When Olivia Laing moved to New York City in her mid-thirties, she found herself inhabiting loneliness on a daily basis. Increasingly fascinated by this most shameful of experiences, she began to explore the lonely city by way of art. Moving fluidly between the works and lives of some of the city's most compelling artists, Laing conducts an electric, dazzling investigation into what it means to be alone, illuminating not only the causes of loneliness but also how it might be resisted and redeemed.

Volume 50

An edition of the Latin comedy, "The Brothers", with introduction and detailed commentary.

"The purpose of this publication is to contribute to [the] process of clarification by explaining universally recognised human rights in a way that makes sense to business. The publication also aims to illustrate, through the use of case studies and actions, how human rights are relevant in a corporate context and how human rights issues can be managed."--Introduction, p. vii.

Theatre flourished in the Roman Republic, from the tragedies of Ennius and Pacuvius to the comedies of Plautus and Terence and the mimes of Laberius. Yet apart from the surviving plays of Plautus and Terence the sources are fragmentary and difficult to interpret and contextualise. This book provides a comprehensive history of all aspects of the topic, incorporating recent findings and modern approaches. It discusses the origins of Roman drama and the historical, social and institutional backgrounds of all the dramatic genres to be found during the Republic (tragedy, praetexta, comedy, togata, Atellana, mime and pantomime). Possible general characteristics are identified, and attention is paid to the nature of and developments in the various genres. The clear structure and full bibliography also ensure that the book has value as a source of reference for all upper-level students and scholars of Latin literature and ancient drama.

"The great German philologist Richard Heinze's *Virgil's Epische Technik* was originally published in German in 1903. It was the outstanding book on Virgil in its day, and it remains a very valuable study of the techniques Virgil used to compose the Aeneid. This English translation by Hazel Harvey, David Harvey and Fred Robertson was published in 1994, with an introduction by Antonie Wlosok."--Bloomsbury Publishing.

Working "in the shadow of Eduard Norden" in the author's own words, Nicholas Horsfall has written his own monumental commentary on Aeneid 6. This is Horsfall's fifth large-scale commentary on the Aeneid, and as his earlier commentaries on books 7, 11, 3, and 2, this is not a commentary aimed at undergraduates. Horsfall is a commentators' commentator writing with encyclopedic command of Virgilian scholarship for the most demanding reader. Volume One includes the introduction, text and translation, and bibliography, Volume Two includes the commentary, appendices, and indices.

In *Reading Death in Ancient Rome*, Mario Erasmo considers both actual funerary rituals and their literary depictions in epic, elegy, epitaphs, drama, and prose works as a form of participatory theater in which the performers and the depictees of rituals engage in strategies to involve the viewer/reader in the ritual process, specifically by invoking and playing on their cultural associations at a number of levels simultaneously. He focuses on the associative reading process—the extent to which literary texts allude to funeral and burial ritual, the narrative role played by the allusion to recreate a fictive version of the ritual, and how the allusion engages readers' knowledge of the ritual or previous literary intertexts. Such a strategy can advance a range of authorial agendas by inviting readers to read and reread assumptions about both the surrounding Roman culture and earlier literature invoked through intertextual referencing. By (re)defining their relation to the dead, readers assume various roles in an ongoing communion with the departed. *Reading Death in Ancient Rome* makes an important and innovative contribution to semiotic theory as applied to classical texts and to the emerging field of mortality studies. It should thus appeal to classicists as well as to advanced undergraduate and graduate students in art history and archeology.

The circulation of books was the motor of classical civilization. But books were both expensive and rare, and so libraries - private and public, royal and civic - played key roles in articulating intellectual life. This collection, written by an international team of scholars, presents a fundamental reassessment of how ancient libraries came into being, how they were organized and how they were used. Drawing on papyrology and archaeology, and on accounts written by those who read and wrote in them, it presents new research on reading cultures, on book collecting and on the origins of monumental library buildings. Many of the traditional stories told about ancient libraries are challenged. Few were really enormous, none were designed as research centres, and occasional conflagrations do not explain the loss of most ancient texts. But the central place of libraries in Greco-Roman culture emerges more clearly than ever.

Cicero composed his incendiary Philippics only a few months after Rome was rocked by the brutal assassination of Julius Caesar. In the tumultuous aftermath of Caesar's death, Cicero and Mark Antony found themselves on opposing sides of an increasingly bitter and dangerous battle for control. Philippic 2 was a weapon in that war. Conceived as Cicero's response to a verbal attack from Antony in the

Senate, Philippic 2 is a rhetorical firework that ranges from abusive references to Antony's supposedly sordid sex life to a sustained critique of what Cicero saw as Antony's tyrannical ambitions. Vituperatively brilliant and politically committed, it is both a carefully crafted literary artefact and an explosive example of crisis rhetoric. It ultimately led to Cicero's own gruesome death. This course book offers a portion of the original Latin text, vocabulary aids, study questions, and an extensive commentary. Designed to stretch and stimulate readers, Ingo Gildenhard's volume will be of particular interest to students of Latin studying for A-Level or on undergraduate courses. It extends beyond detailed linguistic analysis to encourage critical engagement with Cicero, his oratory, the politics of late-republican Rome, and the transhistorical import of Cicero's politics of verbal (and physical) violence.

This contribution by Gesine Manuwald provides an introduction to all varieties of 'Roman comedy', including primarily *fabula palliata* ('New Comedy', as represented by Plautus and Terence) as well as *fabula togata*, *fabula Atellana*, *mimus* and *pantomimus*.

