Synopsis: In a time and world long ago forgotten, there existed an enchanted workshop. Within its walls, a magical creature called a 'Maker' busily created the next of his kin. Upon completion, the creator was whisked away to join the rest of the Maker community. Meanwhile, their progeny was left alone to create the next Maker in a never-ending cycle of creation. That was, until the day an offbeat Maker named Ario was unable to complete 'The Making' and broke their sacred chain of existence. Wracked with guilt, Ario embarked on a quest to right his wrong, but what he discovered was far more monstrous and miraculous than anyone ever imagined. Around the year 1200, the Cistercian Engelhard of Langheim dedicated a collection of monastic stories to a community of religious women. Martha G. Newman explores how this largely unedited collection of tales about Cistercian monks illuminates the religiosity of Cistercian nuns. As did other Cistercian storytellers, Engelhard recorded the miracles and visions of the order's illustrious figures, but he wrote from Franconia, in modern Germany, rather than the Cistercian heartland. His extant texts reflect his interactions with non-Cistercian monasteries and with Langheim's patrons rather than celebrating Bernard of Clairvaux. Engelhard was conservative, interested in maintaining traditional Cistercian patterns of thought. Nonetheless, by offering to women a collection of narratives that explore the oral qualities of texts, the nature of sight, and the efficacy of sacraments, Engelhard articulated a distinctive response to the social and intellectual changes of his period. In analyzing Engelhard's stories, Newman uncovers an understudied monastic culture that resisted the growing emphasis on the priestly administration of the sacraments and the hardening of gender distinctions. Engelhard assumed that monks and nuns shared similar interests and concerns, and he addressed his audiences as if they occupied a space neither fully sacerdotal nor completely lay, neither scholastic nor unlearned, and neither solely male nor only female. His exemplary narratives depict the sacramental value of everyday objects and behaviors whose efficacy relied more on individual spiritual formation than on sacerdotal action. By encouraging nuns and monks to imagine connections between heaven and earth, Engelhard taught faith as a learned disposition. Newman's study demonstrates that scholastic questions about signs, sacraments, and sight emerged in a narrative form within late twelfth-century monastic communities.

An original and provocative analysis of Eugene O'Neill's unfinished cycle play project From 1935 to 1939, Eugene O'Neill worked on a series of plays that would trace the history of an American family through several generations. He completed just two of the proposed eleven plays—A Touch of the Poet and More Stately Mansions—which Zander Brietzke argues represent the core of the entire cycle. Combining archival research, literary analysis, and theatrical imagination, Magnum Opus invites an audience to see this unusual and exciting epic as a historical drama of our time.

Includes, beginning Sept. 15, 1954 (and on the 15th of each month, Sept.-May) a special section: School library journal, ISSN 0000-0035, (called Junior libraries, 1954-May 1961). Also issued separately.

This book explores the 'photo story' through 61 master classes by some of the world's greatest photographers, all members of the international photographic agency Magnum.

Disguised as a scientific account, the novel tells the story of how the Magnum Opus of the alchemists had been found twice, first by a true adept who was seeking spiritual fulfilment on his tedious road to the enlightenment by the true and eternal sun, and then, by an opportunist who found his financial freedom thanks to the adept's testament and a faultless Sun computer. The story ends with an encounter of the two leading characters, an atomic explosion, and a gargantuan laughter.

This Companion provides an authoritative source for scholars and students of the nascent field of media geography. While it has deep roots in the wider discipline, the consolidation of media geography has started only in the past decade, with the creation of media geography's first dedicated journal, Aether, as well as the publication of the sub-discipline's first textbook. However, at present there is no other work which provides a comprehensive overview and grounding. By indicating the sub-discipline's evolution and hinting at its future, this volume not only serves to encapsulate what geographers have learned about media but also will help to set the agenda for expanding this type of interdisciplinary exploration. The contributors-leading scholars in this field, including Stuart Aitken, Deborah Dixon, Derek McCormack,

Barney Warf, and Matthew Zook-not only review the existing literature within the remit of their chapters, but also articulate arguments about where the future might take media geography scholarship. The volume is not simply a collection of individual offerings, but has afforded an opportunity to exchange ideas about media geography, with contributors making connections between chapters and developing common themes.

