time around 2012 as its foundational understanding of an "Evolution of Consciousness" on earth. This philosophy and research show an Evolution of Consciousness a rising of an Analogical Awareness of life revealing a Science to the nature of Spirit It explains from a new perspective, this battle between the "Forces of Good and Evil" at "The End of Time". This Ancient Science of Spirit philosophy explains how the primeval forces of life [Spirit] that are inherent in Mother Earth growing for 16.4 billion years are pitted against the "dogmatic, stagnant, god-fearing personalities," that runs the Engines of Commerce of our Global Society with their focus on monetary control of the people and the planet. This is a real life battle between evolving evolutionary beings against the "Anti-Christ Social Consciousness of The Multi-National Corporations. Religious dogmas talk about an "Apocalypse at the end of time" to help warn us of our impending doom the remarkable thing is that the word "Apocalypse" means the "lifting of a veil" or a disclosure to certain privileged persons of something hidden from the majority of humankind. I will show in this book that the "lifting of a veil" is a rising of consciousness that knows no fear of the unknown and clarifies ancient predictions of the end days and the real battle of Armageddon. This ancient "Science

What makes water, so simple in its make-up, such an integral part of life? Why has it been revered across the ages? What benefits flow from it that will shape our future? Our origin springs from water, it sustains us now, and it is the key to our future. By going further than just describing its attributes and celebrating its physical properties, this book reveals the spiritual dimension of water. We learn about our own hypnotic attraction to water's simplicity, purity and transparency; as well as its bizarre physical behaviour, structural vibrations and ordered flow; and its amazing medicinal, therapeutic and vital virtues. We can look at the whole spectrum of water's influence; reconciling modern science and ancient wisdom, technology and humanism, logic and mysticism. This innovative, intelligent and far-reaching exploration of water at every level will inspire and stimulate all.

Building on the principles and practices presented in *The Divining Mind* (Richard Wright's first book on dowsing, coauthored by T. Edward Ross II), authors Richard and Pat Wright define dowsing as the "process of uncovering information through the medium of

the self." The Wrights believe, as do many dowsers, that the ability to dowse is innate, but they also feel that its proper development is contingent upon the parallel unfoldment of the spiritual qualities in our nature. Through this process, the dowser becomes increasingly cognizant of the interconnectedness of all aspects of life and begins to play his or her part as an agent of healing and positive change. Includes detailed information on: • Responsibility in dowsing • Practical dowsing • Earth energies • Planetary stewardship • Healing and prayer • The supersensory worlds An indispensable guide for the advanced dowser as well as a beginner's sourcebook.

This book is intended to help mankind realize the many medical and agricultural benefits of enhancing the alternative cellular energy (ACE) pathway. The research stemmed from the discovery of stealth adapted viruses, which bypass cellular immunity. Stealth adapted viruses were implicated in mental illnesses over 20 years ago. The concept evoked political resistance because some stealth adapted viruses unequivocally arose as contaminants of polio vaccines and likely led to the formation of HIV, the AIDS virus. The ACE pathway is distinct from the immune system. It also fundamentally differs from cellular energy obtained from food calories. Rather the ACE pathway is an expression of a "kinetic energy limiting electrostatic attraction" or KELEA. The physics of KELEA needs to be actively pursued. The book consists of six-academic-style chapters followed by narratives regarding political barriers and specific disease entities. Patients' support groups and other organizations will be assisted in conducting their own clinical validation studies. Let the work begin!

An introduction to the biotechnologies of water vitalization • Reveals the deeper secrets of the element water including its memory • Shows the practical applications founded on the work of such pioneers of water research as Viktor Schauberger, Theodor Schwenk, and Masaru Emoto • Looks at water dynamization devices currently available commercially Water is more than the simple liquid evoked by its scientific name H₂O. The discoveries by pioneering figures like Viktor Schauberger and Masaru Emoto have shown that this essential substance is much more complex than originally believed. Water is incredibly sensitive to the micro-information from the surrounding environment and it also possesses a memory. Unfortunately, many of the modern techniques for making water readily available have resulted in depreciating its vitality. Many of the benefits that water can provide when in its optimum natural state have been lost. But there are now methods that have been perfected over the past several decades that can transform our banal tap water back to its natural potent state as the elixir of life. Experience has shown that these methods and devices can even transform water that has been heavily polluted by agriculture or industry into a potable fluid that looks like the product of a limpid mountain spring. Tests show that no trace of the pollutants remain. Many of these devices are available commercially, offering to all the possibility of enjoying the optimum benefits water can deliver when in its healthy, natural state. "Energetic Processes, Volume I is a revolutionary anthology with 19 classic articles by such USPA luminaries as Dr. Sarah Hieronymus, Dr. Bob Beck, Dr. Andrija Puharich, Col. Tom Bearden, Dr. Peter Moscow, Dr. Arden Andersen, Dr. Henry Monteith, Eldon Byrd, Jack Houck, Dr. Bev Rubik, Dr. Glen Rein, Christopher Bird and others. Subjects include documented radionics treatments, effects of healers, psychokinesis, scalars, electrotherapy, crystals, agriculture paradigms, psychotronic warfare, overunity EM systems, zero-point energy, physics and consciousness. "

Unlike health books that cover only nutrition and lifestyle factors, or books that deal with consciousness, spirituality, personal growth, and metaphysical considerations outside the realm of the physical, How We Heal addresses healing in the broadest conceivable context. It presents this whole range of topics in a coherent, comprehensive manner that introduces the novice reader to Body Electronics, iridology, sclerology, and other alternative health modalities. Author Douglas Morrison explores the physical factors — sleep, water, exercise, and detrimental influences such as amalgam dental fillings, root canals, fluoride, electromagnetic fields, vaccinations, drugs — that influence health and explains why it's necessary to integrate them with the hidden patterns of thought, word, and emotion that make healing possible. Through the use of analogies and practical examples, the book helps readers embrace this new way of seeing their own reality. Diagrams and illustrations throughout help further illuminate these potentially life-changing concepts.

