The Macintosh challenged games to be more than child's play and quick reflexes. It made human-computer interaction friendly, inviting, and intuitive. Mac gaming led to much that is now taken for granted by PC gamers and spawned some of the biggest franchises in video game history. It allowed anyone to create games and playful software with ease, and gave indie developers a home for their products. It welcomed strange ideas and encouraged experimentation. It fostered

passionate and creative communities who inspired and challenged developers to do better and to follow the Mac mantra 'think different'. Drawing on archive material and interviews with key figures from the era – and featuring new material from Craig Fryar, Apple's first Mac games evangelist and the co-creator of hit game Spectre – *The Secret History of Mac Gaming* is the story of those communities and the game developers who survived and thrived in an ecosystem that was serially ignored by the outside world. It's a book about people who followed their hearts first and market trends second, showing how clever, quirky, and downright wonderful video games could be.

Presents fifty hacks to customize performance of a Mac, including automating tasks, increasing security, playing Wii games, and modifying wifi.

An album-by-album celebration of the life and music of Mac Miller through oral histories, intimate reflections, and critical examinations of his enduring work. “One of my most vivid memories of him is the way he would look at you while he was playing you a song. He tried to look you right in the eyes to see how you were feeling about it.” —Will Kalson, friend and first manager

Following Mac Miller's tragic passing in 2018, Donna-Claire Chesman dedicated a year to chronicling his work through the unique lens of her relationship to the music and Mac's singular relationship to his fans. Like many who'd been following him since he'd started releasing mixtapes at eighteen years old, she felt as if she'd come of age alongside the rapidly evolving artist, with his music being crucial to her personal development. “I want people to remember his humanity as they're listening to the music, to realize how much bravery and courage it takes to be that honest, be that self-aware, and be that real about things going on internally. He let us witness that entire journey. He never hid that.” —Kehlani, friend and musician. The project evolved to include intimate interviews with many of Mac's

closest friends and collaborators, from his Most Dope Family in Pittsburgh to the producers and musicians who assisted him in making his everlasting music, including Big Jerm, Rex Arrow, Wiz Khalifa, Benjy Grinberg, Just Blaze, Josh Berg, Syd, Thundercat, and more. These voices, along with the author's commentary, provide a vivid and poignant portrait of this astonishing artist—one who had just released a series of increasingly complex albums, demonstrating what a musical force he was and how heartbreaking it was to lose him. “As I’m reading the lyrics, it’s crazy. It’s him telling us that he hopes we can always respect him. I feel like this is a message from him, spiritually. A lot of the time, his music was like little letters and messages to his friends, family, and people he loved, to remind them of who he really was.” —Quentin Cuff, best friend and tour manager

Be More Productive with Pages, Numbers, and Keynote Pages, Numbers, and Keynote are Apple's office/business productivity software applications. Originally a suite of software called iWork, these apps are roughly the equivalent of Microsoft Office's Word, Excel, and PowerPoint – but implemented quite differently with Apple's approach to design and functionality. Written by Apple hardware and software expert, Brad Miser, My Pages®, Numbers®, and Keynote® includes full-color, step-by-step tasks to walk you through these key applications, so you can quickly accomplish exactly what you want through word processing, spreadsheets, and presentations. The tasks include how to: Store your documents on the cloud so you can work with them on any device, including Mac and Windows computers, iPads, and iPhones. Use templates so that creating amazing-looking documents is fast and easy. Add text to your documents by typing or dictation, and then use powerful tools to format that text easily and quickly. Enhance your Pages documents by including tables, charts, photos, tables of content, headers, footers, and more. Use Numbers spreadsheets to organize, format, calculate (using built-in or custom formulas), report, and present information in tables and charts. Use Keynote to build amazing presentations including text, images, charts, animation, and more. Share your documents by creating PDFs or printing them; provide digital versions of your documents to others using email, AirDrop, or messages.