She told me that I needed to share my story. She said that eventually we would all share our stories. She said the stories were essential for the Magnum Opus. What that was, she said I would come to know in time. She said we would all come to know in time. Like all young people, they dream of a better life. They dream of making a difference. In the beginning, they will change the lives of everyone they touch. Then they will learn to think bigger. In time, they will change the lives of millions. In time, they will shape the fate of nations. In time, they will rule over countless worlds. In time, they will understand the Magnum Opus. They will understand that the story is your story

In honor of the 70th birthday of Professor Douglas G. Greene, mystery genre scholar and publisher, this book offers 24 new essays and two reprinted classics on detective fiction by contributors around the world, including ten Edgar (Mystery Writers of America) winners and nominees. The essays cover a myriad of authors and books from more than a century, from J.S. Fletcher's *The Investigators*, originally serialized in 1901, to P.D. James' *Death Comes to Pemberley*, published at the end of 2011. Subjects covered include detective fiction in the Edwardian era and the "Golden Age" between the two world wars; hard-boiled detective fiction; mysteries and intellectuals; and pastiches, short stories and radio plays.

Drawing on the fifteenth century theology of Saint Joseph, classical visual sources, Ficino's commentary on the "Phaedrus" and "Symposium," and Dante's "rime petrose," this book interprets Michelangelo's *Tondo Doni* as a model of Ephesians' sacrament of marriage for the new Florentine republic.

Nothing will ever mystify or challenge the Wonder. He masters entire libraries and languages with little effort. No equation, no problem is too difficult to solve. His casual conversations with ministers and philosophers decimate their vaunted beliefs and crush their cherished intellectual ambitions. The Wonder compels obedience and silence with a glance. His mother idolizes him as a god. Yet no one is more hated or alone than the Wonder. This is the chilling tale of Victor Stott, an English boy born thousands of years ahead of his time. Raised in the village of Hampdenshire, the strangely proportioned young Victor possesses mental abilities vastly superior to those of his fellow villagers. The incomprehensible intellect and powers of the Wonder inspire awe, provoke horror, and eventually threaten to rip apart Hampdenshire. Long recognized as a classic of speculative fiction but never before widely available, *The Wonder* is one of the first novels about a "superman." J. D. Beresford's subtle and intriguing story of a boy with superhuman abilities paved the way for such noted works as Philip Wylie's *Gladiator* and A. E. van Vogt's *Slan*

This is a comprehensive guide to popular music literature, first published in 1986. Its main focus is on American and British works, but it includes significant works from other countries, making it truly international in scope.

Magnum Ingenium (Great Wisdom) explores the biblical definition of wisdom and wise leadership. It explains why it is important that our governments and the Christian church pursue wise policies and offers an explanation as to why our governments and the church have abandoned wise policies in favor of foolish policies. Magnum Ingenium also studies the differences in personality traits between men and women as they pertain to wisdom and foolishness and explains why men have a greater propensity for wise leadership than women do. It describes how our current and past foolish policies are caused by a hyperfeminine condition of the citizenry, governments, and the church. Magnum Ingenium offers an explanation of how we came to be in this current hyperfeminine condition and why it is leading to the collapse of Western civilization and destroying the church. It also explains why Christian men are to blame for this hyperfeminine condition and why only Christian men can lead us out of this condition and back to wisdom to save the church and Western civilization.

"Since its founding in 1947, the legendary Magnum Photos agency has been telling its own story: Its photographers were concerned witnesses to history and artists on the hunt for decisive moments; their pictures were humanist documents of the postwar world. Based in unprecedented archival research, *The Decisive Network* peels back layers of the Magnum mythology to offer a new history of what it meant to shoot, edit, and sell news images after World War II. Between the 1940s and 1960s, Magnum expanded the human-interest story - about the everyday life of ordinary people - to global dimensions while bringing the aesthetic of news pictures into new markets. Its best-known work started as humanitarian aid promotion, travel campaigns, corporate publicity, and advertising. Working with this range of clients, Magnum made photojournalism integral to visual culture. Yet Magnum's photographers could not have done this alone. This book unpacks the collaborative nature of photojournalism as it

transpired on a daily basis, focusing on how picture editors, sales agents, spouses, and publishers helped Magnum photographers succeed in their assignments and achieve fame. The Decisive Network concludes in the late 1960s and early 1970s, when, amidst the decline of magazine publishing and the rise of an art market for photography, Magnum turned to photo books and exhibitions to manage its growing picture archives and consolidate its brand. In that moment, Magnum's photojournalists became artists and their assignments turned into oeuvres. Such ideas were necessary publicity, and they also managed to shape discussions about photography for decades. Bridging art history, media studies, cultural history, and the history of communication, this book transforms our understanding of the photographic profession and the global circulation of images in the pre-digital world"--