One day, I saw large grey tufts in front of my eyes. At work, I decided something definitely happened to my handwriting. The letters became so very small, it was impossible for me to write them any larger. The following day, I stayed home and suffered a migraine. That evening my speech became slurred. My husband wanted to take me to a doctor. I said no. When our doctor's surgery opened in the morning, we were waiting. They asked: Was I born on the 28th or the 29th? I simply did not know. He then drove me to the hospital, where I waited an eternity. I took out my lipstick, but could only apply it to the left side of my mouth, the right side being impossible to reach. They performed a CT scan and later in the evening I was informed I had a stroke and that parts of the right side of my brain, close to the speech centre, were destroyed. Darkness closed in on me, but then came the light. A large blood vessel was completely blocked. The blood platelets piled up on top of each other, more and more and more. This was my brain close to the speech centre. Would my brain be totally destroyed? How much can a person take? Would I be able to speak again? Was this actually death that I was experiencing? It felt like I was free. Consciousness left my body.

What makes water, so simple in its make-up, such an integral part of life? Why has it been revered across the ages? What benefits flow from it that will shape our future? Our origin springs from water, it sustains us now, and it is the key to our future. By going further than just describing its attributes and celebrating its physical properties, this book reveals the spiritual dimension of water. We learn about our own hypnotic attraction to water's simplicity, purity and transparency; as well as its bizarre physical behaviour, structural vibrations and ordered flow; and its amazing medicinal, therapeutic and vital virtues. We can look at the whole spectrum of water's influence, reconciling modern science and ancient wisdom, technology and humanism, logic and mysticism. This innovative, intelligent and far-reaching exploration of water at every level will inspire and stimulate all.

Living Water Viktor Schauberger and the Secrets of Natural Energy Gateway Books

This book offers resources for re-imagining the biblical vision of water for a time quickly emerging as "the century of water wars." It takes its urgency from the author's 5-year activist engagement with a grass-roots-led social movement, pushing back on Detroit water shutoffs as global climate crises intensify. Concerned with both white supremacist "biopolitics" and continuing settler colonial reliance on the Doctrine of Christian Discovery, and beholden to an interreligious methodology of "crossing over and coming back," the text creatively re-reads the biblical tradition under tutelage to the mythologies and practices of various indigenous cultures (Algonquian/Huron, Haitian/Vodouisant, and

Celtic/Norman) whose embrace of water is animate and spiritual as well as political and communal. Not enough, today, merely to engage the political battle over water rights, however; indigenous wisdom and biblical prophecy alike insist that recovery of water spirituality is central to a sustainable future.

The first of four volumes in the Eco-Technology series, which makes available for the first time Viktor Schauberger's original writings and passionate debates.

Ba gua is one of the internal styles of the Chinese martial arts, a "circular" walking technique that helps train the mind and body to recognize and accept change. Characterized by its spinning movements and extremely evasive footwork, ba gua is often used as a means to protect others, much like a good mother holding her child's hand as they cross a busy street. In this combination of philosophical treatise, health manual, and self-defense text, Allen Pittman details the history, philosophy, and techniques of straight-line ba gua zhang, which means "eight trigram palm" in reference to the seminal trigrams of the I Ching. The book contains eight parts corresponding to the eight sections of the I Ching, each representing a different elemental manifestation and martial arts principle. Descriptions of the symbology, cultural, anatomical, and tactical details of each set are taught as well as detailed instructions on the form practice. Illustrated throughout with step-by-step drawings and photographs, the book shows how ba gua zhang, driven by I Ching wisdom, helps students cultivate a sense of centeredness and spontaneity and use this "martial art" in every aspect of their lives. Gardening can be a political act. Creativity, fulfillment, connection, revolution—it all begins when we get our hands in the dirt. Food Not Lawns combines practical wisdom on ecological design and community-building with a fresh, green perspective on an age-old subject. Activist and urban gardener Heather Flores shares her nine-step permaculture design to help farmsteaders and city dwellers alike build fertile soil, promote biodiversity, and increase natural habitat in their own "paradise gardens." But Food Not Lawns doesn't begin and end in the seed bed. This joyful permaculture lifestyle manual inspires readers to apply the principles of the paradise garden—simplicity, resourcefulness, creativity, mindfulness, and community—to all aspects of life. Plant "guerilla gardens" in barren intersections and medians; organize community meals; start a street theater troupe or host a local art swap; free your kitchen from refrigeration and enjoy truly fresh, nourishing foods from your own plot of land; work with children to create garden play spaces. Flores cares passionately about the damaged state of our environment and the ills of our throwaway society. In Food Not Lawns, she shows us how to reclaim the earth one garden at a time.