Though in many respects similar to us moderns, the Greeks and Romans often conceived things differently than we do. The cultural inheritance we have received from them can therefore open our eyes to many "manners of life" we might otherwise overlook. The ancients told fascinating-but different-stories; they elaborated profound-but different-symbols. Above all, they confronted many of the problems we still face today-memory and forgetfulness; identity and its strategies; absolutist moralism and behavioral relativity-only in profoundly different ways, since their own cultural forms and resources were different. In *The Ears of Hermes: Communication, Images, and Identity in the Classical World*, renowned scholar and author Maurizio Bettini explores these different cultural experiences, choosing paths through this territory that are diverse and sometimes unexpected: a little-known variant of a myth or legend, such as that of Brutus pretending, like Hamlet, to be a Fool; a proverb, like *lupus in fabula* (the wolf in the tale), that expresses the sense of foreboding aroused by the sudden arrival of someone who was just the subject of conversation; or great works, like Plautus' *Amphitruo* and Vergil's *Aeneid*, where we encounter the mysteries of the *Doppelgänger* and of "doubles" fabricated to ease the pain of nostalgia. Or the etymology of a word-its own "story"-leads us down some unforeseen avenue of discovery. While scholarly in presentation, this book, in an elegant English translation by William Michael Short, will appeal not only to classicists but also students, as well as to anthropologists and historians of art and literature beyond classics.

This handbook for teachers provides both practical, up-to-date guidance and a theoretical overview on a number of key topics in Latin teaching. Using a wealth of interviews, observations and pupil transcripts, Steven Hunt title utilizes case-study evidence of excellent practice in teaching and learning from a wide variety of institutions: from outreach programmes, community schools and academies in the UK, to New York Charter Schools, KIP schools and schools in Eastern Seaboard states in the USA. Offering practical advice on topics such as essay writing, teaching controversial topics including women, slavery, ethnicity and social hierarchy, making use of primary sources and using ICT to advance language skills, the book also engages with broader questions of approach and theory. These include a survey of the three main approaches to Latin teaching: grammar-translation, communicative and reading approaches; explanation of cognitive and social approaches to learning; and analysis of the differences between intrinsic and extrinsic motivation. Moreover, traditional arguments about the value and purpose of learning Latin at school level are re-examined in the light of current educational thinking and government policy-making. This book is invaluable for trainees, newly qualified teachers and more experienced practitioners looking for practical ideas and strategies to motivate and engage learners of Latin. A companion website [www.startingtoteachlatin.org](http://www.startingtoteachlatin.org) is under construction and will contain a range of resources and information for teachers.

This second edition of the Oxford Latin Course combines the best features of both modern and traditional methods of Latin teaching from first stages to GCSE. Completely revised and restructured in the light of a nationwide survey of Classics teachers, it provides an exciting, stimulating approach to Latin based on the reading of original texts. Parts I-III are built around a narrative detailing the life of Horace, based closely on historical sources, which helps students to develop an understanding of the times of Cicero and Augustus.

For the Romans, the manner of a person's death was the most telling indication of their true character. Death revealed the true patriot, the genuine philosopher, even, perhaps, the great artist--and certainly the faithful Christian. Catharine Edwards draws on the many and richly varied accounts of death in the writings of Roman historians, poets, and philosophers, including Cicero, Lucretius, Virgil, Seneca, Petronius, Tacitus, Tertullian, and Augustine, to investigate the complex significance of dying in the Roman world. Death in the Roman world was largely understood and often literally viewed as a spectacle. Those deaths that figured in recorded history were almost invariably violent--murders, executions, suicides--and yet the most admired figures met their ends with exemplary calm, their last words set down for posterity. From noble deaths in civil war, mortal combat between gladiators, political execution and suicide, to the deathly dinner of Domitian, the harrowing deaths of women such as the mythical Lucretia and Nero's mother Agrippina, as well as instances of Christian martyrdom, Edwards engagingly explores the culture of death in Roman literature and history.

Originally designed as a supplement to the Latin course by F. M. Wheelock, this book is well suited for use in any introductory or review course. All the stories in the book are based on actual Latin literature, with the stories simplified at first and made gradually more complex as the work progresses. Students will learn how classical Latin was really written as they become familiar with the works of the great Latin authors.

An interdisciplinary approach to establish the significance of the first illustrated edition of the plays of Terence, its commentary and iconographic traditions and legacy in sixteenth-century Italy and France.

*De Spectaculis*, also known as *On the Spectacles* or *The Shows*, is a surviving moral and ascetic treatise by Tertullian. Written somewhere between 197-202, the work looks at the moral legitimacy and consequences of Christians attending the circus, theatre, or amphitheatre.

The games comprised gladiatorial fights, staged animal hunts (*venationes*) and the executions of convicted criminals and prisoners of war. Besides entertaining the crowd, the games delivered a powerful message of Roman power: as a reminder of the wars in which Rome had acquired its empire, the distant regions of its far-flung empire (from where they had obtained wild beasts for the *venatio*), and the inevitability of Roman justice for criminals and those foreigners who had dared to challenge the empire's authority. Though we might see these games as bloodthirsty, cruel and reprehensible condemning any alien culture out of hand for a sport that offends our sensibilities smacks of cultural chauvinism. Instead one should judge an ancient sport by the

standards of its contemporary cultural context. This book offers a fascinating, and fair historical appraisal of gladiatorial combat, which will bring the games alive to the reader and help them see them through the eyes of the ancient Romans. It will answer questions about gladiatorial combat such as: What were its origins? Why did it disappear? Who were gladiators? How did they become gladiators? What was their training like? How did the Romans view gladiators? How were gladiator shows produced and advertised? What were the different styles of gladiatorial fighting? Did gladiator matches have referees? Did every match end in the death of at least one gladiator? Were gladiator games mere entertainment or did they play a larger role in Roman society? What was their political significance?
